and Child Labour in the British Industrial Revolution Jane Humphries,2010-06-24 This is a unique account of working class childhood during the British industrial revolution first published in 2010 Using more than 600 autobiographies written by working men of the eighteenth and nineteenth centuries Jane Humphries illuminates working class childhood in contexts untouched by conventional sources and facilitates estimates of age at starting work social mobility the extent of apprenticeship and the duration of schooling The classic era of industrialisation 1790 1850 apparently saw an upsurge in child labour While the memoirs implicate mechanisation and the division of labour in this increase they also show that fatherlessness and large subsets common in these turbulent high mortality and high fertility times often cast children as partners and supports for mothers struggling to hold families together The book offers unprecedented insights into child labour family life careers and schooling Its images of suffering stoicism and occasional childish pleasures put the humanity back into economic history and the trauma back into the industrial revolution Ecology, Economy and State Formation in

Early Modern Germany Paul Warde,2006-06-29 This is an innovative analysis of the agrarian world and growth of government in early modern Germany through the medium of pre industrial society s most basic material resource wood Paul Warde offers a regional study of south west Germany from the late fifteenth to the early eighteenth century demonstrating the stability of the economy and social structure through periods of demographic pressure warfare and epidemic He casts light on the nature of wood shortages and societal response to environmental challenge and shows how institutional responses largely based on preventing local conflict were poor at adapting to optimise the management of resources Warde

further argues for the inadequacy of models that oppose the market to a natural economy in understanding economic behaviour This is a major contribution to debates about the sustainability of peasant society in early modern Europe and to the growth of ecological approaches to history and historical geography **Microhistories** Barry Reay,2002-11-07

Microhistories Demography Society and Culture in Rural England 1800 1930 uses a local study of the Blean area of Kent in the nineteenth and early twentieth centuries to explore some of the more significant societal changes of the modern western world Drawing on a wide range of research techniques including family reconstitution and oral history Barry Reay aims to show that the implication of the micro study can range way beyond its modest geographical and historical boundaries Combining cultural demographic economic and social history in a way rarely encountered in historical literature Professor Reay examines a range of topics including marriage and fertility health and mortality the work of women and children and illegitimacy and sexuality This 1996 book demonstrates the challenging potentials of microhistory and makes a central contribution to the new rural history It will be of interest to family and oral historians as well as to demographers and sociologists **The Royal Prerogative and the Learning of the Inns of Court** Margaret McGlynn,2004-12-20 Margaret McGlynn examines legal education at the Inns of Court in the late fifteenth early sixteenth century *The Ashgate Companion to the History of Textile Workers, 1650-2000* Dr Elise van Nederveen Meerkerk,Mr Els Hiemstra-Kuperus,Prof Dr Lex Heerma van Voss,2013-06-28 This impressive collection offers the first systematic global and comparative history of textile workers over the course of 350 years This period covers the major changes in wool and cotton production and the global picture from pre industrial times through to the twentieth century After an introduction the first part of the book is divided into twenty national studies on textile production over the period 1650 2000 To make them useful tools for international comparisons each national overview is based on a consistent framework that defines the topics and issues to be treated in each chapter The countries described have been selected to included the major historic producers of woollen and cotton fabrics and the diversity of global experience and include not only European nations but also Argentina Brazil China Egypt India Japan Mexico Turkey Uruguay and the USA The second part of the book consists of ten comparative papers on topics including globalization and trade organization of production space identity workplace institutions production relations gender ethnicity and the textile firm These are based on the national overviews and additional literature and will help apply current interdisciplinary and cultural concerns to a subject traditionally viewed largely through a social and economic history lens Whilst offering a unique reference source for anyone interested in the history of a particular country s textile industry the true strength of this project lies in its capacity of international comparison By providing global comparative studies of key textile industries and workers both geographically and thematically this book provides a comprehensive and contemporary analysis of a major element of the world s economy This allows historians to challenge many of the received ideas about globalization for instance highlighting how global competition for lower production costs is by no means a uniquely modern

issue and has been a feature of textile production for much of the last 350 years As such this collection will be welcomed by all scholars engaged in the history of the textile industry and international trade

A Living Landscape Stijn Arnoldussen, 2008 Today half the Netherlands is below sea level Because of this water management is of key importance when it comes to maintaining present day habitation of the Dutch low lands In prehistory however large parts of the Dutch landscape were highly dynamic due to ongoing fluvial sedimentation Vast deltaic areas with ceaseless river activity formed the backdrop against which prehistoric occupation took place Although such landscapes may seem inhospitable the often excellently preserved archaeological evidence indicates that people lived in these lowlands throughout prehistory This book describes why Bronze Age farmers were keen to settle here and how these prehistoric communities structured the landscape around their house sites at various scales Using a vast body of evidence from several large scale excavations in the Dutch river area the author reconstructs the changes in the cultural landscape over time Starting from the Middle Neolithic changing preferences for settlement site locations and changes in domestic architecture are traced in detail to the Iron Age However for proper understanding of the cultural landscape not only settlements but also graves and patterns of object deposition and their landscape characteristics are discussed By using evidence from over 50 major excavations yielding over 300 house plans this book contains by far the richest data set on Dutch Bronze Age settlements Most of these results have not previously been published in English making this book of over 500 pages a true academic treasure for an international audience The in depth presentation of Bronze Age settlement sites as well as the critical discussion of models and premises current in later prehistoric settlement archaeology have an important relevance stretching beyond the Dutch lowland areas on which it is based The wealth of high quality Dutch data is presented as a synthesized yet well annotated narrative that rises above mere site interpretation even more so due to its landscape scale focus Therefore this book is a must have for those interested in later prehistoric cultural landscapes and settlement archaeology

The Stem Family in Eurasian Perspective Antoinette Fauve-Chamoux, Emiko Ochiai, 2009 Is the Asian stem family different from its European counterpart This question is a central issue in this collection of essays assembled by two historians of the family in Eurasian perspective The stem family is characterized by the residential rule that only one married child remains with the parents This rule has a direct effect upon household structure In short the stem family is a domestic

unit of production and reproduction that persists over generations handing down the patrimony through non egalitarian inheritance In spite of its ambiguous status in current family typology as something lurking in the valley between the nuclear family and the joint family the stem family was an important family form in pre industrial Western Europe and has been a focus of the European family history since Fr d ric Le Play and more recently Peter Laslett However the encounter with Asian family history has revealed that many areas in Asia also had and still have a considerable proportion of households with a stem family structure The stem family debate has entered a new stage In this book some studies that benefited from recently created large databases present micro level analyses of dynamic aspects of family systems while others discuss more broadly the rise and fall of family systems past and present A main concern of this book is whether the family type in a society is ethno culturally determined and resistant to changes or created by socio economic conditions Such a comparison that includes Asian countries activates a new phase of the discussion on the stem family and family systems in a global perspective
