Faltering Economy:

Faltering Economy John Bellamy Foster, 1984 The essays in this volume by veteran economists as well as younger scholars are part of a radical attempt to grapple with the problems of advanced capitalist development without discarding the real theoretical breakthroughs made by Keynes The contributors argue that Keynes was correct in pointing to the economic contradictions stemming from unemployment income inequality and speculative finance but failed to consider the class composition of social output the macroeconomic effects of the modern firm and the atrophy of investment under conditions of capitalist maturity They thus seek to uncover the sources of stagnation under monopoly capitalism by building on the work of three of the great economists of modern times Marx Keynes and Kalecki *America's Failing Economy and the Rise of Ronald Reagan* Eric R. Crouse, 2018-02-13 This book examines one of the most important economic outcomes in American history the breakdown of the Keynesian Revolution Drawing on economic literature the memoirs of economists and politicians and the popular press Eric Crouse examines how economic decline in the 1970s precipitated a political revolution Keynesian thought flourished through the presidencies of Lyndon B Johnson Richard Nixon and Gerald Ford until stagflation devastated American workers and Jimmy Carter's economic policies faltered setting the stage for the 1980 presidential campaign Tracking years of shifting public opinion and colorful debate between free market and Keynesian economists this book illuminates a neglected era of American economic history and shows how Ronald Reagan harnessed a vision of small government and personal freedom that transformed the American political landscape **Economy's Tension** Stephen Gudeman, 2008 Using a cross cultural model the author explores mystifications of economic life and explains how capital and derivatives can control an economy The book offers a different conception of economic welfare development and freedom

Worlds Apart Patrick Dias, Aviva Freedman, Peter Medway, Anthony Par, 2013-06-17 *Worlds Apart Acting and Writing in Academic and Workplace Contexts* offers a unique examination of writing as it is applied and used in academic and workplace settings Based on a 7 year multi site comparative study of writing in different university courses and matched workplaces this volume presents new perspectives on how writing functions within the activities of various disciplines law and public administration courses and government institutions management courses and financial institutions social work courses and social work agencies and architecture courses and architecture practice Using detailed ethnography the authors make comparisons between the two types of settings through an understanding of how writing is operative within the particularities of these settings Although the research was initially established to further understanding of the relationships between writing in academic and workplace settings it has evolved to examining writing as it is embedded in both types of settings where social relationships available tools and historical cultural temporal and physical location are all implicated in complex ways in the decisions people make as writers Readers of this volume will discover that the uniqueness of each setting makes salient different aspects of writers and writing resulting in complex and potentially unsettling implications for

writing theory and the teaching of writing **The Theory of Monopoly Capitalism** John Bellamy Foster, 2014-04 Absent any epoch making innovations like the automobile or vast new increases in military spending the result was a general trend toward economic stagnation a condition that persists and is increasingly apparent to this day Their analysis was also extended to issues of imperialism or accumulation on a world scale overlapping with the path breaking work of Samir Amin in particular John Bellamy Foster is a leading exponent of this theoretical perspective today continuing in the tradition of Baran and Sweezy's Monopoly Capital This new edition of his essential work The Theory of Monopoly Capitalism is a clear and accessible explication of this outlook brought up to the present and incorporating an analysis of recently discovered lost chapters from Monopoly Capital and correspondence between Baran and Sweezy **Economics and Power** Giulio Palermo, 2016-06-03 In the economic debate power is defined and studied mainly as an interpersonal relation occurring out of perfect competition This is a consequence of the combination of methodological individualism and the assumption of competition as a natural and everlasting coordinating mechanism operating without any sort of coercion This methodology however is not adequate to analyze the forms of social coercion that characterize capitalism Economics and Power criticizes the main theories of power developed in economic literature analyzing ultraliberal contractualism to radical political economics and ultimately suggesting a Marxist conception of power and coercion in capitalism Palermo's ontological argument is rooted in the philosophy of critical realism This unique volume presents his main finding as being that the essential coercive mechanism of capitalism is competition Capitalist power is not caused by a lack of competition but by the central role it plays in this mode of production Following this the chapters reconstruct a Marxian conception of power where it is analyzed as a social relation and argues that perfect competition does in fact exist under the disguise of capitalist power This book criticizes the construct of power and the underlying ideas surrounding perfect competition This book is of interest to those who study political economy as well as economic theory and philosophy **Addressing the Need for an Economic Stimulus Package** United States. Congress. Senate. Committee on Finance, 2001 **The History of Texas**, 2014-01-28 The History of Texas is fully revised and updated in this fifth edition to reflect the latest scholarship in its coverage of Texas history from the pre Columbian era to the present Fully revised to reflect the most recent scholarly findings Offers extensive coverage of twentieth century Texas history Includes an overview of Texas history up to the Election of 2012 Provides online resources for students and instructors including a test bank maps presentation slides and more **When Ads Work** John Philip Jones, 2007 The accepted wisdom in advertising is that ad campaigns are good for building brand recognition and good will but not for immediate sales impact When Ads Work argues the opposite that well planned and well executed advertising campaigns can and should have an immediate impact on sales Featuring numerous examples from recent ad campaigns the new edition of this popular book is a model for any successful advertising research program With a device he calls STAS Short Term Advertising Strength a measure of the immediate effect of advertising on

sales the author demonstrates that *Transitions in Work and Learning* Board on Testing and Assessment, Division of Behavioral and Social Sciences and Education, National Research Council, 1997-09-19 The dramatic shift in the American labor market away from manufacturing and the growing gap in earnings between high school and college graduates have contributed to a sense of alarm about the capacity of the nation's schools to supply adequately skilled graduates to the work force The role that schools can or should play in preparing people to enter the world of work is hotly debated In an effort to nurture the important and ongoing national dialogue on these issues the Board on Testing and Assessment asked researchers and policymakers to engage in an interdisciplinary review and discussion of available data and implications for assessment policy *Transitions in Work and Learning* considers the role of assessment in facilitating improved labor market transitions and life long learning of American workers It addresses the apparent mismatch between skill requirements of high performance workplaces and skills acquired by students in school the validity of existing assessment technologies to determine skills and competencies of persons entering various occupations and ethical and legal issues in the implementation of new testing and certification programs The book also examines the role of assessment in determining needed skills developing ongoing education and training and providing information to employers prospective workers and schools

Brennan, David Kristjanson-Gural, Catherine P. Mulder, Erik K. Olsen, 2017-03-16 Most developed economies are characterized by high levels of inequality and an inability to provide stability or opportunity for many of their citizens Mainstream economics has proven to be of little assistance in addressing these systemic failures and this has led both scholars and students to seek alternatives One such alternative is provided by Marxian economics In recent decades the field has seen tremendous theoretical development and Marxian perspectives have begun to appear in public discourse in unprecedented ways This handbook contains thirty seven original essays from a wide range of leading international scholars recognized for their expertise in different areas of Marxian economics Its scope is broad ranging from contributions on familiar Marxist concepts such as value theory the labor process accumulation crisis and socialism to others not always associated with the Marxian canon like feminism ecology international migration and epistemology This breadth of coverage reflects the development of Marxian economic and social theory and encompasses both the history and the frontiers of current scholarship This handbook provides an extensive statement of the current shape and future direction of Marxian economics The *Routledge Handbook of Marxian Economics* is an invaluable resource for

students researchers and policy makers seeking guidance in this field It is designed to serve both as a reference work and as a supplementary text for classroom use with applications for courses in economics sociology political science management anthropology development studies philosophy and history
