Family Class And Education:

Family, Class and Education Maurice Craft, 1970 **Families, Education and Social Differences** Ben Cosin, Liz Freeman, Margaret Hales, 2013-12-16 This book completes the series of readers for the Open University's undergraduate course EU208 Exploring Educational Issues. A major theme of the book is the controversy around early years education and it looks at inequality issues **Marxist Perspectives in the Sociology of Education (RLE Edu L Sociology of Education)**

Maurice Levitas, 2012-05-04 The major theories explored are those concerned with social mobility and those which derive from a relativist position in Sociology both of which see education as a selection mechanism for a stratified society. Social class, family, sociolinguistics and schools are among the topics discussed. In this analysis the author defines key areas in the sociology of education, gives access to important concepts of Marx and Engels, strengthens sociological starting points by adding a Marxist element, discriminates between radically different directions in education, maps the main features of long term working class goals. This thoroughgoing Marxist critique of widely prevalent notions in the sociology of education provides a compass by which place and direction in this area of education may be found by students, teachers and parents.

Education and the Family Sampson Lee Blair, Timothy J. Madigan, 2025-05-26 Chapters cover a wide array of topics such as family emotional support for students, family stressors and education, gendered nature of parental support, cultural variation in parental engagement and involvement among others **Handbook of the Sociology of Education** Maureen T. Hallinan, 2006-11-24 The aim of the Handbook of Sociology of Education is to present the most theoretically grounded and empirically rigorous sociological analyses of schools to date. The authors are distinguished researchers in the field. Their contributions to the Handbook offer major theoretical perspectives on the schooling process and describe significant empirical studies of schools and their effects on individuals and society. The research presented in the Handbook is built on three fundamental tenets of sociology. First, the authors adopt the perspective that schools are a central institution in society. An understanding of the function of schooling in social life is enhanced by viewing schools as interrelated with other societal institutions. The study of how the context of schooling influences education processes is critical to an understanding of school outcomes. Rather than being determined solely by ascribed and achieved characteristics, an individual's cognitive and social development are influenced heavily by the structures and networks in which the individual is embedded. Communities, families, schools and social groups are critical elements in the educative process. By viewing the school as a societal institution and highlighting the interaction between context and individual behavior, the Handbook chapters provide a broader and deeper understanding of the determinants of learning in contemporary society. The second sociological insight that guides the research in the Handbook is that the school is a social system *The State, the Family and Education (Routledge Revivals)* Miriam David, 2015-06-03 In *The State, the Family and Education* first published in 1980, Miriam David provides an entirely new analysis of the relationship of the State to the family and education. David shows how the State

through its educational policies regulates family relationships with and within schools This book provides a welcome analysis of educational policy from a socialist feminist perspective re examining the ways in which women as parents teachers and pupils are involved in the education system This book will be of interests to students of education **Perspectives on the Sociology of Education** Philip Robinson,2017-05-08 First published in 1981 this book provides a basic introduction to the sociology of education It brings together many of the principal arguments in order to help the student reach an understanding of the multitude of conflicting opinions theoretical positions and biases within the field The work considers the structures within which the child the family and the classroom are located focusing on the theory and the ways in which they can be used to explain the workings of the educational system It introduces not only the work of classical educational sociologists such as Durkheim Weber and Marx but also more recent scholars such as Halsey Becker and Althusser With a global coverage the book emphasizes the implications of the developments of the sociology of education for educational policy Family Life Education Carol A. Darling,Dawn Cassidy,2014-04-23 Contemporary family life educators operate within a wide range of settings and with increasingly varied populations and families In the third edition of Family Life Education Darling and Cassidy expose readers to the diverse landscape of the field while laying a comprehensive research based practical foundation for current and future family life educators The authors both CFLE certified consider the Certified Family Life Educator certification requirements of the National Council on Family Relations throughout the text Their broad overview of the field includes a brief history and discussion of family life education as an established profession The authors incorporate theory research and practice while also providing guidelines for planning implementing and evaluating family life education programs Chapters on sexuality education relationship and marriage education and parenting education highlight some of the more prevalent and visible forms of family life education Comments from international educators and interactive classroom exercises focus on global trends building awareness and appreciation of diversity Discussion questions and activities encourage readers to examine issues and apply what they have learned Sociology of Education Tomas Boronski,Nasima Hassan,2015-09-26 An essential student friendly text for Education Studies Dr Gillian Forrester Subject Head for Education Early Childhood Studies Liverpool John Moores University Introducing students to the complexities of Education Studies is a difficult task and this book will go a long way to making it easier I will definitely be recommending this to all my students Kevin Brain Programme Leader Education Studies Leeds Trinity University This textbook explains the basic principles of sociology and relates these concepts to today s society and education system in order to deepen your understanding of how these issues affect our lives and the world we live in encouraging you to think critically and to develop a sociological imagination Coverage includes the wider political and economic context for education in the UK including an analysis of the reforms of the 2010 coalition government childhood schooling and pupil voice non traditional consideration of critical pedagogy race and gender the role of education in a multicultural society inequalities in educational opportunity in
