Scott (of Brussels.), 1884 **Family and the Female Life Course** George Alter, 1988 The tension between women's workplace opportunity and family obligation is not exclusively a phenomenon of the 1980s as George Alter makes abundantly clear in this study His close investigation of women's lives in a nineteenth century European industrial city advances our knowledge in several areas of social history historical demography and life course studies It is the first monograph to apply event history analysis to the study of family history In doing so it moves beyond the static categories of traditional household studies to a dynamic view of the influence of the family on the life course decisions of individuals In contrast to most previous historical studies of the family this work focuses on the dynamic aspects of life course transitions employment marriage household formation childbearing rather than the structure of households In doing so attention is shifted from the household as a decision making unit to the role of family obligations and resources in the decisions of individuals Thus the family is viewed from the inside out through its effects on individual actors Alter's work adds new insights to our understanding of the impact of industrialization on family structure and functioning about women's work and labor force attachment and about the ways in which a life course perspective can help to resolve controversies in the approach to family and household dynamics His rich interpretations not only help to reconstruct the past but place some current social issues into historical perspective illegitimacy nuclear family patterns and women's dual family work roles among others **Notes and documents relating to the family of Loffroy, by a cadet [J.H.
