older people Global Perspectives on Health Assessments for an Aging Population Ribeiro, Luis Vieira, Ribeiro, Anabela Magalhães, 2023-04-03 Today's society recognizes that the last decades of an individual's life are usually those in which health tends to deteriorate and chronic pathologies increase. Action at this level is verified through the increased concern of government officials with the elderly population motivated by the socio-economic impact of costs associated with the provision of healthcare in this group. Global Perspectives on Health Assessments for an Aging Population provides relevant theoretical frameworks and the latest empirical research findings in the area of health assessments for an aging population. Covering topics such as ambulatory wellbeing, gerontology and neuropsychological assessment, this premier reference source is a valuable resource for gerontological healthcare professionals, gerontological social workers, psychologists, students and educators of higher education, researchers and academicians.

Patient Safety in Rehabilitation Medicine, An Issue of Physical Medicine and Rehabilitation Clinics Adrian Cristian, 2012-05-28 As the number of individuals undergoing rehabilitation medicine in a variety of rehabilitation settings increases, more and more patient safety concerns are being raised. Regulatory and accreditation organizations are scrutinizing the safety of patients in both hospital and rehabilitation settings, and the general public and payors are demanding that patient safety is at the top of the agenda for institutions providing care. As leaders in the practice of rehabilitation medicine, physiatrists need to be educated on this important topic. The goal of this issue is to provide the reader with a foundation on the topic of patient safety as it applies to the practice of rehabilitation medicine, as well as a set of tools that can be used to improve the safety of rehabilitation patients.

Innovations in Older Adult Care and Health Service Management: A Focus on China Madhan Balasubramanian, Angie Shafei, Zhanming Liang, 2024-06-19 Population aging is a consistent global demographic trend. The growth in both the size and proportion of older adults has threatened the sustainability of health systems in meeting healthcare needs of the population. Countries in the Asia Pacific Region may face even more complex health system challenges due to the diversity in culture, management and leadership styles, composition of health service provision, investment in research infrastructure and innovation, adaptation, data availability and gaps in information technology.
