Psychology Paola Gremigni, Antonio De Padua Serafim, Giulia Casu, Victor Zaia, 2022-06-15 **Why 9 of 10 Family Businesses Fail at Succession: Learn what the 10 % Make Right. Best Practices from the UK and Germany** Daniel Scheffold, 2014-04 The harsh reality 9 out of 10 of family businesses will never make it to the third generation. This book investigates which factors are critical for the success of a succession. The study of three family businesses in the third generation from Germany and the UK lead to four best practices. From the results, a new model for succession in family businesses was developed. The qualitative study is one of the first that investigates the performance of successions with an international perspective. This book is recommended for family business researchers, family business owners, advisors, and students interested in family business studies.

Family Life in China William R. Jankowiak, Robert L. Moore, 2016-11-28 The family has long been viewed as both a microcosm of the state and a barometer of social change in China. It is no surprise therefore that the dramatic changes experienced by Chinese society over the past century have produced a wide array of new family systems. Where a widely accepted Confucian based ideology once offered a standard framework for family life, current ideas offer no such uniformity. Ties of affection rather than duty have become prominent in determining what individuals feel

they owe to their spouses parents children and others Chinese millennials facing a world of opportunities and at the same time feeling a sense of heavy obligation are reshaping patterns of courtship marriage and filiality in ways that were not foreseen by their parents nor by the authorities of the Chinese state Those whose roots are in the countryside but who have left their homes to seek opportunity and adventure in the city face particular pressures as do the children and elders they have left behind The authors explore this diversity focusing on rural vs urban differences regionalism and ethnic diversity within China Family Life in China presents new perspectives on what the current changes in this institution imply for a rapidly changing society **Tools for Assessing Family Relationships** Marialuisa Gennari, Stephen Edward

Finn, Alessandra Santona, Giancarlo Tamanza, 2025-05-21 Recent evidence from clinical practice and research in the field of Clinical Family Psychology highlights the importance of finding reliable tools and methods for assessing couple and family relationships Expectations from both clinical services and academics are that professionals can collect reliable information on family relationships even if in daily clinical practice this information is underutilized These expectations could be fulfilled by the common use of validated measures tools and methods that guarantee reliable data about family relationships However practitioners infrequently use these kinds of measures tools and methods either because of a lack of knowledge or because the tools are not readily accessible Clear instructions on how to properly assess couple family relationships within daily clinical practice are needed especially since psychologists work in different clinical settings and treat different populations

Gender and Family in East Asia Siumi Maria Tam, Wai Ching Angela Wong, Danning Wang, 2014-02-18 The on going reconfiguration of geo political and economic forces across the globe has created a new institutional and moral environment for East Asian family life and gender dynamics Indeed modernisation in East Asia has brought about increases in women s education levels and participation in the labour force a delay in marriage age lower birth rates and smaller family size And yet despite the process of modernization traditional systems such as Confucianism and patriarchal rules continue to shape gender politics and family relationships in East Asia This book examines gender politics and family culture in East Asia in light of both the overwhelming changes that modernization and globalization have brought to the region and the structural restrictions that women in East Asian societies continue to face in their daily lives Across three sections the contributors to this volume focus on marriage and motherhood religion and family and migration In doing so they reveal how actions and decisions implemented by the state trigger changes in gender and family at the local level the impact of increasing internal and transnational migration on East Asian culture and how religion interweaves with the state in shaping gender dynamics and daily life within the family With case studies from across the region including South Korea Japan mainland China Taiwan and Hong Kong this book will be of great interest to students and scholars of Asian studies gender studies anthropology sociology and social policy FUSION OF CULTURES Governance Strategies in Asian Chinese Family Enterprises Dr. Alex Ng Hou Hong Dato' Dr. Chua Hock Hoo, 2025-08-22 From Malaysia to Singapore Indonesia to Thailand and Taiwan Asian

Chinese family enterprises have been the backbone of the region's private sector. This groundbreaking collection reveals how these businesses have masterfully evolved their governance models to thrive in the modern global economy while preserving their cultural heritage. Through compelling case studies, this work illuminates five distinct approaches: Hybrid models blending traditional stewardship with modern practices; Family management balanced with public company compliance; Agency-based governance maintaining family influence; Western management principles adapted to Asian contexts; Corporate familial stewardship extending beyond blood relations. The featured enterprises demonstrate how to navigate the balance between family legacy and professional management. Implement ESG practices that reflect Asian values while meeting global standards. Create governance structures enabling multi-generational success. Build institutions that combine entrepreneurial spirit with sustainable growth. Whether you are a business owner, advisor, scholar, or policymaker, this volume provides essential insights into governance innovation and cultural adaptation in Asia's dynamic business landscape.

Family Conflicts and Resolution Strategies GE Federation of Psychologists, Language and Its Cultural Nuances. Language is a primary vehicle for communication, yet it is profoundly affected by cultural context. Language not only conveys information but also carries cultural meanings and connotations that may not be immediately obvious to outsiders. Idioms, colloquialisms, and even humor can vary widely across cultures, presenting potential pitfalls for effective communication. Misinterpretation of cultural nuances in language can lead to misunderstandings; for example, a phrase deemed humorous in one culture may be considered offensive in another. Additionally, linguistic relativity, the idea that language shapes thought and perception, reveals how different linguistic structures influence the way individuals construct reality. Cultures with languages that emphasize relational terms may foster different ways of thinking about community and identity than those with languages that prioritize individual characteristics. Understanding these linguistic differences enhances a communicative strategy that respects cultural diversity and fosters meaningful connections.

Separate Social Worlds of Siblings E. Mavis Hetherington, David Reiss, Robert Plomin, 2013-05-13 One of the most notable findings in contemporary behavior genetics is that children growing up in the same family are not very comparable Findings suggest that in order to understand individual differences between siblings it is necessary to examine not only the shared experiences but also the differences in experiences of children growing up in the same family In the past decade a group of investigators has begun to examine the contributions of genetics and both shared and nonshared environment to development As with many new research endeavors this has proven to be a difficult task with much controversy and disagreement not only about the most appropriate models and methods of analysis to be used but also about the interpretation of findings Written by some of the foremost scholars working in the area on nonshared environment the papers in this book present their perspectives concerns strategies and research findings dealing with the impact of nonshared environment on individual differences in the development of siblings This volume will have heuristic value in stimulating researchers to think in new ways about the interactions between heredity shared and nonshared environment and the challenges in identifying their contributions to sibling differences These papers should raise new questions about how to examine the contributions of genetic and environmental factors to development with consideration given to the findings of this study of sibling differences and nonshared environment Further these papers may encourage a growing trend to integrate genetic and environmental perspectives in studies of development
