False Dilemma Globalization Opportunity Or Threat:

The False Dilemma Oscar Ugarteche, 2000-10-16 This work argues that the economic framework of new liberalism and globalisation is forcing a false dilemma on the nations of the south The idea that they must integrate their economies into the global economy by means of export led growth or risk economic marginalisation and stagnation runs counter to the actual evidence of economic history Nor is it inevitable that state and market be in diametric opposition With clarity wit and abundant empirical evidence the author explores the internal inconsistencies of neo liberal economic theory The fundamental question is not whether to export but why And the ultimate goal of any country s economic policy must be the development of the internal market and the pursuit of social well being He lays out the case for a strong innovative and interventionist state that mediates private interest with the larger national interest The south must reject the false logic of globalisation that there is no choice and recognise instead that the real folly is to integrate with the global market without developing the internal market

Adams,2008 Laredo is a city at the crossroads of North American history Founded by the Spanish in 1755 it has stood at the intersection of regional commerce since its earliest days Now John A Adams Jr provides the first ever panoramic business and economic history of Laredo He traces the evolution of the region from its early days as a ranching center into the mid twentieth century when Laredo had become what it remains today a booming port of trade and a principal center of commerce and financial services on the southern border of the United States In *Commerce and Conflict on the Rio Grande* Adams demonstrates how the increasingly diversified economy of the region fed the fortunes of the city His narrative buttressed throughout by tables and statistics paints a vivid mural of both the economic forces and the farsighted and ambitious individuals that combined to bring prosperity to this unique American city Readers will find a wealth of insights into regional economics history and borderlands themes *The Long March to Capitalism* A. D'Costa,2005-06-14 The author captures the evolution of Indian industrial capitalism by extending the models of capitalism and regulation framework Using principally the auto industry and anchoring the analysis to the expansion of markets he demonstrates that the Indian state and businesses have been important institutions for creating markets He acknowledges significant market growth but also underscores several contradictions arising from such capitalist development There is a wealth of data which scholars policymakers and businesses will find very useful *Setting Global Standards* S. Prakash Sethi,2003-04-07 Learn how large corporations can make real improvements in their standard business practices without jeopardizing their competitiveness in the global marketplace S Prakash Sethi a preeminent business scholar and researcher on the activities of multinational corporations and global business issues outlines a number of highly effective approaches by which corporate leaders can improve their credibility and ensure the protection of the human and civil rights of their workers across the globe Order your copy today **Madaraka** Wanyee Kinuthia,2014-02-15 Madaraka is the Swahili word for self determination Article 2 of the

United Nations 1960 Declaration on the Granting of Independence to Colonial Countries and Peoples states all peoples have the right to self determination by virtue of that right they freely determine their political status and freely pursue their economic social and cultural development This book goes beyond the simplistic explanations that are routinely provided regarding the failure of corporate globalization and draws attention to the political economy of this exploitative system in order to effectively address it The book is divided into four parts The first part is comprised of the author s Master s thesis which is accessible online through the University of Ottawa Ottawa Canada as well as Library and Archives Canada This section serves as the foundation of the book by providing a critique of the political economy of corporate globalization as seen through the lens of the exploitative global corporate extractive industry which is marked by increasing inequality oppression and the exploitation of both people and the natural environment exclusively for the pursuit of profit The second part of the book focuses on Africa and provides an overview of the impact of corporate globalization on the continent The African experience also demonstrates the contemporary relevance of dependency theory and how the continent s dependence on export led growth is enforced via Africa s illegitimate debt burden This explains why African states have been unable to diversify from their dependence on natural resources and chart independent economic paths The third part of the book discusses the securitization of U S foreign economic policy corporate globalization via the U S led War on Terror and explores a number of initiatives along the security development nexus These include the U S s National Security Strategy NSS and the Millennium Challenge Account MCA This section also discusses the subject of fragile failed states and explains the basic rationale behind U S foreign economic policy that fragile failed states need to embrace neoliberal economic corporate globalization through market led policies in order to overcome poverty and cease being threats to the more ordered parts of the world The final part of the book critiques The 9 11 Commission Report which contains the official account of the 9 11 terrorist attacks and is used to justify the U S led War on Terror However this key document lacks sufficient evidence and cannot be used to support a prosecutable case in any court of law The final part of the book goes a step further and explores the use of state terrorism by Northern countries particularly the U S in its efforts to spread its foreign economic policy corporate globalization worldwide This section also discusses the historical use of false flag terrorism by Northern countries in order to further their foreign policy objectives including well known and documented examples such as Operation Northwoods Operation Gladio and The Lavon Affair The book concludes by proposing a radical but necessary solution to the crisis of corporate globalization that we challenge the authenticity of The 9 11 Commission Report and therefore the legitimacy of the U S led War on Terror More specifically that we demand a new and independent investigation into the events surrounding 9 11 as this is an indispensable prerequisite to de securitizing U S foreign economic policy corporate globalization 9 11 is the Achilles Heel of the entire system of economic exploitation and oppression via neoliberal economic corporate globalization a system whose main objective is to open up the economies of developing

countries to corporations which are mostly based in Northern countries so that these corporations can increase their market share and thereby the wealth of Northern elites Website www.madaraka.net
