Planning for Small and Family Businesses William J. Rothwell, Robert K. Prescott, 2022-10-04 Who will lead your organization into the future Have you created the systems to properly implement required succession transitions Have you put the financial tools in place to fund the transition Do you want a plan that connects with your personal and company core values When do you include timely planning related to strategy and talent issues What are the appropriate communication strategies for sharing your plan What legal issues need consideration related to the strategy financial and people aspects of succession So what is preventing you from starting this effort tomorrow Small and family businesses are the bedrock of all businesses More people are employed by small and family owned businesses than by all multinational companies combined Yet the research on small and family businesses is bleak fewer than one third of small business owners in the United States can afford to retire Only 40% of small businesses have a workable disaster plan in case of the sudden death or disability of the owner and only 42% of small businesses in the United States have a succession plan Fewer than 11% of family owned businesses make it to the third generation beyond the founder Lack of succession planning is the second most common reason for small business failure Many organizations often wonder where to start and what to do Succession Planning for Small and Family Businesses Navigating Successful Transitions presents a comprehensive approach to guiding such efforts

Small and family owned businesses rarely employ first rate well qualified talent in human resources More typically business owners must be jacks of all trades and serve as their own accountants lawyers business consultants marketing experts and HR wizards Unfortunately that does not always work well when business owners embark on planning for retirement or business exits To help business owners avert problems this book advises on some of the management tax and financial legal and psychological issues that should be considered when planning retirement or other exits from the business This comprehensive approach is unique when compared to the books articles and other literature that currently exist on the market This book takes on a bold and integrated approach Relevant research combined with the rich experiences of the authors connects this thorough evidence based approach to action based approaches for the reader

Chinese Family Business and the Equal Inheritance System Victor Zheng, 2009-12-17. This book disputes the traditional argument that the equal inheritance system hinders the growth of Chinese family business, approaching this not only in terms of economic capital but also in terms of human capital, such as education and leadership, and social networks. Zheng argues that most of the family business patriarchs only focus on the passing on of economic capital but give little attention to human capital and social capital when they come to the stage to transfer control to the next level. It further elaborates that the equal inheritance system itself isn't the destructive force that weakens family business competitiveness but can assist economic development by generating dynamism and capital. Based on extensive primary research, the work discusses how equal division encourages sibling comparison, analysing how such comparisons initially generate stress and anxiety but will ultimately galvanize competition, benefiting the business. The author also assesses how family division can offer initial economic, human, and social capitals that can motivate siblings to start their own businesses and be free from the subjugation sometimes associated with a family firm. Through the evaluation of these issues, the book argues that the equal inheritance system can be regarded as the origin of the self-employment mentality, which not only fosters the growth of Chinese family business but also plays a crucial role in promoting economic development. Providing a valuable contribution to the field, this work will be of great interest to all scholars of Chinese and Asian business.
