divorce and my safe but mundane life I accepted a job in Saudi Arabia a country that by all reports was the most austere on earth I ran headlong into an unexpected adventure that would change my life forever The Kingdom of Saudi Arabia mysterious beautiful and dangerous A land of stunning desert landscapes where modern ways co exist uneasily with ancient traditions An enigma of a place where the state executioner is revered where beautiful women shroud themselves in black and ferocious desert sandstorms turn high noon into darkest night Somewhere along the way I fell in love with the Middle East and its people their proud history and their gracious hospitality This is my story **Falling Off the Edge of Paradise** Joseph James, 2006-06 Sex with multiple females the abuse of drugs from marijuana to mushrooms and ecstasy to tobacco and cocaine to alcohol and prescription pills to paradise was probably the reason why our relationship was facing pure pandemonium We rode the surf this getaway took its toll I knew in retrospect this would happen the moment we planned the trip except we didn't remember planning it but I didn't think drugs and alcohol would spoil a good buzz this quickly Grabbing the phone from my hands with a smile Mr Edwards the blame for half of my mistakes said Its over and fell on the floor after he unplugged the phone from its outlet Paradise Island Bahamas January 2005 Joseph James and Jeffrey Edwards are two men who push life to the edge But they're on the verge of going overboard Traveling to Paradise Island from Detroit Michigan the two cousins disrespect and destroy the tourist haven in an attempt to break the paradox between total control and reckless abandon From mixing with happy families high stakes gambling and nightlife with upper society to sharing a pint of rum with a homeless local and sleeping with random women the pair's contribution to the Bahamas is nothing more than an abuse of free will and destiny **Is America Falling Off the Flat Earth?** Institute of Medicine, National Academy of Engineering, National Academy of Sciences, Norman R. Augustine, 2007-09-14 The aviation and telecommunication revolutions have conspired to make distance increasingly irrelevant An important consequence of this is that US citizens accustomed to competing with their neighbors for jobs now must compete with candidates from all around the world These candidates are numerous highly motivated increasingly well educated and willing to work for a fraction of the compensation traditionally expected by US workers If the United States is to offset the latter disadvantage and provide its citizens with the opportunity for high quality jobs it will require the nation to excel at innovation that is to be first to market new products and services based on new knowledge and the ability to apply that knowledge This capacity to discover create and market will continue to be heavily dependent on the nation's prowess in science and technology Indicators of trends in these fields are at best highly disconcerting While many factors warrant urgent attention the two most critical are these 1 America must repair its failing K 12 educational system particularly in mathematics and science in part by providing more teachers qualified to teach those subjects and 2 the federal government must markedly increase its investment in basic research that is in the creation of new knowledge Only by providing leading edge human capital and knowledge capital can America continue to maintain a high standard of living including providing national security for its citizens **Falling Off the Thin Blue Line**
