Multiculturalism as a fourth force Paul Pedersen, 2013-10-28 Until recently the field of psychology has been a monocultural science in a Euro American envelope Profound global changes in social economic political and academic development have resulted in a more multicultural perspective for psychology The field of psychology is now growing more rapidly outside than inside the U S As a result of these changes multiculturalism adds a dimension to psychodynamic humanistic and behavioral psychology as much as the fourth dimension of time adds meaning to three dimensional spaces The contributors to *Multiculturalism as a Fourth Force* seek to separate what we know from what we do not yet know about the importance of multiculturalism to these changes in the field of psychology Topics include cultural diversity within and between societies multiculturalism and psychotherapy and culture centered interventions Each contributor describes the need for multiculturalism in psychology the difficulties in establishing a multicultural perspective and what has to happen before multiculturalism can claim to be a Fourth Force to supplement the other forces for psychology In addition the

contributors examine the role of culture to the changing field of psychology and provide case examples of this phenomenon It is the author's hope that by making culture central rather than marginal in the area of psychology the psychodynamic behavioral and humanistic theories can become more effective and less culturally biased **Ready or Not** Kay S.

Hymowitz, 2008-06-30 Children today grow up so fast How often we hear those words uttered both in frustrated good humor and in dumbfounded astonishment Every day the American people hear about kids doing things both good and bad that were once thought to be well beyond their scope flying airplanes running companies committing mass murder Creatures of the information age today's children sometimes seem to know more than their parents They surf the Internet rather than read books they watch South Park instead of The Cosby Show they wear form fitting capri pants and tank tops instead of sundresses in short they are sophisticated beyond their years These facts lead us to wonder Is childhood becoming extinct In Ready or Not Kay S Hymowitz offers a startling new interpretation of what makes our children tick and where the moral anomie of today's children comes from She reveals how our ideas about childrearing itself have been transformed perniciously in response to the theories of various experts educators psychologists lawyers media executives who have encouraged us to view children as small adults autonomous actors who know what is best for themselves and who have no need for adult instruction or supervision Today's children and teenagers have been encouraged by their parents and teachers to function as individuals to such an extent that they make practically every decision on their own what to wear what to study and even what values they will adhere to The idea of childhood as a time of limited competence in which adults prepare the young for maturity has fallen into disrepute independence has become not the reward of time but rather something that our children have come to expect and demand at increasingly younger ages One of the great ironies of turning our children into small adults is that American society has become less successful at producing truly mature men and women When sophisticated children do grow up they often find themselves unable to accept real adult responsibilities Thus we see more people in their twenties and thirties living like children unwilling to embark on careers or to start families Until we recognize that children are different from grownups and need to be nurtured as such Hymowitz argues our society will be hollow at its core **Alone Together** Milton C. Regan, 1999 How can we draw on the liberating aspects of individualism in marriage

without denying the importance of connection How might we benefit from recognizing the importance of sharing and sacrifice in marriage without reinforcing the traditional view that women should subordinate their interests to those of other family members In addressing these questions Regan's analysis is informed by communitarian and liberal theory as well as by feminist perspectives on marriage and family life **The War on Welfare** Marisa Chappell, 2012-02-02 Why did the War on Poverty give way to the war on welfare Many in the United States saw the welfare reforms of 1996 as the inevitable result of twelve years of conservative retrenchment in American social policy but there is evidence that the seeds of this change were sown long before the Reagan Revolution and not necessarily by the Right The War on Welfare Family Poverty and

Politics in Modern America traces what Bill Clinton famously called the end of welfare as we know it to the grassroots of the War on Poverty thirty years earlier. Marshaling a broad variety of sources, historian Marisa Chappell provides a fresh look at the national debate about poverty, welfare, and economic rights from the 1960s through the mid 1990s. In Chappell's telling, we experience the debate over welfare from multiple perspectives, including those of conservatives, of several types of liberal antipoverty experts, national liberal organizations, labor, government officials, feminists of various persuasions, and poor women themselves. During the Johnson and Nixon administrations, deindustrialization, stagnating wages, and widening economic inequality pushed growing numbers of wives and mothers into the workforce. Yet labor unions, antipoverty activists, and moderate liberal groups fought to extend the fading promise of the family wage to poor African Americans' families through massive federal investment in full employment and income support for male breadwinners. In doing so, however, these organizations condemned programs like Aid to Families with Dependent Children (AFDC) for supposedly discouraging marriage and breaking up families. Ironically, their arguments paved the way for increasingly successful right-wing attacks on both welfare and the War on Poverty itself.

Silicone Survivors Susan M. Zimmermann, 1998 Susan Zimmermann talked with forty women about one of the most sensitive issues of body image and health: their breasts, the chief attribute of femininity. In the aftermath of the early 1990s controversy over the use of silicone breast implants, how do women decide to undergo surgery to enhance or reconstruct their bodies? How does surgery alter a woman's self-image? How do they face the possibility of debilitating autoimmune disease from rupturing or leaking implants? Now, having faced years of medical and personal uncertainty, many have coped by reassessing their lives and their relationships by sharing information and support with other women with implants, outreach that becomes a means for self-empowerment.

Equality Renewed Christine Sypnowich, 2016-12-19 How should we approach the daunting task of renewing the ideal of equality? In this book, Christine Sypnowich proposes a theory of equality centered on human flourishing or wellbeing. She argues that egalitarianism should be understood as seeking to make people more equal in the constituents of a good life. Inequality is a social ill because of the damage it does to human flourishing: unequal distribution of wealth can have the effect that some people are poorly housed, badly nourished, ill educated, unhappy, or uncultured, among other things. When we seek to make people more equal, our concern is not just resources or property, but how people fare under one distribution or another. Ultimately, the best answer to the question, "equality of what?" is some conception of flourishing, since whatever policies or principles we adopt, it is flourishing that we hope will be more equal as a result of our endeavours. Sypnowich calls for both retrieval and innovation. What is to be retrieved is the ideal of equality itself, which is often assumed as a background condition of theories of justice, yet at the same time dismissed as too homogenising, abstract, and rigid, a criterion for political argument. We must retrieve the ideal of equality as a central political principle. In doing so, she casts doubt on the value of

focussing on cultural difference and rejects the idea of neutrality that dominates contemporary political philosophy in favour of a view of the state as enabling the betterment of its citizens

First Births in America Ronald R. Rindfuss, S. Philip Morgan, C. Gray Swicegood, 2023-11-15 This book explores the shifting patterns of parenthood in the United States over the past century focusing on the timing of first births and the social economic and cultural factors that influence these decisions It highlights the concurrent bloom and bust in fertility trends where the number of older parents has increased while the rates of childlessness have also risen primarily due to delays in childbearing among younger people Through an examination of historical trends the book considers how factors such as education religion and socioeconomic status influence when individuals choose to become parents It also compares American fertility patterns with those of other developed nations particularly Japan to show how different cultural contexts shape reproductive behavior The study takes a life course perspective emphasizing how early life experiences and broader social contexts affect decisions about when to start a family The book provides a detailed analysis of fertility trends from both macro and micro levels using a variety of data sources including surveys and longitudinal studies It also investigates the consequences of delayed childbearing childlessness and the timing of parenthood on family dynamics career trajectories and social roles In doing so the book offers insights into the complex interplay between individual choices and societal influences and discusses the implications for future demographic and social change This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1988

Our Studies, Ourselves Barry Glassner, Rosanna Hertz, 2003-08-21 What motivates a lifelong scholarly pursuit and how do one's studies inform life outside the academy Sociologists who live in families but also study families who go to work but also study work who participate in communities but also try to understand communities have an especially intimate relation to their research Growing up poor struggling as a woman in a male dominated profession participating in protests against the Vietnam War facts of life influence research agendas individual understandings of the world and ultimately the shape of the discipline as a whole Barry Glassner and Rosanna Hertz asked twenty two of America's most prominent sociologists to reflect upon how their personal lives influenced their research and vice versa how their research has influenced their lives In this volume the authors reveal with candor and discernment how world events political commitments and unanticipated constraints influenced the course of their careers They disclose how race class and gender proved to be pivotal elements in the course of their individual lives and in how they carry out their research Faced with academic institutions that did not hire or promote persons of their gender race sexual orientation or physical disability they invented new routes to success within their fields Faced with disappointments in political organizations to which they were devoted they found ways to integrate their disillusionment into their research agendas

While some of the contributors radically changed their political commitments and others saw more stability none stood still An intimate look at biography and craft these snapshots provide a fascinating glimpse of the sociological life for colleagues other academics and aspiring young sociologists The collection demonstrates how inequalities and injustices can be made into motors for scholarly research which in turn have the power to change individual life courses and entire societies

Redefining Fatherhood Nancy E. Dowd, 2000-07-01 Most fathers parent less than most mothers Those fathers who do parent equally or more so than mothers are poorly supported by our society For children this means a loss of adult care as well as an ongoing and sharply defined differentiation between fathers and mothers Fathers are not present in children's lives to a significant degree if at all or when they are present they are often rendered socially invisible For many men their parenthood is defined as biological or economic while a minority of men struggle against the presumption that they are not caregivers In *Redefining Fatherhood* Nancy Dowd argues that this skewed social pattern is mirrored and supported by law Dowd makes the case for reenvisioning fatherhood away from genes and dollars and toward nurture Integrating economic social and legal aspects of fathering she makes the case for focusing on social nurturing behavior as the core meaning of fatherhood In this nuanced and complex analysis she explores the barriers to redefinition including concepts of masculinity the interconnections between fathers and mothers male violence and homophobia *Redefining Fatherhood* offers a progressive view on how men and society at large can change understandings and practices of fatherhood

The Sibling Society Robert Bly, 1997-05-27 Where have all the grownups gone In answering that question with the same freewheeling erudition and intuitive brilliance that made *Iron John* a national bestseller poet storyteller and translator Robert Bly tells us that we live in a sibling society in which adults have regressed into adolescence and adolescents refuse to grow up
