Being in Time to the Music David Ross, 2008-12-18 Being in time to the music from the ground up is a work in phenomenology where this term is broadly defined comprehending Plato Heidegger Hegel and Marx The most direct referent is Hegel together with the theoretical revolution that he initiated with Phenomenology of Mind This text's more general purpose is to set the tone for a 21st communism based upon the idea of dancing with death assuming full responsibility for one's mortality and abandoning the self to love as the meaning of existence This dance is choreographed through my conversations with the above mentioned writers In conversing with them

I aim to displace if not usurp them from the throne of honour which is nothing more than the authority borrowed from me By this I do not intend to deny completely their other to me character However they exist or even figure for me both in the sense of of count having importance as those that I read and by which I read myself They have borrowed my authority namely my own potential to be an author So reading them is to re assume that borrowed authority The life of the reader to paraphrase Barthes begins with the death of the author

Within and Without Eternity Jules van Lieshout, 1994 Throughout his discussions Van Lieshout focuses on the relation of Blake's Generation and Eternity which he identifies as Bakhtinian world views In Generation existence is finalized as a hierarchy of geometric dark globes each assuming the character of universal whole to the exclusion of all others Eternity on the other hand is Blake's fractal human form of existence that is continuously organized and reorganized in the dynamic interaction of whole and parts

The Religion of Reality Didier Maleuvre, 2006 The book first argues that religious feeling persists in the secular western mind that it has taken refuge in the unlikeliest of camps indeed with the supposed debunker of religious creed the rationalist existential ego

Art and Reality John Anderson, 2017-05-31 Art and Reality is a collection of general theoretical reflections and particular critical studies in which John Anderson asserts the essential role of art and aesthetics in intellectual life Rejecting the notion that artistic appreciation is simply a matter of spontaneous response or personal taste Anderson argues that genuine criticism requires the application of general aesthetic principles and an awareness of the relationship between art and nature In exploring how beauty is experienced and defined he considers a wide range of authors from Homer to Joyce Melville to Dostoevsky Shakespeare to Shaw He outlines his underlying theory of aesthetics and offers commentary on some key controversies of his day including psychoanalytic criticism the Ern Malley hoax and the censorship of Ulysses in Australia With characteristic rigor and originality Anderson proposes a philosophical way of approaching works of art one which can lead us to a more meaningful and thoughtful engagement with literature

Remapping Reality John Aloysius McCarthy, 2006 This book is about intersections among

science philosophy and literature It bridges the gap between the traditional cultures of science and the humanities by constituting an area of interaction that some have called a third culture By asking questions about three disciplines rather than about just two as is customary in research this inquiry breaks new ground and resists easy categorization It seeks to answer the following questions What impact has the remapping of reality in scientific terms since the Copernican Revolution through thermodynamics relativity theory and quantum mechanics had on the way writers and thinkers conceptualized the place of human culture within the total economy of existence What influence on the other hand have writers and philosophers had on the doing of science and on scientific paradigms of the world Thirdly where does humankind fit into the total picture with its uniquely moral nature In other words rather than privileging one discipline over another this study seeks to uncover a common ground for science ethics and literary creativity Throughout this inquiry certain nodal points emerge to bond the argument cogently together and create new meaning These anchor points are the notion of movement inherent in all forms of existence the changing concepts of evil in the altered spaces of reality and the creative impulse critical to the literary work of art as well as to the expanding universe This ambitious undertaking is unified through its use of phenomena typical of chaos and complexity theory as so many leitmotifs While they first emerged to explain natural phenomena at the quantum and cosmic levels chaos and complexity are equally apt for explaining moral and aesthetic events Hence the title Remapping Reality extends to the reconfigurations of the three main spheres of human interaction the physical the ethical and the aesthetic or creative

Reality vs Quantum Mysticism R. Curtis Arthur, 2021-05-26 Science has made tremendous advances in overcoming superstition and replacing revealed truth with proven factual truth Quantum mechanics and the Theories of Relativity have contributed immensely to these advances But in spite of this certain absurdities referred to as the quantum enigma have emerged from the standard interpretation of quantum mechanics This has been recognized by some physicists but the absurdities have been largely ignored by most to the detriment of our understanding of the creation evolution and nature of the universe Albert Einstein himself felt quantum mechanics was incomplete and spent the last 3 or 4 decades of his life fighting the proponents of the absurdities It has been claimed that Einstein lost this battle but the author disagrees and provides proof of the opposite Einstein may have made slight mistakes in developing his Theories of Relativity however that may have unintentionally contributed to the absurdities and the author s work supports the statement that Einstein may have been wrong just where most thought he was right and right just where most thought he was wrong The author provides a new analysis of space and time and corrections to aspects of quantum mechanics and the Theories of Relativity that may eliminate the absurdities This could provide a new understanding of the birth evolution and nature of the universe and possible explanations for dark energy and dark matter This is presented in a manner that can be understood and appreciated by all curious folks not just physicists and will help them understand their universe and the amazing things physicists have accomplished

Personal Reality, Volume 1 Daniel Paksi, 2020-01-01 Western civilization was built on the concept of God Today modern science based on the critical method and so called objective facts denies even the existence of our soul There is only matter atoms molecules and DNA sequences There is no freedom there are no well grounded beliefs The decline of Western civilization is not the simple consequence of decadence hedonism and malevolence Modern critical science has liberated us from the old dogmas but failed to establish our freedoms values and beliefs However human knowledge is not objective but personal We are the children of evolution Everybody sees the world from his own personal point of view anchored into his her body We use our billions of years old evolutionary skills and thousands of years old cultural heritage to recognize and acknowledge the personal facts of our reality freedom and most important natural beliefs respect and speak the truth In reality even science itself is based on our personal knowledge Only our false conceptual dichotomies paralyze our

thinking God or matter There is a third choice the emergence of life and human persons This is the only way to defend our freedoms and the Christian moral dynamism of free Western societies What Is Reality? Ross Inman,2024-10-08 In this introduction to metaphysics Ross Inman introduces us to the tradition of metaphysics in Western philosophy what it means to do metaphysics as a Christian and considers timeless and universal inquiries into central topics of metaphysics identity necessity and possibility properties universals substances and parts and wholes **Naturalism and Our Knowledge of Reality** R. Scott Smith,2016-04-22 Philosophical naturalism is taken to be the preferred and reigning epistemology and metaphysics that underwrites many ideas and knowledge claims But what if we cannot know reality on that basis What if the institution of science is threatened by its reliance on naturalism R Scott Smith argues in a fresh way that we cannot know reality on the basis of naturalism Moreover the fact value split has failed to serve our interests of wanting to know reality The author provocatively argues that since we can know reality it must be due to a non naturalistic ontology best explained by the fact that human knowers are made and designed by God The book offers fresh implications for the testing of religious truth claims science ethics education and public policy Consequently naturalism and the fact value split are shown to be false and Christian theism is shown to be true **From Illusions to Reality** Vesselin Petkov,2013-09-08 The greatest mystery in the world is its very existence In our intellectual development we all reach a turning point when we start asking the perennial existential questions What is the world What am I What is the meaning of the existence of the world and myself As the German philosopher Schopenhauer put it The lower a man stands in intellectual respects the less of a riddle does existence seem to him but the clearer his consciousness becomes the more the problem grasps him in its greatness This book explores what fundamental physics tells us about the physical world and how the scientific picture of what exists often differs disturbingly from the common sense view based on the way our senses reflect the world Centuries old illusions are identified by showing that they contradict experimentally confirmed results of modern physics which clears the way toward deeper understanding of reality The greatest illusion that the world exists only at the present moment of time has been realized by many great thinkers but so far the human race has been unable to free itself from it prompting Einstein to write this the distinction between past present and future is only a stubbornly persistent illusion Getting rid of such stubbornly persistent illusions by open mindedly examining the implications of modern physics for the physical world can help us rise above the fog of everyday life and see Nature the way she herself is *UNCOVERING CORRUPT SCIENCE* PSJ (Peet) Schutte,2013-07-17 Modern science or what I call Newtonian science is altogether wrong Nothing can stand still in the Universe and remain a part of the Universe The Universe is the movement thereof Everything in the Universe has to move should it wish to be and everything in the Universe moves and in circles but everything moves There is no mass but only movement and movement is gravity and gravity is time forming space But how does this system work and how does this system form an entire Universe as big as the one we have Read this and see how the Universe is truly stitched together by nature and not by Newton s

fantasy It works exactly as Kepler said it does in the tables Kepler left us to study Space by three forms a circle by two that moves straight by one and that forms the six sided Universe we enjoy as a reality
