Families In Troubled Times Adapting To Change In Rural America:

Families in Troubled Times Glen Holl Elder, The turbulent decade of the 1980s began with financial calamity in several sectors of the United States economy from automaking to agriculture The rural Midwest experienced its worst economic decline since the Depression years Thousands of farmers lost their operations and the small rural communities that serve agriculture often changed from prosperous business centers to struggling villages with many empty buildings and boarded up storefronts along their main streets Families in Troubled Times examines the plight of several hundred rural families who have lived through these difficult years The participants in the Iowa Youth and Families Project the subjects of the present study include farmers people from small towns and those who lost farms and other businesses as a result of the farm crisis The book traces the influence of economic hardship on the emotions behavior and relationships of parents children siblings husbands and wives The results of the study show that although economic stress has a powerful adverse effect on individuals and families countervailing social influence can help to blunt these negative processes and to assist in the repair of the personal and interpersonal damage they produce *Families in Troubled Times* Rand Conger, 2020-11-25 This book documents the experiences of rural Iowa families who lived through the farm crisis years of the 1980s in a fashion that might help families of the future cope more successfully with economic reversals The documentation could be used to fashion more effective social policies **Families in Troubled Times** Rand D. Conger, Glen H. Elder, 1994 **Self-Efficacy in**

Changing Societies Albert Bandura, 1997-05-13 The volume addresses important issues of human adaptation and change

Economic Restructuring and Family Well-Being in Rural America Kristin E. Smith, Ann R. Tickamyer, 2011-01-01 Rural areas have been hit hard by economic restructuring Traditionally male jobs with good pay and benefits such as in manufacturing have declined dramatically only to be replaced with low paying service oriented jobs jobs that do not offer benefits or wages sufficient to raise a family Concurrently rural areas have experienced changes in family life namely an increase in women s labor force participation a decline in married couple families and a rise in cohabitation and single parent families How have rural families coped with these social and economic changes Economic Restructuring and Family Well-Being in Rural America documents the intertwined changes in employment and family and explores the outcomes for family well being in rural America Here a multidisciplinary group of scholars examines the impacts of economic restructuring on rural Americans and provides policy recommendations for addressing the challenges they face In addition to the editors the contributors are Cynthia D Anderson Guangqing Chi Alisha Coleman Jensen Katherine Jewsbury Conger Nicole D Forry Deborah Roempke Graefe Steven Michael Grice Andrew Hahn Debra Henderson Eric B Jensen Leif Jensen Marlene Lee Daniel T Lichter Elaine McCrate Diane K McLaughlin Margaret K Nelson Domenico Parisi Liliokanaio Peaslee Jed Pressgrove Jennifer Sherman Anastasia Snyder Susan K Walker and Chih Yuan Weng Global Aging and Challenges to Families Vern Bengtson, 2018-01-16 The recent explosion in population ageing across the globe represents one of the most remarkable

demographic changes in human history Population ageing will profoundly affect families Who will care for the growing numbers of tomorrows very old members of societies Will it be state governments The aged themselves Their families The purpose of this book is to examine consequences of global aging for families and intergenerational support and for nations as they plan for the future

Global Aging and Its Challenge to Families Vern L. Bengtson, Ariela Lowenstein, The recent explosion in population aging across the globe represents one of the most remarkable demographic changes in human history There is much concern about population aging and its consequences for nations for governments and for individuals It has often been noted that population aging will inevitably affect the economic stability of most countries and the policies of most state governments What is less obvious but equally important is that population aging will profoundly affect families Who will care for the growing numbers of tomorrow s very old members of societies Will it be state governments The aged themselves Their families The purpose of this volume is to examine consequences of global aging for families and intergenerational support and for nations as they plan for the future Four remarkable social changes during the past fifty years are highlighted

- 1 Extension of the life course A generation has been added to the average span of life over the past century
- 2 Changes in the age structures of nations Most nations today have many more elders and many fewer children than fifty years ago
- 3 Changes in family structures and relationships Some of these differences are the result of trends in family structure notably higher divorce rates and the higher incidence of childbearing to single parents
- 4 Changes in governmental responsibilities In the last decade governmental responsibility appears to have slowed or reversed as states reduce welfare expenditures How will families respond to twenty first century problems associated with population aging Will families indeed be important in the twenty first century or will kinship and the obligations across generations become increasingly irrelevant replaced by personal communities This volume goes a considerable distance to answer these critical issues for the twenty first century

Vern L Bengtson is an AARP University Chair in Gerontology and Professor of Sociology University of Southern California Ariela Lowenstein is associate professor and head Department of Aging Studies University of Haifa Israel

From Generation to Generation National Research Council and Institute of Medicine, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Committee on the Health and Adjustment of Immigrant Children and Families, 1998-10-10 Immigrant children and youth are the fastest growing segment of the U S population and so their prospects bear heavily on the well being of the country However relevant public policy is shaped less by informed discussion than by politicized contention over welfare reform and immigration limits From Generation to Generation explores what we know about the development of white black Hispanic and Asian children and youth from numerous countries of origin Describing the status of immigrant children and youth as severely understudied the committee both draws on and supplements existing research to characterize the current status and outlook of immigrant children The book discusses the many factors family size fluency in English parent employment acculturation delivery of health and social

services and public policies that shape the outlook for the lives of these children and youth The committee makes recommendations for improved research and data collection designed to advance knowledge about these children and as a result their visibility in current policy debates

How Families Still Matter Vern L. Bengtson, Timothy J. Biblarz, Robert E. L. Roberts, 2002-10-17 *How Families Still Matter* casts doubt on the conventional wisdom about family decline during the last decades of the twentieth century The authors draw from the longest running longitudinal study of families in the world the

Longitudinal Study of Generations conducted at the University of Southern California to discover whether parents are really less critical in shaping the life choices and achievements of their children than they were a generation ago They compare the influence of parents on self confidence values and levels of achievement on the Baby Boomer generation with that of Baby Boomer parents on their own Generation X children The findings may surprise many readers Generation X youth showed higher levels of education career attainments and self esteem than their parents as youth and similar values were found across generations They indicate the resilience of family bonds across generations even against the backdrop of massive social and family changes since the 1960s Resources in Education ,1997 *Kinship and Cohort in an Aging Society* Merrill Silverstein,Roseann Giarrusso,2013-09-01 According to family sociologist Vern Bengtson generations within families are important sources of influence change and development Kinship and Cohort in an Aging Society brings together scholars whose common link is their intellectual intersection with the work of Vern Bengtson an esteemed family sociologist whose accomplishments include foundational theoretical contributions to the study of families and intergenerational relations as well as the development of the widely used Longitudinal Study of Generations data set The study began in 1971 and is the basis for Bengtson s highly influential concept and measurement model the intergenerational solidarity conflict paradigm This book serves as an excellent compendium of original research that examines how Bengtson s solidarity model a theory that informs nearly all intergenerational and gerontology sociology work performed today continues to be relevant to scholars and practitioners Written by internationally recognized scholars the book s fifteen chapters are mapped to five major thematic areas to which Bengtson s research contributed family connections grandparents in a changing demographic landscape generations and cohorts micro macro dialectics religion and families in the context of continuity change and conflict and global cross national and cross ethnic concerns Key strengths of the book include the diversity of foci and data sources and the strong attention given to global and international issues Kinship and Cohort in an Aging Society will appeal to scholars working in sociology psychology gerontology family studies and social work *Nesne 19* Kolektif,2021-04-30 Nesne Psikoloji Dergisi 19 Men in Families Alan Booth,Ann C. Crouter,1998-01-01 Recently the roles of fathers and husbands in families have been recognized as important issues They appear in legislation aimed at deadbeat dads social movements including the Million Man March and Promise Keepers in the development of advocacy groups and in think tanks Therefore contemporary research on men in family relationships has very mixed results Some studies show that fathers have small effects on child development and in preventing antisocial behavior whereas others suggest no effects Other research claims that the primary importance of men in families is in their role as providers Although some studies state that the husbands and fathers most vital work occurs in new families others indicate that it is when their offspring reach adolescence Confusing the issue even further labor market trends predict that men s family roles may diminish Based on the presentations and discussions from a recent national symposium on men in families held at The Pennsylvania State University

this book addresses these issues This is the only book that deals with men s involvement in families in a comprehensive way Although several books focus on fathers alone or on a broader family perspective this is the first book that deals with a variety of family roles on an interdisciplinary basis Although most of the writers are psychologists or sociologists there are key figures in history and anthropology who also make important contributions As such this volume will be useful to scholars students policy specialists and family program administrators

Parenting and the Child's World John G. Borkowski, Sharon Landesma Ramey, Marie Bristol-Power, 2001-10-01 Stimulated by the publication of *The Nurture Assumption* by Judith Rich Harris *Parenting and the Child s World* was conceived around the notion that there are multiple sources of influence on children s development including parenting behavior family resources genetic and other biological factors as well as social influences from peers teachers and the community at large The text s 39 contributors search for when where and how parenting matters and the major antecedents and moderators of effective parenting The chapters focus on the major conceptual issues and empirical approaches that underlie our understanding of the importance of parenting for child development in academic socio emotional and risk taking domains Additional goals are to show how culture and parenting are interwoven to chart future research directions and to help parents and professionals understand the implications of major research findings

Nowhere to Grow Les B. Whitbeck, Danny R. Hoyt, Les B Whitbeck and Dan R Hoyt begin their report on street children in the Midwest with the statement If you live in or have visited even a medium sized city recently you have seen runaway and homeless young people They congregate in certain downtown areas and hang out in malls during inclement weather Mostly they look like the other kids The difference is that they won t be going home tonight This book draws on a study of over six hundred runaway and homeless adolescents and over two hundred of their caretakers from cities in four Midwestern states It focuses on the family histories of these young people and on the developmental impact of early independence Street social networks subsistence strategies sexuality and street victimization are all considered as well as their effect on adolescent behaviors and emotional health Relying on interviews and data from survey research and working in partnership with street outreach agencies Whitbeck and Hoyt lead the reader through the various risk factors associated with precocious independence beginning in the family and extending to external environments and behaviors *Nowhere to Grow* is an emotional account of the cumulative consequences for young people with few good options at the outset and even fewer once they are on their own

The Science of Family Systems Theory Jacob Priest, 2021-03-31 This accessible text examines how the science of autonomy and adaptation informs all family therapy approaches and discusses how clinicians can use this science to improve their practice Uniquely focussing on how to integrate science as well as theory into clinical practice the book provides an overview of science from multiple domains and ties it to family systems theory through the key framework of autonomy and adaptation Drawing on research from genetics physiology emotion regulation attachment and triangulation chapters demonstrate how a comprehensive science informed theory of family systems can be applied to a

range of problematic family patterns The text also explores self of the therapist work and considers how autonomy and attachment are connected to systems of power privilege and oppression Supported throughout by practical case examples as well as questions for consideration chapter summaries and resource lists to further engage the reader The Science of Family Systems Theory is an essential textbook for marriage and family therapy students as well as mental health professionals working with families
