Psychological Ownership in Family Businesses Fabian

Bernhard, 2011 This book includes three essays covering the ownership perceptions individuals experience in family businesses. It advances current knowledge on the organizational factors antecedent to individuals' psychological ownership as well as the attitudinal and behavioral consequences. Investigating overly strong psychological ownership, the first essay provides insights into the phenomenon of aging family business owner managers who face difficulties in letting go, i.e. passing on leadership to their successors. The second essay offers a study of family business owner managers' leadership styles and their influence on nonfamily employees' psychological ownership of the family business as well as individuals' motivation and performance. Given the special situation of nonfamily members working in family businesses, the third essay examines the effects of employees' and nonfamily managers' justice perceptions on both the ownership experience and commitment to the family business. The works presented in this book built a basis for several publications such as articles in the *Journal of Family Business Strategy* and *Group Organization Management*. Furthermore, they have been presented at various international conferences, have been nominated for a most creative paper award and have contributed to the Academy of Management Best Paper Proceedings. The findings not only constitute valuable additions to current research in management and organizational psychology but can also provide benefit for those interested in family businesses. Managers, owners and consultants working in or for family businesses would likely gain from the practical implications.

Families in Business Kathleen Randerson, Hermann Frank, Clay Dibrell, Esra Memili, 2022-11-28 This book offers a contemporary understanding of families in business and serves as a springboard for ongoing evolution of families, their composition, transformations, and activities. The first chapter in this volume highlights the different approaches to family and concludes that identifying and understanding the entity family in business is the cornerstone to understanding behaviours of family businesses. The concept of family in business as a socially constructed entity allows for not only a broader scope of the concept to include individuals who share a faith, chapter 2, but also multi-generational families and chosen families. Narratives or stories are means for families in business to mark the boundary of the family in business, chapter 3, because not all members of the family are necessarily members of the family in business. Families and their businesses influence each other, chapter 4, and engender the family influence on the firm, familiness, and firm influence of the family enterpriseness. The last two chapters are dedicated to transgenerational family businesses with a focus on learning between generations, chapter 5, highlights the importance of unlearning to learn new knowledge and different ways of conducting business, and the final chapter focuses on what knowledge is actually transferred relative to initial plans. The chapters in this book were originally published as a special issue of Entrepreneurship Regional Development.
