**Family and Fertility** William Thomas Liu, 1967 *The Family in Transition*, 1971 Impact of Family Planning Programs on Fertility Phillips Cutright, Frederick S. Jaffe, 1977 **Society and Family Strategy** Mark J. Stern, 1987-07-01 Using one of the largest quantitative data bases ever compiled on a single representative community Stern explains and substantiates the reasons for the decline of the fertility rate during the nineteenth and early twentieth centuries He integrates demographic and social history to determine the implications of this aspect of the modernization of America Society and Family Strategy describes the impact of capitalism and changing class and ethnic structure on family economy life cycle and ideology The author evaluates recent studies by social historians on the family social class and ethnicity in light of the Erie County experience examines theories of social and cultural change and proposes a non evolutionary model of their relationship *A Demographic Perspective on Gender, Family and Health in Europe* Gabriele Doblhammer, Jordi Gumà, 2018-02-12 This open access book examines the triangle between family gender and health in Europe from a demographic perspective It helps to understand patterns and trends in each of the three components separately as well as their interdependencies It overcomes the widely observable specialization in demographic research which usually involves researchers studying either family or fertility processes or focusing on health and mortality Coverage looks at new family and partnership forms among the young and middle aged their relationship with health and the pathways through which they act Among the old lifelong family biography and present family situation are explored Evidence is provided that partners advancing in age start to resemble each other more closely in terms of health with the health of the partner being a crucial factor of an individual's own health Gender specific health outcomes and pathways are central in the designs of the studies and the discussion of the results The book compares twelve European countries reflecting different welfare state regimes and offers country specific studies conducted in Austria Germany Italy all populations which have received less attention in the past and Sweden As a result readers discover the role of different concepts of family and health as well as comparisons within European countries and ethnic groups It will be an insightful resource for students academics policy makers and researchers that will help define future research in terms of gender and public health **Family History**, 1985 An ambitious volume of studies of the origins and trends in family history of major geographical areas **Handbook of Marriage and the Family** Suzanne K. Steinmetz, Marvin B. Sussman, 2013-11-11 The lucid straightforward Preface of this Handbook by the two editors and the comprehensive perspectives offered in the Introduction by one of them leave little for a Foreword to add It is therefore limited to two relevant but not intrinsically related points vis a vis research on marriage and the family in the interval since the first Handbook Christensen 1964 appeared namely the impact on this research of the politicization of the New Right and of the Feminist Enlightenment beginning in the mid sixties about the time of the first Handbook In the late 1930s Willard Waller noted Fifty years or more ago about 1890 most people had the greatest respect

for the institution called the family and wished to learn nothing whatever about it Everything that concerned the life of men and women and their children was shrouded from the light Today much of that has been changed Gone is the concealment of the way in which life begins gone the irrational sanctity of the home The aura of sentiment which once protected the family from discussion clings to it no more We want to learn as much about it as we can and to understand it as thoroughly as possible for there is a rising recognition in America that vast numbers of its families are sick from internal frustrations and from external buffeting We are engaged in the process of reconstructing our family institutions through criticism and discussion 1938 pp 3 4 *Chinese Marriages in Transition* Xiaoling Shu, Jingjing Chen, 2023-09-15 Outdated models of Chinese gender roles marriage and family transitions portray these changes as streamlined and unidirectional from traditional to modern public to private collective to individual Chinese Marriages in Transition documents the complex nuanced and multidirectional nature of these cultural transformations Using complex and large scale historical national data as well as comprehensive data from multiple countries Xiaoling Shu and Jingjing Chen demonstrate that while the second demographic transition is unfolding in many advanced Western societies it is not necessarily a normative form of societal transition Working instead from a framework of new familism Shu and Chen show that Chinese new familism consists of both old and new values including the persistence of some traditional beliefs and practices accompanied by a transition to modern perceptions of gender and adaption to some modern forms of family formation This book is freely available in an open access edition thanks to TOME Toward an Open Monograph Ecosystem a collaboration of the Association of American Universities the Association of University Presses and the Association of Research Libraries and the generous support of the University of California Davis Learn more at the TOME website available at [openmonographs.org](https://openmonographs.org) Download the open access book here
