Family Evaluation:

Family Evaluation Murray Bowen, Michael E. Kerr, 2009-08-01 The concepts of Murray Bowen one of the founders of family therapy and the originator of family systems theory are brought together here in an integrative fashion Michael Kerr who worked with Bowen for many years and Bowen propose that the enormously complex task of evaluating a clinical family can be orderly when it is grounded in family systems theory Using family diagrams and case studies the book is devoted to an elegant explication of Bowen theory which analyzes multigenerational family relationships and conceptualizes the family as an emotional unit or as a network of interlocking relationships not only among the family members but also among biological psychological and sociological processes Bowen's persistent inquiry and devotion to family observation in spite of obstacles and frustrations have resulted in a theory that has radically changed our ways of looking at all behavior The Family Systems Test (FAST) Thomas M. Rait, Alison M. Heru, Michael Ascher, 2015-10-26 *Couples and Family Therapy in Clinical Practice* has been the psychiatric and mental health clinician's trusted companion for over four decades. This new fifth edition delivers the essential information that clinicians of all disciplines need to provide effective family centered interventions for couples and families. A practical clinical guide it helps clinicians integrate family systems approaches with pharmacotherapies for individual patients and their families. *Couples and Family Therapy in Clinical Practice* draws on the authors' extensive clinical experience as well as on the scientific literature in the family systems psychiatry, psychotherapy and neuroscience fields. **Family Assessment** Len Sperry, 2012 In an era that demands ever increasing levels of accountability and documentation Family Assessment is a vital tool for clinicians. It provides the same comprehensive evaluation and thorough analysis as the first edition but with a fully updated focus that will invigorate the work of researchers, educators and clinicians. **New Directions in Health Psychology Assessment** Harold E. Schroeder, 1991 This work offers the results of a meeting held at the Applied Psychology Center of Kent State University in 1987 to examine current methods and future proposals in the assessment of what family, social and work factors contribute to the health of people and communities. Amongst the topics covered are how to assess quality of life, family behaviour with regard to health, the assessment of health risks associated with work and how the physical environment affects children's health. **The Art and Science of Assessment in Psychotherapy** Chris Mace, 2003-09-02 While professional trainings in psychotherapy and counselling vary considerably in the attention they pay to assessment, courses, conferences and workshops devoted to the subject are attracting an audience eager for more demonstration and discussion. In response *The Art and Science of Assessment in Psychotherapy* offers an extended symposium on principles and practice. Guided by a belief that comparative study will spur critical reflection and innovation, its presentations encompass a wide range of therapeutic orientations, settings and interests. In the book, twelve distinguished practitioners of widely used approaches within psychotherapy describe the methods they use in their assessments and how these have developed. They also discuss the uses and limitations of the therapies they offer. The approaches covered include psychoanalytic psychotherapy, patient psychotherapy, family therapy, group psychotherapy, psychodrama, cognitive behaviour therapy, couple therapy and focal therapy. Additional chapters look at assessment in the light of psychotherapy research, question how far assessment can be separated from treatment and ask whether the use of questionnaires and special tests aids or detracts from interviewing as a method of assessment. As psychotherapy matures as a profession, both chronologically and in response to public demand, interest in assessment methods is growing. Yet to date the published material has been limited and dispersed amongst specialist books and journals. *The Art and Science of Assessment in Psychotherapy* offer the first comprehensive practical review of a key professional issue which will be of interest to all practising psychotherapists and counsellors. **Assessment of Parenting** Dr Peter Reder, Clare Lucey, 2014-02-04 These are the sorts of questions that face mental health practitioners who are increasingly involved in complex child care cases which

come before the courts They have been given little guidance to date on how these assessments should be made especially where a decision has to be taken as to whether a child has experienced significant harm In this much needed book senior clinicians consider the principles and practice of parenting assessments and how they guide courts decisions about children s welfare They describe a number of frameworks for assessment and discuss the factors which help predict the risk of future maltreatment or the likelihood of successful rehabilitation Throughout the book the emphasis is on the need to integrate the assessments of all relevant professionals in order to serve the best interests of the child while also addressing the parents potential to improve their caretaking skills Offering guidance in areas of crucial significance for child family and professional alike Assessment of Parenting will be widely welcomed Advanced Pediatric Assessment Ellen M. Tennenbaum,2013-11-21 The purpose of this book is to review existing and developing family assessment methods relevant to the study of psycho pathology It is our intention not only to inform clinical re searchers of the many valuable family

assessment methods that are available but also to encourage the incorporation of such procedures into future research efforts. In so doing we believe that our understanding of the etiology, course, treatment, and prevention of adult and childhood disorders will be greatly enriched. The book begins with an overview of the larger social and intellectual forces which have led to the current interest in studying family influences on psychopathology in children and adolescence. For each stream of influence we attempt to highlight theoretical and methodological contributions relevant to the family's role in the etiology, exacerbation, and treatment of childhood disorders. Next, a framework for classifying family measurement procedures is introduced in which three major dimensions are emphasized: unit of analysis, source of data, and construct assessed. The third and most important chapter provides detailed reviews of a selected number of methods within each of the major groupings that have been delimited. References and brief descriptions of other measures that cannot be reviewed in detail and a discussion of the promising and developing techniques that are known to the authors.
