Famine In Soviet Russia 1919 1923 The Operation Of The American Relief Administration:

The Famine in Soviet Russia, 1919-1923 Harold Henry Fisher, 1927 *FAMINE IN SOVIET RUSSIA, 1919-1923* HAROLD H. FISHER, 2018 **The Famine in Soviet Russia** Harold Henry Fisher, 1935 *The Famine in Soviet Russia (1919-1923). The Operations of the American Relief Administration, by H. H. Fisher,...* H. H. Fisher, 1927 The Russian Revolution and Civil War 1917-1921 Jonathan Smele, 2006-04-15 The Russian Revolution and Civil War in the years 1917 to 1921 is one of the most widely studied periods in history It is also somewhat inevitably one that has generated a huge flow of literature in the decades that have passed since the events themselves However until now historians of the revolution have had no dedicated bibliography of the period and little claim to bibliographical control over the literature The Russian Revolution and Civil War 1917 1921 offers for the first time a comprehensive bibliographical guide to this crucial and fascinating period of history The Bibliography focuses on the key years of 1917 to 1921 starting with the February Revolution of 1917 and concluding with the 10th Party Congress of March 1921 and covers all the key events of the intervening years As such it identifies these crucial years as something more than simply the creation of a communist state The "Russian" Civil Wars, 1916-1926 Jonathan Smele, 2016-01-15 This volume offers a comprehensive and original analysis and reconceptualisation of the compendium of struggles that wracked the collapsing Tsarist empire and the emergent USSR profoundly affecting the history of the twentieth century Indeed the reverberations of those decade long wars echo to the present day not despite but because of the collapse of the Soviet Union which re opened many old wounds from the Baltic to the Caucasus Contemporary memorialising and de memorialising of these wars therefore form part of the book's focus but at its heart lie the struggles between various Russian political and military forces which sought to inherit and preserve or even expand the territory of the tsars overlain with examinations of the attempts of many non Russian national and religious groups to divide the former empire The reasons why some of the latter were successful Poland and Finland for example while others Ukraine Georgia and the Muslim Basmachi were not are as much the author's concern as are explanations as to why the chief victors of the Russian Civil Wars were the Bolsheviks Tellingly the work begins and ends with battles in Central Asia a theatre of the Russian Civil Wars that was closer to Mumbai than it was to Moscow **Constructive Spirit** David W. McFadden, Claire Gorfinkel, Sergei Nikitin, 2004 **Stalin's War** Sean McMeekin, 2021-04-20 A prize winning historian reveals how Stalin not Hitler was the animating force of World War II in this major new history World War II endures in the popular imagination as a heroic struggle between good and evil with villainous Hitler driving its events But Hitler was not in power when the conflict erupted in Asia and he was certainly dead before it ended His armies did not fight in multiple theaters his empire did not span the Eurasian continent and he did not inherit any of the spoils of war That central role belonged to Joseph Stalin The Second World War was not Hitler's war it was Stalin's war Drawing on ambitious new research in Soviet European and US archives Stalin's War revolutionizes our understanding of this global conflict by moving its

epicenter to the east Hitler's genocidal ambition may have helped unleash Armageddon but as McMeekin shows the war which emerged in Europe in September 1939 was the one Stalin wanted not Hitler So too did the Pacific war of 1941-1945 fulfill Stalin's goal of unleashing a devastating war of attrition between Japan and the Anglo-Saxon capitalist powers he viewed as his ultimate adversary McMeekin also reveals the extent to which Soviet Communism was rescued by the US and Britain's self-defeating strategic moves beginning with Lend-Lease aid as American and British supply boards agreed almost blindly to every Soviet demand Stalin's war machine McMeekin shows was substantially reliant on American material from warplanes tanks trucks jeeps motorcycles fuel ammunition and explosives to industrial inputs and technology transfer to the foodstuffs which fed the Red Army This unreciprocated American generosity gave Stalin's armies the mobile striking power to conquer most of Eurasia from Berlin to Beijing for Communism A groundbreaking reassessment of the Second World War Stalin's War is essential reading for anyone looking to understand the current world order **Quarterly Bulletin** Berkshire Athenaeum and Museum, 1923 *The Goshen College Record* Goshen College, 1926 Consists exclusively of material in Mennonite history Socialist Agriculture In Transition Joseph C Brada, Karl-Eugen Wadekin, 2019-07-11 Because of altered investment priorities policymakers in socialist countries can no longer increase the resources devoted to agriculture as they have in the past Instead they must seek alternative means of improving agricultural performance One approach has been to change the structure of socialist agriculture and to foster organizational changes within agricultural units The contributors to this volume evaluate such reforms and weigh their implications for agricultural output and trade They examine the normless links being introduced in the USSR and compare Soviet experiences with the successes of Chinese and Hungarian reorganizations describe and analyze the changes being implemented in the German Democratic Republic Yugoslavia and Vietnam and pay particular attention to the role of Polish agriculture in the production crisis and to agriculture's potential for improving Poland's overall economic performance The contributors also address issues of infrastructure development the incentives being developed to foster more efficient allocation of resources within the agricultural sector and the likely growth of East-West and intra-socialist agricultural trade Seeds of Exchange Maria Fedorova, 2025-08-15 Seeds of Exchange examines the US and Soviet exchange of agricultural knowledge and technology during the interwar period Maria Fedorova challenges the perception of the Soviet Union as a passive recipient of American technology and expertise She reveals the circular nature of this exchange through official government bureaus amid anxious farmers in crowded auditoriums in cramped cars across North Dakota and Montana and by train over the once fertile steppes of the Volga Amid the post-World War I food insecurity Soviet and American agricultural experts relied on transnational networks bridging ideological differences As Soviets traveled across the US agricultural regions and Americans plowed steppes in the southern Urals and the lower Volga both groups believed that innovative solutions could be found beyond their own national borders Soviets were avidly interested in American technology and American agricultural experts perceived the Soviet Union to be an ideal

setting for experimenting with and refining modern farm systems and organizational practices As *Seeds of Exchange* shows agricultural modernization was not the exclusive domain of Western countries **Putin's Russia** Stephen K.

Wegren,2018-11-16 Now in a thoroughly revised expanded and updated edition this classic text provides the most authoritative and current analysis of contemporary Russia Leading scholars explore the daunting domestic and international problems Russia confronts considering a comprehensive array of economic political foreign policy and social issues Putin s approach for dealing with his country s challenges emphasizes recentralization of power and a strong state He has returned to power for a fourth term amidst unresolved policy issues both domestically and from the international community Only by understanding these challenges and previous efforts to deal with them will it be possible to understand the trajectory for Russia Well written and clearly organized this text is an indispensable guide for anyone wanting to understand contemporary Russia My Life Leon Trotsky,2023-03-02 Since *My Life* was first published it has been regarded as a unique political

literary and human document Written in the first year of Trotsky s exile in Turkey it contains the earliest authoritative account of the rise of Stalinism and the expulsion of the Left Opposition who heroically fought for the ideas and traditions of Lenin Trotsky s exile is the culmination of a narrative which moves from his childhood his education in the universities of Tsarist prisons Siberia and then foreign exile to his involvement in the European revolutionary movement and his central role in the tempestuous 1905 revolution and the Bolshevik victory in October 1917 and the civil war which followed The work concludes with his deportation and exile With an introduction by Alan Woods and a preface by Trotsky s grandson Vsievodol Volkov *A Century of State Murder?* Michael Haynes,Rumy Husan,2003-08-20 Russia has one of the lowest rates of adult life expectancy in the world Average life expectancy for a man in America is 74 in Russia it is just 59 Birth rates and population levels have also plummeted These excess levels of mortality affect all countries that formed the former Soviet bloc Running into many millions they raise comparisons with the earlier period of forced transition under Stalin This book seeks to put the recent history of the transition into a longer term perspective by identifying explaining and comparing the pattern of change in Russia in the last century It offers a sharp challenge to the conventional wisdom and benign interpretations offered in the west of what has happened since 1991 Mike Haynes and Rumy Husan have produced the first and most complete and accurate account of Russian demographic crisis from the Revolution to the present **Socialist Churches**

Catriona Kelly,2016-11-01 In Russia legislation on the separation of church and state in early 1918 marginalized religious faith and raised pressing questions about what was to be done with church buildings While associated with suspect beliefs they were also regarded as structures with potential practical uses and some were considered works of art This engaging study draws on religious anthropology sociology cultural studies and history to explore the fate of these socialist churches showing how attitudes and practices related to them were shaped both by laws on the preservation of monuments and anti religious measures Advocates of preservation while sincere in their desire to save the buildings were indifferent if not hostile

to their religious purpose Believers on the other hand regarded preservation laws as irritants except when they provided leverage for use of the buildings by church communities The situation was eased by the growing rapprochement of the Orthodox Church and Soviet state organizations after 1943 but not fully resolved until the Soviet Union fell apart Based on abundant archival documentation Catriona Kelly s powerful narrative portrays the human tragedies and compromises but also the remarkable achievements of those who fought to preserve these important buildings over the course of seven decades of state atheism Socialist Churches will appeal to specialists students and general readers interested in church history the history of architecture and Russian art history and cultural studies

Ministries of Compassion among Russian Evangelicals, 1905-1929 Mary Raber, 2016-05-13 The present study fills a gap in the study of the evangelical movement in Russia by presenting a comprehensive picture of their compassionate ministry during their longest stretch of relative freedom before the 1980s Better known for their energetic preaching and literature work Russian evangelicals also gave attention to compassionate ministry although it was never extensive because of their marginal status They established assistance funds organized charitable institutions practiced urban rescue ministry participated in the Russian temperance movement and established economic communities Each area is distinct yet all were supported by the same set of theological convictions The Russian evangelicals were convinced that their witness should consist of good works as well as words and that the gospel had the power to undo human suffering While intentionally cultivating an attitude of concern for the needs of others they taught that compassion was the concern of all members of the community regardless of economic status or age In their publications evangelicals devoted a good deal of teaching to the proper Christian attitude toward money and giving They drew on Western models but also their indigenous sectarian roots Baltimore and Ohio Employees Magazine ,1927

Western Doctrines on East-West Trade Peter Van Ham, 1992-06-18 East West trade and technology transfer have always been linked to the issue of national security The author identifies many different Western doctrines on East West trade demonstrating that two basic belief systems underly these doctrines

The Origins of UNICEF, 1946-1953 Jennifer M. Morris, 2015-04-16 The Origins of UNICEF traces the history of the founding of the world s most well known and often controversial relief aid organization for children UNICEF modeled itself after several national organizations as well as some of the early twentieth century transnational and international relief aid organizations catering to a clientele that many observers claimed would be impossible to resist or ignore In only a few years UNICEF s programs provided relief aid to millions of children in locations around the globe but the atmosphere of post war cooperation quickly supplanted by Cold War tensions caused UNICEF s efforts to be scrutinized lest they be too closely aligned with either the United States or the Soviet Bloc UNICEF remains one of the most highly regarded and effective child relief aid organizations in the world The story of its founding and its first years as an aid organization provide insight into how an international apolitical philanthropic organization must maneuver through political and cultural tensions in order to achieve its goal of mitigating human suffering
