The Urban Origins of Suburban Autonomy Richardson Dilworth,2005-02-28 Using the urbanized area that spreads across northern New Jersey and around New York City as a case study this book presents a convincing explanation of metropolitan fragmentation the process by which suburban communities remain as is or break off and form separate political entities The process has important and deleterious consequences for a range of urban issues including the weakening of public finance and school integration The explanation centers on the independent effect of urban infrastructure specifically sewers roads waterworks gas and electricity networks The book argues that the development of such infrastructure in the late nineteenth century not only permitted cities to expand by annexing adjacent municipalities but also further enhanced the ability of these suburban entities to remain or break away and form independent municipalities The process was crucial in creating a proliferation of municipalities within metropolitan regions The book thus shows that the roots of the urban crisis can be found in the interplay between technology politics and public works in the American city **The American City & County** ,1987 Engineers at War (Hardcover) Adrian G Traas,2011-02-25 NOTE NO FURTHER DISCOUNT FOR THIS PRINTED PRODUCT OVERSTOCK SALE Significantly reduced list price Engineers at War describes the role of military engineers especially the U S Army Corps of Engineers in the Vietnam War It is a story of the engineers battle against an elusive and determined enemy in one of the harshest underdeveloped regions of the world Despite these challenges engineer soldiers successfully carried out their combat and construction missions The building effort in South Vietnam allowed the United States to deploy and operate a modern 500 000 man force in a far off region Although the engineers faced huge construction tasks they were always ready to support the combat troops They built ports and depots carved airfields and airstrips out of jungle and mountain plateaus repaired roads and bridges and constructed bases Because of these efforts ground combat troops with their supporting engineers were able to fight the enemy from well established bases Although most of the construction was temporary more durable facilities such as airfields port and depot complexes headquarters buildings communications facilities and an improved highway system were intended to serve as economic assets for South Vietnam
