The Psychosocial Interior of the Family Gerald Handel, Gail G. Whitchurch, 1994 This long awaited fourth edition has the same goal as the preceding editions to understand families in terms of the kinds of interaction through which family life is constructed The changes in the family as an institution have influenced these processes just as they have influenced the ways we understand and write about them But even in these postmodern circumstances an underlying premise of the volume is that two partners establish a family because they have selected each other as distinctively meaningful to one another They will affirm modify elaborate or retreat from various aspects of the relationship through interaction over time and in changing circumstances This volume contains the best available interdisciplinary work on the social psychology of the family More than half of the selections are new to this edition which incorporates a variety of theoretical and research perspectives that provide the reader with a range of authoritative and up to date sources on the family and interpersonal relations The newer forms of family organization that have emerged in the more recent literature specifically single parent families stepfamilies and families of gay and lesbian domestic partners are included Authors have been drawn from a variety of disciplines including sociology communication family studies human development psychology anthropology and social work

Disturbing the Nest David Popenoe, 1988 Disturbing the Nest assesses the future of the family as an institution through an historical and comparative analysis of the nature causes and social implications of family change in advanced western societies such as the United States New Zealand and Switzerland by focusing on the one society in which family decline is found to be the greatest Sweden The founding of the modern Swedish welfare state was based in large part on the belief that it was necessary for the state to intervene in society in order to improve the situation of the family Of great concern was the low birthrate which was seen as a threat to the very survival of Swedes as a national population group The Social Democrats pioneered welfare measures that aimed to strengthen the family to alleviate its worst trials and tribulations and to make possible harmonious living With the Social Democrats remaining in power continuously until 1976 a period of almost forty five years Sweden went on to implement governmental family policies that are among the most comprehensive and expensive in the world In view of this major policy goal of family improvement the actual situation of the Swedish family today presents a genuine irony some have claimed that Swedish welfare state policies have had consequences that are the opposite of those originally intended Comparing contemporary Swedish family patterns with those of other advanced nations

one finds a very high family dissolution rate probably the highest in the Western world and a high percentage of single parent female headed families Even marriage seems to have fallen increasingly out of favor with Sweden having the lowest marriage rate and latest age of first marriage and the highest rate of children born out of wedlock The early pronatalist aspirations of the Swedish government have been spectacularly unsuccessful as Sweden continues to have one of the world's lowest birthrates and smallest average family sizes

What's in a Relative Joan Bestard-Camps, 2020-12-17 In this groundbreaking study based on ethnographic research in Formentera in the Balearic Islands the author demonstrates that European kinship can become central to anthropological explanation once it is understood from a symbolic and cultural perspective This book is an outstanding example of ethnographic analysis which is sensitive to the findings of demographic and historical research

Family Life and Social Control John J. Rodger, 1996-05-01 State intervention in family life is an important and problematic political and social issue and one which is surrounded by debates of a highly ideological nature The central theme of this valuable book is that of family life as an object of both social policy interest and welfare intervention The author applies a sociological perspective on social control to a range of issues exciting public and political debate amongst them marriage conciliation community care lone parenthood and underclass status and child abuse

Swiss family, society and youth culture Casparis, 2024-02-26 Monographs and Theoretical Studies in Sociology and Anthropology in Honour of Nels Anderson was published between 1972 and 1989 Nels Anderson was a pioneer in the study of the homeless In the early 1920s Anderson combined his own experience on the bummers with his keen sociological insight to give voice to a largely ignored underclass He remains an extraordinary and underrated figure in the history of American sociology On Hobos and Homelessness includes Anderson's rich and vibrant ethnographic work of a world of homeless men The series was integrated in International Studies in Sociology and Social Anthropology in 1990

The (Un)Making of the Modern Family Daniel Dagenais, 2009-05-01 The family institution is undergoing a radical transformation The modern meanings of kinship marriage parenthood gender and sexuality are now being questioned and debates on same sex marriages and parenthood or on divorce and blended families are reflective of these challenges The Un Making of the Modern Family is neither an indictment of the new family nor a rallying cry It is a classical exercise of family sociology that draws upon a range of disciplines history anthropology psychology and demography to provide an interpretive model for understanding contemporary changes in the family It explores traditional family forms in order to identify changes that gave birth to the ideal type of the modern family and it discusses how the modern family's constituent elements the family as institution conjugal and parent child relationships and gender and sexuality relate to modernity's central feature the concept of the individual By reconstructing an archetype of the modern family this book explains why individuals have experienced its deconstruction as a profound identity crisis It will appeal to anyone concerned with the future of the post modern family and society Published originally by Les Presses de l'Universit  Laval as *La fin de la famille moderne* this book was awarded the 2000 1 Prix Jean Charles

Harriet Townsend, 1926 **Changing Patterns of European Family Life** Katja Boh, Maren Bak, Cristine Clason, Maja
Pankratova, Jens Qvortrup, Giovanni B. Sgritta, Kari Waerness, 2023-08-09 Originally published in 1989 this cross national
study investigates the role and pattern of family life in fourteen countries in contemporary Europe Providing a wealth of
information on European families it is a key source for anyone wishing to understand the changes in the family at that time
The contributors argue that far from withering away the family remained a very important social unit which continued to
have considerable influence on other social institutions such as the state and the labour market The central theme is the
interrelation between changes in production and working life on one hand and changes in family life and reproduction on the
other The contributors focus on the pressures and contradictions produced by the division of functions between family and
work and on problems which have arisen as a consequence of the sometimes incompatible and even conflicting demands of
the two institutions They show that the evolution of the nuclear family model in Europe had led to a great diversity of family
patterns and conclude that the family in modern European societies still had a contribution to make which no other
institution could provide
