**Status Update** Alice E. Marwick, 2013-11-28 Social media technologies such as YouTube Twitter and Facebook promised a new participatory online culture Yet technology insider Alice Marwick contends in this insightful book Web 2.0 only encouraged a preoccupation with status and attention Her original research which includes conversations with entrepreneurs Internet celebrities and Silicon Valley journalists explores the culture and ideology of San Francisco's tech community in the period between the dot com boom and the App store when the city was the world's center of social media development Marwick argues that early revolutionary goals have failed to materialize while many continue to view social media as democratic these technologies instead turn users into marketers and self promoters and leave technology companies poised to violate privacy and to prioritize profits over participation Marwick analyzes status building techniques such as self branding micro celebrity and life streaming to show that Web 2.0 did not provide a cultural revolution but only furthered inequality and reinforced traditional social stratification demarcated by race class and gender
