

The falsificationist challenge to religious belief

- Philosophers of religion like Flew replaced the positivistic *verification* principle of meaning with a *falsification* principle of meaning
 - A statement is cognitively meaningful if and only if it is analytic or empirically falsifiable (i.e, it is possible to say upfront in which situations it is falsified)
- This principle leads to the *falsificationist challenge* to religious belief
 1. A statement has cognitive meaning if and only if it is analytic or empirically falsifiable (the falsification principle of meaning)
 2. Religious statements are neither analytic nor empirically falsifiable
 3. Therefore, religious statements are cognitively meaningless

Systematic Theology as a Rationally Justified Public Discourse about God Michael Agerbo Mørch,2023-01-23 For centuries it has been discussed whether systematic theology is a scientific discipline But it is not obvious what is meant by either systematic theology or scientific discipline Michael Agerbo Mørch presents an understanding of systematic theology as a tripartite discipline and science as a rationally justified public discourse about a given topic Systematic theology is shown to meet the most generally accepted criteria for scientific work since its theories can be tested and even falsified in an intersubjective setting This can be done by the most proper tool we have for assessing and comparing scientific theories which is coherence theory Therefore even though systematic theology is a distinct and normative discipline it is not compromising for its theories because it can present its theses in a transparent way that can be checked and criticized by peers and compared to relevant alternatives As such the book shows that systematic theology is a scientifically strong discourse that meets accepted criteria to the same degree as other disciplines

Liberalism Versus Postliberalism John Allan Knight,2013 The book provides an original analysis of the central philosophical differences between liberal and postliberal theology Knight argues that important developments in philosophy of language reveal serious problems with the central methodological commitments of liberalism and postliberalism and suggest ways in which the divide can be bridged

A Unified Treatment of Moore's Paradox John N. Williams,2023-03-24 A Unified Treatment of Moore's Paradox is the culmination of a decades long engagement with Moore's paradox by the world's leading authority on the subject the late John Williams The book offers a comprehensive account of Moore's paradox in thought and speech both in its commissive and omissive forms Williams argues that Moorean absurdity comes in degrees and shows that contrary to one tradition in the literature on Moore's Paradox we cannot explain Moorean absurdity in speech in terms of Moorean absurdity in thought but must account for each form of absurdity in its own terms Williams also explores the extent to which Moore's paradox may arise for attitudes other than belief such as desire Written with Williams trademark clarity and wit the book is packed with arguments bearing on a wide range of topics in epistemology the philosophy of language and the philosophy of mind

Models of God and Alternative Ultimate Realities Jeanine Diller,Asa Kasher,2013-06-13 The envisioned volume is a collection of recent essays about the philosophical exploration critique and comparison of a the major philosophical models of God gods and other ultimate realities implicit in the world's philosophical schools and religions and of b the ideas of such models and doing such modeling per se The aim is to identify exactly what a model of ultimate reality is create a comprehensive and accessible collection of extant models and determine how best philosophically to model ultimate reality if possible and desirable

Nietzsche's Postmoralism Richard Schacht, 2001 This important collection of essays originally published in 2000 the year of the centenary of Nietzsche's death offers a full assessment of his contribution to philosophy and represents a helpful guide to the current landscape of Nietzsche studies In *Beyond Good and Evil* Nietzsche calls on new philosophers to carry on the process of reinterpretation and revaluation that will constitute the philosophy of the future This reconsideration will be pursued in what Nietzsche describes as a postmoral manner The nine prominent interpreters in this collection examine different aspects of this postmoral agenda and show how Nietzsche's efforts to reorient philosophical thinking are of great importance to the way we understand ourselves our values our concepts

of virtue and our morality today **Globalization - The Juggernaut of the 21st Century** Professor Jan-Erik Lane, 2013-03-28 While some people debate whether globalization really exists it proceeds apace affecting all societies It presents us with unknown challenges and as governments start to discuss what to do about these challenges it is becoming obvious that globalization is not manageable With globalization the juggernaut of the 21st century all countries of the world become interdependent in relation to the coming energy crisis climate change the sharper cleavages between rich and poor countries and people and the emergence of a multicultural social structure This interesting and erudite book adopts a distinctive approach to the multiple dimensions of the globalization debate The impressive coverage of philosophical thought including Popper Weber Habermas Lipset and Hobbes makes a valuable contribution to the debates on globalization

Rationality in Science, Religion, and Everyday Life Mikael Stenmark, 2016-09-15 Mikael Stenmark examines four models of rationality and argues for a discussion of rationality that takes into account the function and aim of such human practices as science and religion **Faith, Reason, and Beyond Reason** Mark J. Boone, 2024-07-16 The relationship between faith and reason is multifaceted Faith transcends reason in that it is more than reason alone can contain or fully guarantee yet it is neither unreasonable nor something to which reason is irrelevant and reason says some pretty fine things about it This volume updates nine previously published articles on faith and reason by a Christian philosopher who has been studying these matters for two decades alongside one new essay and a philosophical dialogue These articles explain and integrate key ideas on faith and reason including Alvin Plantinga's account of how Christian belief can be knowledge even without evidence defenses of faith from Augustine and William James accounts of empirical evidence for faith from different world religions the distinction between faith and sight in the New Testament the structure of the evidence for the authority of the Bible the idea that faith transcends reason because some articles of faith are beyond human comprehension even if we have evidence that they are true and the nature of faith as a total commitment beyond what the evidence alone can guarantee

Essays on Religion and Education Richard Mervyn Hare, 1998 R M Hare one of the most widely discussed of today's moral philosophers here presents his most important essays on religion and education in which he brings together the theoretical and the practical The book opens with an exposition of his ideas on the meaning of religious language There follow several essays theoretical and practical on the relations between religion and morality which have deep implications for moral education The central question addressed in the rest of the volume is how children can be educated to think for themselves freely but rationally about moral questions and Professor Hare examines the effects on society of failure to achieve this He argues that those who want to dispense with morality are in effect resigning from a vital educational task Attitudes to euthanasia and to equality of educational opportunity are taken as examples of how our thinking can go wrong The former Professor of Moral Philosophy at Oxford has brought together a collection of papers exploring with his customary clarity of thought and elegance of expression the light which moral philosophy can shed on certain religious and educational

questions it is illuminating to follow an eminent philosopher at work on matters of great practical importance and in prodding theologians to think more clearly Church Times a cogent and compelling vision enunciated with all the intelligence elegance and vigour for which Hare is justly renowned Times Literary Supplement All the essays are a delight to read clear succinct precisely expressed and devoid of technical jargon The collection will be welcomed by philosophers of education Theology an important resource for persons interested in clarifying the language of moral education in a religiously pluralist society Religious Studies Review admirably clear and straightforward IJournal of the American Academy of Religion It is a pleasure to receive for review a book by someone who is palpably expert in a particular discipline and able to deploy that discipline on topics which have a demonstrably practical relevance to education Most books satisfy neither criterion this one satisfies both Add Hare's well known clarity of style and presentation and we have something really worth reading Oxford Review of Education

Creation, Evolution and Meaning Robin Attfield, 2018-07-17 This book presents the case for belief in both creation and evolution at the same time as rejecting creationism Issues of meaning supply the context of inquiry the book defends the meaningfulness of language about God and also relates belief in both creation and evolution to the meaning of life Meaning it claims can be found in consciously adopting the role of stewards of the planetary biosphere and thus of the fruits of creation Distinctive features include a sustained case for a realist understanding of language about God a contemporary defence of some of the arguments for belief in God and in creation a sifting of different versions of Darwinism and their implications for religious belief a Darwinian account of the relation of predation and other apparent evils to creation a new presentation of the argument from the world's value to the purposiveness of evolution and discussions of whether or not meaning itself evolves and of religious and secular bases for belief in stewardship

Reading Nietzsche through the Ancients Matthew Meyer, 2014-07-28 Nietzsche's work was shaped by his engagement with ancient Greek philosophy Matthew Meyer analyzes Nietzsche's concepts of becoming and perspectivism and his alleged rejection of the principle of non contradiction and he traces these views back to the Heraclitean Protagorean position that Plato and Aristotle critically analyze in the Theaetetus and Metaphysica IV respectively At the center of this Heraclitean Protagorean position is a relational ontology in which everything exists and is what it is only in relation to something else Meyer argues that this relational ontology is not only theoretically foundational for Nietzsche's philosophical project in that it is the common element in Nietzsche's views on becoming perspectivism and the principle of non contradiction but also textually foundational in that Nietzsche implicitly commits himself to such an ontology in raising the question of opposites at the beginning of both Human All Too Human and Beyond Good and Evil
