Famine Land And Politics:

Famine, Land, and Politics Peter Gray, 1999 Explores the response of British government and public opinion to the Irish Famine in the light of contemporary debates about the nature and future of Irish society The ideological filters through which the famine was perceived are discussed and the effects of the ideological rifts within the British elite are examined The author argues that the politics of relief had been predetermined by English views of Irish society Distributed by ISBS

The politics of hunger Carl J. Griffin, 2020-02-18 The 1840s witnessed widespread hunger and malnutrition at home and mass starvation in Ireland And yet the aptly named Hungry 40s came amidst claims that notwithstanding Malthusian prophecies absolute biological want had been eliminated in England The eighteenth and early nineteenth centuries were supposedly the period in which the threat of famine lifted for the peoples of England But hunger remained in the words of Marx an unremitted pressure The politics of hunger offers the first systematic analysis of the ways in which hunger continued to be experienced and feared both as a lived and constant spectral presence It also examines how hunger was increasingly used as a disciplining device in new modes of governing the population Drawing upon a rich archive this innovative and conceptually sophisticated study throws new light on how hunger persisted as a political and biological force

The Politics of Patriotism Jonathan Parry, 2006-11-30 Parry offers an analysis of the ideas that influenced the Liberal political coalition between the 1830s and 1880s **The Oxford Handbook of Modern Irish History** Alvin Jackson, 2014-03-27 The study of Irish history once riven and constricted has recently enjoyed a resurgence with new practitioners new approaches and new methods of investigation The Oxford Handbook of Modern Irish History represents the diversity of this emerging talent and achievement by bringing together 36 leading scholars of modern Ireland and embracing 400 years of Irish history uniting early and late modernists as well as contemporary historians The Handbook offers a set of scholarly perspectives drawn from numerous disciplines including history political science literature geography and the Irish language

Famine Politics in Maoist China and the Soviet Union Felix Wemheuer,2014-06-24 During the twentieth century 80 percent of all famine victims worldwide died in China and the Soviet Union In this rigorous and thoughtful study Felix Wemheuer analyzes the historical and political roots of these socialist era famines in which overambitious industrial programs endorsed by Stalin and Mao Zedong created greater disasters than those suffered under prerevolutionary regimes Focusing on famine as a political tool Wemheuer systematically exposes how conflicts about food among peasants urban populations and the socialist state resulted in the starvation death of millions A major contribution to Chinese and Soviet history this provocative analysis examines the long term effects of the great famines on the relationship between the state and its citizens and argues that the lessons governments learned from the catastrophes enabled them to overcome famine in their later decades of rule

The Politics of Provisions John Bohstedt,2016-02-24 The elemental power of food politics has not been fully appraised Food marketing and consumption were matters of politics as much as economics as England became a market society In times of dearth concatenations of food riots repression and relief created a maturing politics of provisions Over three centuries some eight hundred riots crackled in waves across England Crowds seized wagons attacked mills and granaries and lowered prices in marketplaces or farmyards Sometimes rioters parleyed with magistrates More often both acted out a well rehearsed political minuet that evolved from Tudor risings and state policies down to a complex culmination during the Napoleonic Wars Provision politics thus comprised both customary negotiations over scarcity and hunger and negotiations of the social vessel through the turbulence of dearth Occasionally troops killed rioters or judges condemned them to the gallows but increasingly riots prompted wealthy citizens to procure relief supplies In short food riots worked in a sense they were a first draft of the welfare state This pioneering analysis connects a generation of social protest studies spawned by E P Thompson s essay on the moral economy with new work on economic history and state formation The dynamics of provision politics that emerged during England s social economic and political transformations should furnish fruitful models for analyses of total war and famine as well as broader transitions elsewhere in world history

Reframing Politics in the Hebrew Bible Mira Morgenstern, 2017-09-01 Inspired by the Enlightenment readings of Hebrew biblical texts generated in the seventeenth through the nineteenth centuries Mira Morgenstern's Reframing Politics in the Hebrew Bible goes beyond the pioneering interpretations of various biblical texts penned by such noted Bible students as Spinoza Rousseau and Angelina Grimk to present an introduction to the Hebrew Bible as a whole from the perspective of a modern day political theorist In doing so it offers a brilliant thematic guide to the Hebrew Bible's most politically salient passages complete with text and commentary Morgenstern's account of the significance of these ancient yet strangely modern texts will fascinate students of both ancient and modern political theory as well as all readers of the Hebrew Bible itself
