Tanner, 2012-09-26 On Neurogenic Communication Disorders Original Short Stories and Case Studies is a unique book It is a collection of short stories and case studies about persons with neurogenic communication disorders The short stories are based on people I have known as friends acquaintances or patients The characters in the short stories are based on one person or a composite of several individuals I have placed these characters in interesting fictional situations which provide a vehicle for showing their mettle in dealing with their communication disorders and life challenges The case studies are based on actual clinical cases and situations but literary license has been taken to make them reader friendly and interesting This book of short stories and case studies is not a scholarly clinical treatise on neurogenic communication disorders nor does it aspire to be one While I believe it provides accurate information about neurogenic communication disorders it is a work of fiction and simply a different vehicle for understanding these complex and often devastating medical conditions **Case Studies in**

Communication Sciences and Disorders Dale F. Williams, 2017-09-25 Few activities can match the complexity of human communication Given its intricacy it is understandable that the process will not always work properly When it doesn't the effects can be devastating given how

much of everyday life depends on communicating with one another. Despite its importance, however, much is still unclear about how we turn thoughts into language and then speech. Debates rage over various components of the communication system. Myths abound, most based on nothing more than speculation and misinformation. It all makes for a fascinating area of study and practice, particularly when considering the importance of the topic. This book provides readers with the basics of human communication without shying away from the controversies. Dale F. Williams, Ph.D., utilizes a panel of internationally recognized experts in all areas of the field to clearly explain normal communication as well as disorders of speech, language, hearing, and swallowing. Topics that overlap all disorders: diagnosis, treatment, research, ethics, work settings, and multicultural issues are also covered in a reader-friendly style. In addition to the relevant information on human communication, the book also includes first-hand accounts of both people with disorders and those who work with them. Discussion questions are posed to help readers explore the gray areas, and additional readings are described for those wishing to research specific topics. In these ways, readers are provided with information that truly helps them to understand communication sciences and disorders from a variety of perspectives. *Communication Sciences and Disorders: An Introduction to the Professions* is essential reading for anyone contemplating a career in speech, language, pathology, or audiology. In addition, the clear and entertaining writing style makes the field, in all its complexity, accessible to anyone with even a passing interest in the process of human communication. *Treating and Beating Heart Disease: A Consumer's Guide to Cardiac Medicines* Barbara H.

Roberts, 2008-03-11 34th Clinical Aphasiology Conference Holland, 2005. This special issue of *Aphasiology* represents the papers accepted for publication which were among those presented at the 34th Clinical Aphasiology Conference held in Park City, Utah, in 2004. They have been peer-reviewed and selected by a distinguished group of ad hoc editorial consultants from among the considerably larger number of papers and posters presented at the meeting itself. **Locality** Enoch Oladé

Aboh, Maria Teresa Guasti, Ian Roberts, 2014. *Locality* offers a range of new perspectives on an important aspect of syntactic movement. The papers collected here explore locality in two ways: the first section approaches locality in terms of pure syntax; the second approaches it in terms of psycholinguistics. **Stroke Rehabilitation** Glen Gillen, EdD, OTR, FAOTA, 2015-08-12
