Continuity and Change in the American Family Lynne M. Casper, Suzanne M. Bianchi, 2001-12-20 Continuity and Change in the American Family engages students with issues they see every day in the news providing them with a comprehensive description of the social demography of the American family Understanding ever changing family systems and patterns requires taking the pulse of contemporary family life from time to time This book paints a portrait of family continuity and change in the later half of the 20th century with a focus on data from the 1970's to present The authors explore such topics as the growth in cohabitation changes in childbearing and how these trends affect family life Other topics include the changing lives of single mothers fathers and grandparents and increasing economic disparities among families child care and child well being and combining paid work and family The authors are talented writers who bring considerable professional and scholarly background to bear in illuminating this topic in a thoughtful yet lively presentation

The Psychosocial Interior of the Family Gerald Handel, Gail G. Whitchurch, 1994 This long awaited fourth edition has the same goal as the preceding editions to understand families in terms of the kinds of interaction through which family life is constructed The changes in the family

as an institution have influenced these processes just as they have influenced the ways we understand and write about them. But even in these postmodern circumstances an underlying premise of the volume is that two partners establish a family because they have selected each other as distinctively meaningful to one another. They will affirm, modify, elaborate, or retreat from various aspects of the relationship through interaction over time and in changing circumstances. This volume contains the best available interdisciplinary work on the social psychology of the family. More than half of the selections are new to this edition, which incorporates a variety of theoretical and research perspectives that provide the reader with a range of authoritative and up-to-date sources on the family and interpersonal relations. The newer forms of family organization that have emerged in the more recent literature, specifically single parent families, stepfamilies, and families of gay and lesbian domestic partners, are included. Authors have been drawn from a variety of disciplines including sociology, communication, family studies, human development, psychology, anthropology, and social work.

Family, Law, and Inheritance in America
Yvonne Pitts, 2013-05-20 Yvonne Pitts explores inheritance practices by focusing on nineteenth century testamentary capacity trials in Kentucky in which disinherited family members challenged relatives' wills. These disappointed heirs claimed that their departed relative lacked the capacity required to write a valid will. These inheritance disputes crisscrossed a variety of legal and cultural terrains, including ordinary people's understandings of what constituted insanity and justice, medical experts' attempts to infuse law with science, and the independence claims of women. Pitts uncovers the contradictions in the body of law that explicitly protected free will while simultaneously reinforcing the primacy of blood in mediating claims to inherited property. By anchoring the study in local communities and the texts of elite jurists, Pitts demonstrates that capacity was a term laden with legal meaning and competing communal values about family, race, relations, and rationality. These concepts evolved as Kentucky transitioned from a conflicted border state with slaves to a developing free labor industrializing economy.

Children Around the World
Niels P. Rygaard, Uwe Gielen, Elaine P. Congress, Julia Larock, 2024-03-01 The fourth book in the UN book series Behavioral Science in the Global Arena is entitled Children Around the World: The Future of Our Earth. It continues the focus on issues of major international importance. This book is based on these three principles: 1. Focus on most important pressing issues; 2. It is multidisciplinary with authors who are psychologists, social workers, medical doctors, and NGO leaders; and 3. Chapters are co-authored by well-known experts and new professionals or graduate students. Children were chosen as the focus as over 30% of the people in our world are children. This book looks at major macro trends affecting children as well as interventions that have been used to address problems that children face. Topics that are addressed include the UN Convention on Children, Non-Governmental Organizations (NGOs) that support children, and development issues like pre and postnatal health, family systems, gender roles, and puberty/adolescent issues. Attention is given to major risk factors and challenges such as sex trafficking, child labor, street children, protecting children in congregate care, and violence against children in the home, in institutions, and in the community. This

book closes with a look at the most serious future challenges for children including literacy migration and mental health issues This book is designed for faculty and students as well as professionals who want to learn more about the type and severity of problems affecting children as well as positive interventions that have been used to address these problems

The Mary Lincoln Enigma Frank J. Williams, Michael Burkholder, 2012-07-05. Mary Lincoln is a lightning rod for controversy. Stories reveal widely different interpretations, and it is impossible to write a definitive version of her life that will suit everyone. The thirteen engaging essays in this collection introduce Mary Lincoln's complex nature and show how she is viewed today. The authors' explanations of her personal and private image stem from a variety of backgrounds, and through these lenses—history, theater, graphic arts, and psychiatry—they present their latest research and assessments. Here they reveal the effects of familial culture and society on her life and give a broader assessment of Mary Lincoln as a woman, wife, and mother. Topics include Mary's childhood in Kentucky, the early years of her marriage to Abraham, Mary's love of travel and fashion, the presidential couple's political partnership, and Mary's relationship with her son Robert. The fascinating epilogue meditates on Mary Lincoln's universal appeal and her enigmatic personality, showcasing the dramatic differences in interpretations. With gripping prose and in-depth documentation, this anthology will capture the imagination of all readers. University Press Books for Public and Secondary Schools, 2013 edition.

Handbook of Family Theories Mark A. Fine, Frank D. Fincham, 2013. Organized by content areas rather than by theory, this book helps readers gain greater insight into how key theories have impacted today's family research. Using the 2000 and 2010 decade in review issues of the *Journal of Marriage and Family* as a resource, the book addresses the most important topics impacting family studies research today. The book is organized around the most important domains in the field: parenting and parent-child relationships, romantic relationships, conflict and aggression, structural variation and transitions, demographic variations, and families and extra-familial institutions. Each of the contributors describes how theory has been used to generate new knowledge in the field and suggests future directions for how theory may be used to extend our knowledge base. The book helps readers acquire a working knowledge of the key family science theories, findings, and issues, and understand how researchers make use of these theories in their empirical efforts.

Gender and Migration Anastasia Christou, Eleonore Kofman, 2022-03-07. This open access short reader offers a critical review of the debates on the transformation of migration and gendered mobilities, primarily in Europe, though also engaging in wider theoretical insights. Building on empirical case studies and grounded in an analytical framework that incorporates both men and women, masculinities, sexualities, and wider intersectional insights, this reader provides an accessible overview of conceptual developments and methodological shifts and

their implications for a gendered understanding of migration in the past 30 years It explores different and emerging approaches in major areas such as gendered labour markets across diverse sectors beyond domestic and care work to include skilled sectors of social reproduction the significance of families in migration and transnational families displacement asylum and refugees and the incorporation of gender and sexuality in asylum determination academic critiques and gendered discourses concerning integration often with the focus on Muslim women The reader concludes with considerations of the potential impact of three notable developments on gendered migrations and mobilities Black Lives Matter Brexit and COVID 19 As such it is a valuable resource for students academics policy makers and practitioners **Generative Fathering** Alan J. Hawkins, David C. Dollahite, 1997 Much contemporary scholarship on fathers comes from a deficit model focusing on men's inadequacies as parents This volume goes beyond a deficit model of fatherhood to what the editors term a generative fathering perspective This approach sees the work fathers do for their children in terms of caring for and contributing to the life of the next generation Following a description of generative fathering placing it in contrast to the role inadequacy perspective of fatherhood the contributors elaborate on generative fathering in terms of gender ethnicity and historical perspectives They present research that helps readers to understand generative fathering in challenging life circumstances such as special needs child **The Last Best Place?** Leah Schmalzbauer, 2014-08-27 Southwest Montana is beautiful country evoking mythologies of freedom and escape long associated with the West Partly because of its burgeoning presence in popular culture film and literature including William Kittredge's anthology *The Last Best Place* the scarcely populated region has witnessed an influx of wealthy white migrants over the last few decades But another largely invisible and unstudied type of migration is also present Though Mexican migrants have worked on Montana's ranches and farms since the 1920s increasing numbers of migrant families both documented and undocumented are moving to the area to support its growing construction and service sectors *The Last Best Place* asks us to consider the multiple racial and class related barriers that Mexican migrants must negotiate in the unique context of Montana's rural gentrification These daily life struggles and inter group power dynamics are deftly examined through extensive interviews and ethnography as are the ways gender structures inequalities within migrant families and communities But Leah Schmalzbauer's research extends even farther to highlight the power of place and demonstrate how Montana's geography and rurality intersect with race class gender family illegality and transnationalism to affect migrants well being and aspirations Though the New West is just one among many new destinations it forces us to recognize that the geographic subjectivities and intricacies of these destinations must be taken into account to understand the full complexity of migrant life *Family Life in 20th-Century America* Marilyn Coleman Ph.D., Lawrence H. Ganong, Kelly Warzinik, 2007-04-30 No other century promoted such rapid change in American families than the twentieth century did Through most of the first half of the century families were two parent plus children units but by the 1980s and 1990s divorce was common in half of the homes and many families were single parent or included

step parents step siblings and half siblings The major changes in opinions and even some laws on race gender and sexuality during the 1960s and 1970s brought change to families as well Some families were headed by gay parents lived in communes or other non traditional homes were of mixed race or had adopted children Family life had changed dramatically in less than 50 years The change in the core make up of what was considered a family ushered in new celebrations and holidays ways of cooking eating and entertainment and even daily activities In this detailed look at family life in America Coleman Ganong and Warzinick discuss home and work family ceremonies and celebrations parenting and children divorce and single parent homes gay and lesbian families as well as cooking and meals urban vs suburban homes and ethnic and minority families Reference resources include a timeline sources for further reading photographs and an index Volumes in the Family Life in America series focus on the day to day lives and roles of families throughout history The roles of all family members are defined and information on daily family life the role of the family in society and the ever changing definition of the term family are discussed Discussion of the nuclear family single parent homes foster and adoptive families stepfamilies and gay and lesbian families are included where appropriate Topics such as meal planning homes entertainment and celebrations are discussed along with larger social issues that originate in the home like domestic violence child abuse and neglect and divorce Ideal for students and general readers alike books in this series bring the history of everyday people to life
