Blue Collar Blues Robert Z Lawrence, 2008-01-01 International trade accounts for only a small share of growing income inequality and labor market displacement in the United States Lawrence deconstructs the gap in real blue collar wages and labor productivity growth between 1981 and 2006 and estimates how much higher these wages might have been had income growth been distributed proportionately and how much of the gap is due to measurement and technical factors

about which little can be done While increased trade with developing countries may have played some part in causing greater inequality in the 1980s surprisingly over the past decade the impact of such trade on inequality has been relatively small Many imports are no longer produced in the United States and US goods and services that do compete with imports are not particularly intensive in unskilled labor Rising income inequality and slow real wage growth since 2000 reflect strong profit growth much of which may be cyclical and dramatic income gains for the top 1 percent of wage earners a development that is more closely related to asset market performance and technological and institutional innovations rather than conventional trade in goods and services The minor role of trade therefore suggests that any policy that focuses narrowly on trade to deal with wage inequality and job loss is likely to be ineffective Instead policymakers should use the tax system to improve income distribution and implement adjustment policies to deal more generally with worker and community dislocation

Decolonizing Revelation Rufus Burnett Jr.,2018-03-16 At a time when ideas like post racial society and BlackLivesMatter occupy the same space scholars of black American faith are provided a unique opportunity to regenerate and imagine theological frameworks that confront the epistemic effects of racialization and its confluence with the theological imagination Decolonizing Revelation contributes to this task by rethinking or taking a second look at the cultural production of the blues Unlike other examinations of the blues that privilege the hermeneutic of race this work situates the blues spatially offering a transracial interpretation that looks to establish an option for disentangling racial ideology from the theological imagination This book dislocates race in particular and modernity in general as the primary means by which God's self disclosure is read across human history Rather than looking to the experience of antiblack racism as revelational the work looks to a people group blues people and their spatial sonic and sensual activities Following the basic theological premise that God is a God of life Burnett looks to the spaces where blues life occurs to construct a decolonial option for a theology of revelation
