Going to the Countryside Yu Zhang,2020-03-03 Since the beginning of the twentieth century modern Chinese intellectuals reformers revolutionaries leftist journalists and idealistic youth had often crossed the increasing gap between the city and the countryside which made the act of going to the countryside a distinctively modern experience and a continuous practice in China Such a spatial crossing eventually culminated in the socialist state program of down to the villages movements during the 1960s and 1970s What then was the special significance of going to the countryside before that era Going to the Countryside deals with the cultural representations and practices of this practice between 1915 and 1965 focusing on individual homecoming rural reconstruction revolutionary journeys to Yan an the revolutionary going down to the people as well as going to the frontiers and rural hometowns for socialist construction As part of the larger discourses of enlightenment revolution and socialist industrialization going to the countryside entailed new ways of looking at the world and ordinary people brought about new experiences of space and time initiated new means of human communication and interaction generated new forms of cultural production revealed a fundamental epistemic shift in modern China and ultimately created a new aesthetic social and political landscape As a critical response to the urban turn in the past few decades this book brings the rural back to the central concern of Chinese cultural studies and aims to bridge the city and the countryside as two types of important geographical entities which have often remained as disparate scholarly subjects of inquiry in the current state of China studies Chinese modernity has been characterized by a dual process that created

problems from the vast gap between the city and the countryside but simultaneously initiated constant efforts to cope with the gap personally collectively and institutionally The process of crossing two distinct geographical spaces was often presented as continuous explorations of various ways of establishing the connectivity interaction and relationship of these two imagined geographical entities Going to the Countryside argues that this new body of cultural productions did not merely turn the rural into a constantly changing representational space most importantly the rural has been constructed as a distinct modern experiential and aesthetic realm characterized by revolutionary changes in human conceptions and sentiments

Hsieh Bao Hua, 2014-06-18 In the long course of late imperial Chinese history servants and concubines formed a vast social stratum in the hinterland along the Grand Canal particularly in urban areas Concubinage and Servitude in Late Imperial China is a survey of the institutions and practice of concubinage and servitude in both the general populace and the imperial palace with a focus on the examination of Ming Qing political and socioeconomic history through the lives of this particular group of distinct yet associated individuals The persistent theme of the book is how concubines appointed by patriarchal polygamy and servants laboring under the master servants hierarchy experienced interactions and mobility within each institution and in associating with the other While reviewing how ritual and law treated concubines and servants as patriarchal possessions the author explores the perspectives available for individual concubines and servants and the limitations in their daily circumstances searching for their positional powers and privilege of the inferiors in the context of Chinese culture during the Ming Qing time period For a list of the book's tables and their sources please see <http://www.wou.edu/wp/hsiehb> **The Confucian-Legalist State** Dingxin Zhao, 2015-10-16 In The Confucian-Legalist State Dingxin Zhao offers a radically new analysis of Chinese imperial history from the eleventh century BCE to the fall of the Qing dynasty This study first uncovers the factors that explain how and why China developed into a bureaucratic empire under the Qin dynasty in 221 BCE It then examines the political system that crystallized during the Western Han dynasty a system that drew on

China's philosophical traditions of Confucianism and Legalism. Despite great changes in China's demography, religion, technology, and socioeconomic structures, this Confucian Legalist political system survived for over two millennia. Yet it was precisely because of the system's resilience that China, for better or worse, did not develop industrial capitalism as Western Europe did, notwithstanding China's economic prosperity and technological sophistication beginning with the Northern Song dynasty. In examining the nature of this political system, Zhao offers a new way of viewing Chinese history, one that emphasizes the importance of structural forces and social mechanisms in shaping historical dynamics. As a work of historical sociology, *The Confucian Legalist State* aims to show how the patterns of Chinese history were not shaped by any single force but instead by meaningful activities of social actors which were greatly constrained by and at the same time reproduced and modified the constellations of political, economic, military, and ideological forces. This book thus offers a startling new understanding of long-term patterns of Chinese history, one that should trigger debates for years to come among historians, political scientists, and sociologists.

Chinese Popular Culture and Ming Chantefables Anne McLaren, 2022-02-22 In 1967, a body of Chinese texts was discovered in a tomb outside Shanghai. It contained a set of unique examples of an oral genre favoured by unlearned classes in the late imperial period, 15th-century best-sellers called chantefables, appearing at the beginning of a profound historical shift which resulted in a broadening of the uses of writing and printing in China. These texts are now generally seen to occupy an important place in the development of Chinese literature as a whole and of Chinese vernacular literature in particular. In the first monographic treatment of all the chantefable corpus in English, the author, by examination from a more anthropological viewpoint, points out that these oral traditional texts can only be appreciated in the festival, ritual, and performative context of their derivation and reception. Topics dealt with in this important work include the popular interpretation of Confucian orthodoxies, the literary recycling of the oral tradition, and the influence of chantefables on the development of Chinese vernacular fiction. The author offers an interesting comparative perspective on the different social consequences of print technology in China and the West. Illustrations of ten chantefable woodblocks are included.

Japan versus China in the Industrial Race Wei-Bin Zhang, 1998-11-12 Why has Japanese industrialisation been so much faster than that of China? The relative economic development of Japan and China from similar nineteenth-century conditions are examined in broad philosophical, social,

political and historical perspective The book challenges a common assumption that Chinese Confucianism does not encourage modernisation while Japanese Confucianism propelled industrialisation forward It examines further reasons why Max Weber s judgement the Chinese would be probably more capable than the Japanese of assimilating capitalism has not been borne out Bound Feet, Young Hands Laurel Bossen, Hill Gates, 2017-01-25 Footbinding was common in China until the early twentieth century when most Chinese were family farmers Why did these families bind young girls feet And why did footbinding stop In this groundbreaking work Laurel Bossen and Hill Gates upend the popular view of footbinding as a status or even sexual symbol by showing that it was an undeniably effective way to get even very young girls to sit still and work with their hands Interviews with 1 800 elderly women many with bound feet reveal the reality of girls hand labor across the North China Plain Northwest China and Southwest China As binding reshaped their feet mothers disciplined girls to spin weave and do other handwork because many village families depended on selling such goods When factories eliminated the economic value of handwork footbinding died out As the last generation of footbound women passes away Bound Feet Young Hands presents a data driven examination of the social and economic aspects of this misunderstood custom
