*A comparison of two handbooks of family therapy techniques: Ten years later*

Davis, K. (1996). *Families: A handbook of concepts and techniques for the helping professional*. Pacific Grove, CA: Brooks/Cole Publishing Co.

Sherman, R. & Fredman, N. (1986). *Handbook of structured techniques in marriage and family therapy*. New York, NY: Brunner/Mazel.

*Reviewed by:* Ron Lehr, University of Northern British Columbia and Edward Epp, Terrace, B.C.

Finally, I thought, a new handbook (that is, Davis, 1996) to aid the family practitioner in their day-to-day work with families! Unfortunately, and much to my dismay, my initial excitement quickly subsided. A first skimming of the book left me less than inspired. Definitions of terms like "roles," "rules" and "expectations" seem shallow and without obvious connection to theory. Not clearly explained is the use of the Evan's family as a motif for exploration of concepts throughout the book. Genealogical constructions and family poems ("Dirty Socks," "Stewed Tomatoes," and "Securily") seem to dangle arbitrarily. "The Connection Chart," eight pages of index items, is not well clarified by the author. After this clumsy introduction, the book abruptly launches into 90 pages of "Concepts." This alphabetical listing of therapeutic interventions begins with Accountability and goes into World View. Once again, there is no introduction to this material. Fitting on a single page, each concept is briefly developed: headings of source, brief description, initial statement, and follow-up techniques.

Dutifully, I read each one of the 90 concepts in this handbook. The potential value of this listing took me a long time to recognize. A tight, condensed listing of these concepts brought together in one place may have some value as an index or bibliography. It may also serve a search function by placing both the publication and the author at the top of the page. For some, this information alone might make this handbook worth purchasing.

Davis follows the section on "Concepts," with a hundred pages, in alphabetical order of "Techniques." Regrettably again, there is no introductory explanation. For the astute therapist, this would not be problematic but for the novice, a more thorough explanation would be more helpful. Criticism aside, the techniques themselves could be very useful for the therapist with a solid understanding of the underlying theory.

The final two sections of Davis' book outline a collection of approaches under the heading of "Guidelines" and "Worksheets." Only after reading these worksheets (on anger, caring days, etc.), did I recognize that these had been referred to throughout the text at the bottom of each page under the heading "Follow-up." Linking these practical handshets with a theory is a helpful tool.

Davis' book suffers from a weak and non-directed introduction and an absence of explanation about both its purpose and its use. However, after

**The Psychology of Executive Coaching** Bruce Peltier, 2011-04-27 With the first edition of this text Peltier drew on his extensive experience in both the clinical and business worlds to create a comprehensive resource that brought psychological and coaching concepts together. It quickly became a practical and invaluable guide for both mental health practitioners looking to expand their practice into coaching and business professionals interested in improving their own coaching skills. In this updated edition, topics reflect the latest developments in the field of executive coaching. Peltier describes several important psychological theories and how to effectively translate them into coaching strategies, essential business lessons in leadership, marketing, and the corporate viewpoint, along with vocabulary for the therapist, the challenges women face as managers and executives, and effective coaching methods for working with them, and lessons from successful athletic coaches that can be integrated into consulting skills. This edition includes four new chapters: one describing psychopathology likely to be encountered by coaches, another describes and evaluates emotional intelligence, a third summarizes adult developmental theory for coaches, and a fourth sorts out the popular and scientific literature on leadership and leader development.

*Families* Kenneth Davis, 1996 In this handbook Kenneth Davis takes an uncomplicated how-to approach and offers an exceptionally wide range of concepts and techniques to choose from. He brings together in one convenient, thorough source the key concepts in family therapy and the techniques appropriate for implementing them. Theory comes to life as concepts are applied to practical techniques. Numerous detailed worksheets will help beginning and experienced therapists in their work with clients.
