

" Whenever John was in town during those war years, my place - the studio in Clarence Street - was their meeting place. This was an intimate portrait. He was reading, Jean was leaning over his shoulder, and I asked them to hold it a moment...Jean was a model for one of the city art schools then, up on the stairs in various positions. " (Olive, 1998)

"The last book John gave to me was The Little Prince, when we were breaking up towards the end of the war. " (Jean, 1995)

Family Fragments:

Family Fragments? Carol Smart, Bren Neale, 1999-01-26 This exciting new book engages with the recent resurgence of interest in the family offering empirical material and theoretical analysis which give rise to a fresh understanding of the nature of family practices in modern societies The past decade has seen the emergence of an orthodoxy which depicts the family as being in moral decline and blames parents for the harms of divorce Family Fragments takes issue with this political vision and with the idea that divorce is inevitably a harmful process Although some households are fragmenting the authors argue that moral commitments are not simply sundered Instead they put forward a different perspective on divorce as well as formulating principles of policy based on an ethic of care Family Fragments draws on a qualitative study of separating parents and examines the diverse and fluid patterns of parenthood that are negotiated and re negotiated in the aftermath of separation The authors show that the quality of parental relationships both before and after separation are vital for achieving joint parenting after divorce They examine the moral reasoning of parents and explain how this may vary considerably with the sort of solutions imposed in a legal forum This book has a direct bearing on current debates concerning the family and will be essential reading for those studying gender and family relations in sociology social policy law and social work

Family Law and Personal Life John Eekelaar, 2006 How should our most intimate personal relationships be governed in a liberal society Should the state encourage a particular model of family life or support individuals in their pursuit of personal happiness To what extent do people have the right to shape the lives of their offspring This book examines the questions at the heart of family law rethinking the ideas that shape our understanding of the family as a social unit its purpose and the obligations and rights that belong to family members The book explores how the governance of personal relationships has depended on the exercise of power from the traditional assumptions of patriarchy where the male head of the family enjoyed full control over his dependents and descendants to the ideology of welfarism where state institutions protect the interests of the vulnerable at the expense of their close relations Emerging from these conflicting ideologies comes today's rights based culture where traditional expectations for behavior within a family sit within a new emphasis on the ability of minorities and traditional dependents to determine the shape of their own lives Against this background of shifting power relations the book explores the inter relationship between the legal regulation of people's personal lives and the values of friendship truth respect and responsibility In doing this a variety of controversial issues are examined in the light of those values including the legal regulation of gay and unmarried heterosexual relationships freedom of procreation state supervision over the exercise of parenthood the role of fault in divorce law the way parenthood is allocated the rights and responsibilities of

parents to control their children the place of religion in the family the rights of separated partners regarding property and of separated parents regarding their children Throughout the book offers a new picture of the intimacy at the center of personal relationships and argues that only by understanding this intimacy and its role in human happiness can we arrive at a true framework for respecting and governing the personal lives of other people **Responsibility, Law and the Family** Jo

Obligation and Commitment in Family Law Gillian Douglas, 2018-04-19 A tension lies at the heart of family law Expressed in the language of rights and duties it seeks to impose enforceable obligations on individuals linked to each other by ties that are usually regarded as based on love or blood Taking a contextual approach that draws on history sociology and social policy as well as law and legal theory this book examines the concept of obligation as it has been developed in family law and the difficulties the law has had in translating it from a theoretical and ideological concept into the basis of enforceable actions and duties Increasingly the idea of commitment has been offered as the key organising principle for the recognition of family relationships often as a means of rebutting claims that family ties are becoming attenuated but the meaning and scope of this concept have not been explored The book traces how the notion of commitment is understood and how far it has come to be used as a rationale for imposing the core legal obligations which underpin care and caring within families **Key Concepts in Family Studies** Jane Ribbens McCarthy, Rosalind Edwards, 2010-12-10 This is a thoughtful and sometimes challenging

Family Life and Family Policies in Europe Franz-Xaver Kaufmann, 2002 This volume is a comparative

study of family change in Europe and its dependency on social policy regimes The authors explore family discourse family law single parents gender relations the new fathers divorce and abortion within the framework of national policies vis a vis the family Conventional wisdom assumes that policy decisions affecting the life situation of a population shape different opportunities for private living particularly in relation to children and the family But the authors argue it would be too simplistic to assume a direct causal link between welfare policies for the family and developments in the family sector Family change is in fact mediated by institutional factors as well as by cultural traditions and political intervention The chapters in this volume deal with the substantial and methodological problems of ascertaining the impact of different national policy regimes on family change

Taking Responsibility, Law and the Changing Family Heather Keating, 2016-04-01 This volume considers the impact that

changing family norms have had on the responsibilities that the law allocates to people in family relationships Contributions are drawn from a wide variety of jurisdictions in which scholars lawyers judges and policy makers have been trying to discern what the appropriate correlation should be between the responsibilities that people undertake in family settings and the law that regulates family responsibilities Part I looks at the changes that have occurred in adult relationships and what they have done for our sense of the family responsibilities that adults take for one another Part II reflects on the changing nature of the parental relationship in order to reconsider the way in which changing family structures affect the responsibilities we think people raising children should have The third part brings the rights discourse that has dominated jurisprudence for much of the last fifty years into the discussion of family transformation and the responsibilities to which it gives rise In the final section the authors reflect on the difficulties of trying to resolve the meaning of responsibility in a world of changing families The collection brings together some of the most eminent and imaginative scholars and judges working in this area It will be a valuable resource for all those interested in the legal regulation of the transforming family

What About the Family? Hilde Lindemann, Janice McLaughlin, Marian A. Verkerk, 2019-04-01 Health and social care decisions and how they impact a family are often viewed from the perspective of the individual family member making them for example the role of the parent in surrogacy questions the care of the elderly or decisions that involve fetuses or organ donations This volume represents a concerted collaborative effort to depart from this practice it shows rather that the family unit as a whole shapes and influences the patient's decisions and very understanding of the choice at hand The family is intrinsic and inseparable from such ethical choices This deeper level of thinking about families and health care poses an entirely new set of difficult questions Which family members are relevant in influencing a patient and why is this so What is a family in the first place What duties does a family have to its own members This volume edited by bioethicists Hilde Lindemann Marian Verkerk and Janice McLaughlin develops an ethic radically distinct from health care ethics feminist ethics or an ethic of care even though authors draw on many of the resources those approaches offer What makes an ethics of families distinctive is that it theorizes relationships characterized by ongoing intimacy and partiality among people who are not interchangeable and remains centered on the practices of responsibility arising from these relationships What About the Family represents an interdisciplinary effort drawing among other resources on its authors backgrounds in sociology nursing philosophy bioethics and the medical sciences Contributors begin from the assumption that any ethical examination of the significance of family ties to health and social care will benefit from a dialogue with the debates about family occurring in these other disciplinary areas and examine why families matter how

families are recognized how families negotiate responsibilities how families can participate in treatment decision making and how justice operates in families

Rethinking the Meaning of Family for Adolescents and Youth in Zimbabwe's Child Welfare Institutions Getrude Dadirai Gwenzi, 2023-02-13 This book examines the lives of children and young adults living in residential care systems in Zimbabwe and their unique conceptualization of family While the importance of family for the development and wellbeing of children can't be overemphasized the questions of what and who counts as family to orphans and vulnerable children OVCs are under researched Gwenzi brings a social constructionist approach to study OVCs in institutional care as well as living with their families in Zimbabwe finding that they do not have a single definition of family and that they use diverse characteristics to describe what family means to them With the data suggesting a need for belonging continuity of relationships protection and trust this study makes recommendations for policy and practice with youth in alternative care in sub Saharan Africa

Restructuring Family Policies Maureen Baker, 2006-01-01 Recent years have seen significant changes in the social policies of many liberal welfare states this is especially true of social programs for families with children Increasingly governments are making family policy trade offs reducing support for some families but improving it for others Why are such trade offs occurring and how do governments differ in their approach to family social policy This study addresses these questions by examining the political demographic and socio economic factors influencing the restructuring of family related programs in OECD countries Adopting a feminist political economy approach Maureen Baker shows that while some governments encourage their citizens to see children as future resources and promote strong support for reproductive health programs child welfare services women's refuges subsidized childcare and pay equity others make these claims while simultaneously reducing family incomes through the deregulation of labour markets and restrictions on income support Ultimately Baker demonstrates that nation states with the best outcomes for families offer a variety of social supports which are increasingly important as global markets reduce economic security for some families while improving the financial situation of others This study also explores strategies employed by states to incorporate or resist international pressures and the reasons why some states tenaciously defend their family policy traditions while others restructure according to international guidelines Drawing from nation based research cross national studies and international data bases Restructuring Family Policies successfully integrates mainstream academic debates about restructuring welfare states with feminist research findings and current policy concerns
