 Onderka, Gabriela Vrtalová, 2022-01-01 Ancient Egyptian mummies and their funerary equipment are an invaluable source of  
 information not only on the Egyptians perception of death but more importantly on their lives diseases and traumas they  
 suffered from activities they carried out their family relations and more The present volume second in the series of Atlas of  
 Egyptian Mummies in the Czech Collections is dedicated to mummies and funerary containers of non adults aged 15 and

 National Museum in Prague namely the N prstek Museum of Asian African and American Cultures and the Natural History  
 Museum The mummies were examined using non invasive methods and the results were compared to those published in the  
 past The containers two boxes two hampers and two jars represent only a small part of typological repertoire of containers  
 used for the deposition of burials of non adult individuals While the non adult mummies and their isolated parts are without  
 provenience all of the six containers come from modern excavations at well documented cemeteries at Deir el Medina and  
 Abusir Examination by non invasive methods especially computed tomography brought to light several findings including one  
 possible case of traumatic death and one possible case of rickets Information on the use of mummification substances and
