Older GLBT Family and Community Life Christine Fruhauf, Dan Mahoney, 2019-07-09 It is a well known fact that our population of persons aged 65 and over are growing at a faster rate than any other demographic Older adults are now living longer more complex lives than previous generations Recent census data confirms the emergence of a growing more visible older Gay Lesbian Bisexual and Transgendered GLBT community In spite of the diversity that now exists in older GLBT communities very little is known about their contemporary experiences and healthcare needs What is needed is a more inclusive understanding of older GLBT family and community life As a result this book will educate community professionals about the experiences of older GLBT adults and the issues they face within their families and communities In particular physical and mental health family relationships and individual development are explored in this textbook This multidisciplinary approach to GLBT aging will also benefit undergraduate students graduate

students and academics specializing in anthropology education family studies gerontology health studies human development psychology social work and sociology For that matter anyone currently researching or working with older sexual communities This book was published as a special issue of the Journal of GLBT Family Studies **Handbook of Communication and Aging Research** Jon F. Nussbaum, Justine Coupland, 2004-04-12 This second edition of the Handbook of Communication and Aging Research captures the ever changing and expanding domain of aging research Since it was first recognized that there is more to social aging than demography gerontology has needed a communication perspective Like the first edition this handbook sets out to demonstrate that aging is not only an individual process but an interactive one The study of communication can lead to an understanding of what it means to grow old We may age physiologically and chronologically but our social aging how we behave as social actors toward others and even how we align ourselves with or come to understand the signs of difference or change as we age are phenomena achieved primarily through communication experiences Synthesizing the vast amount of research that has been published on communication and aging in numerous international outlets over the last three decades the book s contributors include scholars from North America and the United Kingdom who are active researchers in the perspectives covered in their particular chapter Many of the chapters work to deny earlier images of aging as involving normative decrement to provide a picture of aging as a process of development involving positive choices and providing new opportunities A recurring theme in many chapters is that of the heterogeneity of the group of people who are variously categorized as older aged elderly or over 65 The contributors review the literature analytically in a way that reveals not only current theoretical and methodological approaches to communication and aging research but also sets the future agenda This handbook will be of great interest to scholars and researchers in gerontology developmental psychology and communication and in this updated edition will continue to play a key role in the study of communication and aging *Older Men s Lives* Edward H. Thompson, 1994-06-07 The first comprehensive exploration on the subject of older men *Older Men s Lives* offers a multidisciplinary portrait of men and their concerns in later life Using both a life course and gendered perspective the contributors to this collection of original articles point out that the image and self image of men are continuously reconstructed over the life cycle They examine older men s position in society and the changes wrought in their status and roles over time Their relationship with their spouses children grandchildren and friends are also explored as are policy implications of a gendered life cycle view of masculinity This volume also discusses faith development in older men masculinity identity from work to retirement older men s sexuality and older men s friendship patterns *Older Men s Lives* will be of interest to professionals and students interested in gender men s studies gerontology and sociology This book begins to remedy the lack of information and provides data and research on aging men The strength of this book is the specificity of its focus By focusing solely on male concerns the book is able to identify issues in the male aging process and discuss them on their own terms rather than simply as a contrast to females Clinical Gerontologist

Communication and Aging Jon F. Nussbaum, Loretta L. Pecchioni, James D. Robinson, Teresa L. Thompson, 2013-05-13 This

text employs a communication perspective to examine the aging process and the ability of individuals to adapt successfully to aging. It continues the groundbreaking work of the first edition emphasizing a life span approach toward understanding the social interaction that occurs during later life. The edition provides a comprehensive update on the existing and emerging research within communication and aging studies and considers such topics as notions of successful aging, positive and negative stereotypes toward older adults, and health communication issues. It raises awareness of the barriers facing elderly people in conversation and the importance such conversations have in elderly people's lives. The impact of nonrelational processes such as hearing loss are considered as they impact relationships with others and affect the ability to age successfully. The book is organized into 14 chapters. Each chapter is written so that the reader is presented with an exhaustive review of the pertinent and recent literature from the social sciences. As in the first edition, when the literature is empirically based, the communicative ramifications are then discussed. Readers of this volume will gain greater understanding of the importance of their communicative relationships and how significant they remain across the life span. Developed for students in communication, psychology, nursing, social gerontology, sociology, and related areas, *Communication and Aging* provides important insights on communication to all who are affected by the aging process. Later-Life Social Support and Service Provision in Diverse and Vulnerable Populations Janet M. Wilmoth, Merril D. Silverstein, 2017-06-26

Later Life Social Support and Service Provision in Diverse and Vulnerable Populations offers current multidisciplinary perspectives on social support and service provision to older Americans. The chapters trace how our understanding of social support among older adults has developed over the past 40 years and explore current gerontological research in the area. They consider how informal care arrangements articulate with formal long term care policies and programs to provide support to the diverse population of older Americans. They also emphasize heterogeneity in the composition of support networks, particularly in relation to gender, sexual orientation, race, ethnicity, and immigrant status. Collectively, the chapters provide insight into the complexity of older adults' social support networks that can be used to improve the services provided to caregivers and care recipients, as well as the policies that promote high quality support to people of all ages who are in need of assistance. **Family Life Education** Carol A. Darling, Dawn Cassidy, 2014-04-23

Contemporary family life educators operate within a wide range of settings and with increasingly varied populations and families. In the third edition of *Family Life Education*, Darling and Cassidy expose readers to the diverse landscape of the field while laying a comprehensive research-based practical foundation for current and future family life educators. The authors, both CFLE certified, consider the Certified Family Life Educator certification requirements of the National Council on Family Relations throughout the text. Their broad overview of the field includes a brief history and discussion of family life education as an established profession. The authors incorporate theory, research, and practice while also providing guidelines for planning, implementing, and evaluating family life education programs. Chapters on sexuality education, relationship and marriage education, and

parenting education highlight some of the more prevalent and visible forms of family life education Comments from international educators and interactive classroom exercises focus on global trends building awareness and appreciation of diversity Discussion questions and activities encourage readers to examine issues and apply what they have learned

Current Societal Concerns about Justice Leo Montada, Melvin J. Lerner, 2013-06-29 What role does justice play in the formation of public opinion and the scholarly debates about social problems Does the perception of injustice force problems to appear on the political agenda Does the perception of an injustice give momentum to social change Or are violations of self interest or threats to one's material welfare the more important factors Or are empathy driven concerns for the needy and the disadvantaged motivations to solve societal problems What is known about the role

justice concerns play in leadership In several chapters of this volume justice concerns and justice motives are viewed in relation to other concerns and motivations welfare self interest altruism It is argued that the consensus of political theorists converges on mutual advantage as the main criterion of acceptable solutions to solving societal problems In economics self interest is considered the driving force and provides the criterion of acceptable solutions Sociological and social psychological exchange theories share these basic assumptions Thus questions are raised and answered concerning how justice and these other important motives appear in the analyses of societal problems and the search for solutions Moreover in addition to the issue of conflicting motives self interest altruism justice it is commonly recognized that the definition of what is just and what is unjust is open to question In public as well as in scientific dialogues diverging views about justice have to be integrated or decided upon

Parenting Beliefs, Behaviors, and Parent-Child Relations Kenneth H. Rubin, Ock Boon Chung, 2013-09-05 The purpose of this book is to present a rather simple argument Parents thoughts about childrearing and the ways in which they interact with children to achieve particular parenting or developmental goals are culturally determined Within any culture children are shaped by the physical and social settings within which they live culturally regulated customs and childrearing practices and culturally based belief systems The psychological meaning attributed to any given social behavior is in large part a function of the ecological niche within which it is produced Clearly it is the case that there are some cultural universals All parents want their children to be healthy and to feel secure However healthy and unhealthy at least in the psychological sense of the term can have different meanings from culture to culture

Morman, 2006 Widening the Family Circle New Research on Family Communication bridges the significant gap in family communication literature by providing a thorough examination of lesser studied family relationships such as those involving grandparents in laws cousins stepfamilies and adoptive parents In this engaging text editors Kory Floyd and Mark T Morman bring together a diverse collection of empirical studies theoretic essays and critical reviews of literature on communication to constitute a stronger more complete understanding of communication within the family
