Thompson,2014-12-05 Who am I In a world where randomness and chance make life transient and unpredictable religion psychology and philosophy have all tried in their different ways to answer this question and to give meaning and coherence to the human person How we should construct a meaningful me and to make sense of one s life is the question at the heart of Mel Thompson s illuminating book Although Thompson begins by exploring the workings of the brain he shows that if we are to consider the nature of the self it is not enough to argue about such things as how mind relates to matter or whether neuroscience can fully explain consciousness Such an approach fails to do justice to the self that we experience and the selves that we encounter around us We need to engage with the more personal existential questions how do I make sense of my life And am I responsible for the person I have become Thompson investigates the gap between what we are and what others perceive us to be to ascertain whether we are genuinely knowable entities He explores the central dilemma of how one can have a fixed idea of me to shape and direct one s life when in a world of constant change events will rob us of that fixed idea at any moment Perhaps we would be better to let go of the need for me asks Thompson but would a self less life be possible or desirable Drawing on the writings of literature philosophy religion and science as well as personal reflection and anecdote Thompson has written an engaging and thought provoking work that recaptures the notion of me from the neuroscientists and situates it at the heart of finding a place in the world **The Marine's New Family** Roz
