Fall Of America 1st Edition:

The Rise and Fall of American Lutheran Pietism Paul P. Kuenning, 1988 The author's primary purpose is to describe the precise nature of American Lutheran Pietism and to discern its proper place in the history of Lutheranism The book examines leaders like Philip Spencer August Franke and Samuel Simon Schmucker The author also explores the complexities of whether the Lutheran Church in antebellum America would support antislavery positions like gradual emancipation or the immediacy of abolition

The Bush Leadership, the Power of Ideas, and the War on Terror Dirk Nabers, 2016-04-01 Foreign policy success or failure is often attributed to the role of leadership This volume explores the relationship between President George W Bush's leadership the administration's stated belief in the power of ideas and the ideas of power and its approach to the war on terror Drawing on the international expertise of ten American foreign policy and security specialists this incisive and timely book combines theoretical perspectives on political leadership with rigorous empirical analysis of selected aspects of the Bush administration's post 9 11 foreign policy As a result this book sheds considerable light not just on the limited impact of President Bush's war on terror strategy but also more importantly on why key ideas underpinning the strategy such as US global primacy and pre-emptive war largely failed to gel in a globalizing world

America Through the Eyes of China and India Edward D. Sherman, 2010-09-09 America has long exported its network and cable programming abroad but with a changing world comes a changing dynamic As global centers of power shift and wealth becomes redistributed and perhaps even re-centered vast audiences which have never before had contact with American television will begin to gain access to the full wealth and abundance of American programming The opening of new markets and new audiences particularly within the growing superpowers of China and India presents us with a novel situation It is one thing for a show like *The OC* to be played in a nation like England where the cultural and religious differences with the United States are not that profound and quite another for it to air in a nation like India where arranged marriages the caste system and pervasive poverty are still everyday realities *America Through the Eyes of China and India* explores the dynamics of television identity and cultural communication providing a new lens for encountering interpreting and judging American culture and the American identity

the Government of the United States United States. Superintendent of Documents,1922 *America Rising* David Felix,2011-12-31 The United States became a great power in the last quarter of the nineteenth century and a superpower during World War II without quite knowing it Few Americans fully appreciate the fact today How many people know that in recent years we have had 250 000 troops in 700 bases around the world Consider our recent history of military operations in the Caribbean East Asia the Far East Middle East Southeast Asia Africa and the Balkans In *America Rising* David Felix attempts to explain how and why America became a superpower by examining the political and economic factors that have driven its ascendance and their relationship throughout history Felix begins with the dawn of America showing how America amassed wealth and political power from the start through wars assertions of economic might and the creation of a cultural and philosophical base The nation began with a political order derived from our British origins which enabled our pragmatic culture to take advantage of the vast wealth of a near virgin continent Political and economic freedom were paired authority yielding to both freedoms Our farmers and businessmen were dreamers manufacturing realities out of those dreams Felix's account then makes a point of neoclassical economics as an anvil on which to hammer out a sharper sense of the content of our existence This book which demonstrates the author's zest for historical analysis and great story telling ability points to the central fact of a rising America the intensely energizing interaction between polity and economy The United States is the greatest power in world history but the rise of another great power China is beginning to be increasingly apparent One trusts that drawing upon its deep resources America will remember its history and traditions and continue as a superpower
