Cross-Cultural Perspective Tobias Koellner, 2023-02-13 This edited volume provides an anthropological study of family businesses and business families In previous research on family firms and business families the comparative cross cultural approach of anthropology has so far received little attention As a result family firms and business families are too often analyzed without considering cultural and kinship differences adequately Similarly although the topics of kinship and the economy are central to anthropological analysis research on family firms and business families has been a marginal topic only that lacks in depth discussions within anthropology This volume breaks the mold by offering new empirical and theoretical insights into discussion about business families and family firms from a comparative cross cultural perspective It first addresses how the business family can be defined in different cultures and how kinship becomes understandable as a process and through doing family In this the book provides a systematic comparison of the connections between family kinship and economic activity in different cultures whereas many of the previous studies have concentrated on only one or a few regions or cultures It also shows the complexities and challenges when grounding the analysis of economic activity and entrepreneurship in cultural context **The Family in Cross-cultural Perspective [sound Recording]** Stephens, William N, 1972 Families, History And Social Change Tamara K Hareven, Barbara Trepagnier, 1999-12-03 One of the prevailing myths about the American family is that there once existed a harmonious family with three generations living together and that this ideal family broke down under the impact of urbanization and industrialization The essays in Families History and Social Change challenge this myth and provide dramatic revisions of simplistic notions about change in the American family In these interdisciplinary essays that are deeply rooted in history Hareven provides important perspectives on family relations in the present dispels myths about family relations in the past offers new directions in research and interpretation and revises our understanding of social change Hareven s essays which are based on thirty years of research combine empirical evidence with theoretical frameworks and discussions of the state of the art in this exciting field The essays cover a wide spectrum of issues and topics such as the organization of the family and the household the networks available to children as they were growing up the role of the family in the process of industrialization the division of labor in the family along gender lines and the relations between the generations in the later years of life Coincidentally the essays revolve around three central themes The family s interaction with the process of industrialization the life course and the development of the field of family history and its future directions They are both interdisciplinary and cross cultural Professor Hareven is a pioneer and leader in the development of the field of family history Her work makes a major contribution to the theoretical and substantive aspects of scholarship on family life past and present and on social change Her essays also provide a fine understanding of this field s development *Cross-cultural Perspectives on Families, Work, and Change* Katja Boh, Giovanni B.
