Alan Brown, 2019-02-07 This book argues that the legal understanding of family in the UK continues to be underpinned by the idealised image of the nuclear family premised upon the traditional gendered roles of father as breadwinner and mother as homemaker This examination of the law s model of the family has been prompted by the substantial reforms that have taken place in family law in recent decades and the significant evolution in social attitudes and familial practices that has occurred in parallel Throughout the book the influence of the nuclear family is noted in several different contexts various specific legal definitions of family the legal regulation of adult conjugal relationships the attribution of legal parenthood and the construction of the role of the parent within the law Ultimately this book argues that while these reforms have resulted in

additional categories of relationship coming to be situated within the nuclear family model there has not as yet been any fundamental alteration of the underpinning concept of the nuclear family itself This book concludes by considering the possibilities offered beyond the nuclear family exploring the reconceptualising of the legal understanding of family around alternative and potentially radical models of family

The Making and Breaking of the Australian Family Michael Gilding,2020-07-31 Once everyone knew what the family was It was something natural and without a history mum dad and the kids Divorce women in the workforce de facto relationships and the sexual liberation movements have fractured the old certainties Nowadays there is more talk about the family than ever even if no one is quite sure what it is anymore The making and breaking of the Australian family looks at the family in history It traces the shift from the household economy of the late nineteenth century to the child centred nuclear family of the mid twentieth century to the recent proliferation of households The book argues that the so called traditional family was a quite recent creation and that its fragmentation is obscured by new redefinitions of the family The making and breaking of the Australian family addresses the changing experiences of childhood parenting home neighbourhood work birth and sexuality It examines the expansion of the market and the state patterns of class mobilisation the reconstruction of masculinity and femininity and the creative strategies of ordinary people in everyday life This is a lively and accessible book which will prove a valuable reference for students of history sociology women s studies and Australian studies and will generate wide discussion amongst people concerned with family policy welfare and contemporary social issues

Sourcebook of Family Theory and Research Vern L. Bengtson, 2005. Now available in paperback for classroom use. This comprehensive text provides a rich source of perspectives on theorising about the family for scholars, researchers and students. Another of the book's strengths is the emphasis on multimethod approaches in family research. The book covers an impressive range of topics and issues: marital happiness, adjustment of children in divorce, marriages, gay marriage, sibling ties, ethnic families, of colour, stepfamilies, aggression, culture, work and family, religion and social policy, to name a few. In summary, this superb volume is highly recommended and amply reflects the many contemporary perspectives on the family. Philip Siebler, Monash University, Victoria. Sponsored by the National Council on Family Relations, the Sourcebook of Family Theory and Research is the reference work on theory and methods for family scholars and students around the world. This volume provides a diverse, eclectic and paradoxically mature approach to theorizing and demonstrates how the development of theory is crucial to the future of family research. The Sourcebook reflects an interactive approach that focuses on the process of theory building and designing research, thereby engaging readers in doing theory rather than simply reading about it. An accompanying website offers additional participation and interaction in the process of doing theory and making science. Editors: Vern L. Bengtson, Alan C. Acock, Katherine R. Allen, Peggye Dilworth, Anderson and David M. Klein have brought together a prominent group of diverse contributors ranging in race and ethnicity, age and seniority and gender and sexual orientation. The Sourcebook begins with a section that sets the context for future family research. The subsequent sections explore changing family patterns, changing family interactions within and across generations and families and larger social forces. A concluding section discusses issues of teaching family theories and research. Key Features: Focuses on the process rather than the outcomes of family theory and research methods. Emphasizes the value of multi-methods approaches in family research by integrating theory development with the development of research methods. Differs from many other publications on family research by describing the development of new ideas rather than just summarizing existing findings. The interactive Web site and the special feature boxes within the chapters engage readers with theory and methodology. Boxed features include Case Studies, Spotlights on Theory, Spotlights on Methods and a Discussion and Extension sections. Represents a Who's Who of family researchers with contributions from many of the best researchers in the family realm. The Sourcebook will be an excellent addition to any academic library. It is an authoritative reference for scholars and researchers in Human Development and Family Studies, Sociology, Social Work and Psychology. In addition, the Sourcebook can also be used in graduate courses on family theory and methodology.
