Introduction to Human Development and Family Studies Bridget A. Walsh,Dana A. Weiser,Lydia DeFlorio,Melissa

M. Burnham, 2017-03-31 Introduction to Human Development and Family Studies is the first text to introduce human development and family studies HDFS as inextricably linked areas of study giving students a complex yet realistic view of individuals and families. Pioneers of research paradigms have acknowledged that the family is one setting in which human development occurs. Moreover, in many academic programs the lines of these two disciplines blur and much work is inherently multidisciplinary and interdisciplinary. This book helps to fortify an understanding of HDFS and subareas within it. Vignettes from current HDFS students as well as new professionals, an overview of the lifespan stages within the family context, a wide description of research methods and applications, current policy issues relevant to the area, and discussions of practice careers coupled with strategies for pursuing specializations or careers in the area are hallmarks of this textbook. Introduction to Human Development and Family Studies is essential reading for students new to the major and minor wanting to know: What is HDFS? Who are the people involved in HDFS? Why is HDFS important? How does theory and research inform work in HDFS? What does the pursuit of being an ethical professional require? What are the key areas in HDFS? Incredibly user friendly both on the page and online, the text also features the following resources: Chapter Summaries where the main points of each chapter are pinpointed at the end of every chapter for review and study; Key Terms listed and defined within the margins of every chapter; a complete Glossary at the end of the text; and Flashcards online for additional review and study. Challenge Integration section at the end of each chapter that underscores concepts from the chapter and draws connections between content presented in other chapters; Journal Questions to encourage reflection about the content and encourage thinking about some of the content coupled with students' own experiences; Suggested Resources that lists relevant websites, books, articles, and video links for further study; A Closer Look at Applied Experiences; Appendix outlines the internship process and shows how the internship experience can be meaningful and useful; and a Consuming Research Appendix that focuses on what it means to be a consumer of research, the knowledge and skills consumers need, and considerations for transitioning from a consumer of research to a producer of research.

Hartas,2014-01-30 Western societies face many challenges The growing inequality and the diminishing role of the welfare state and the rapid accumulation of the resources of a finite planet at the top 1% have made the world an inhospitable place to many families Parents are left alone to deal with the big societal problems and reverse their impact on their children s educational achievement and life chances The average working family is sliding down the social ladder with a significant impact on children s learning and wellbeing We now know that parental involvement with children s learning although important in its own right is not the primary mechanism through which poverty translates to underachievement and reduced social mobility Far more relevant to children s learning and emotional wellbeing is their parents income and educational qualifications The mantra of what parents do matters is hypocritical considering the strong influence that poverty has on parents and children We can no longer argue that we live in a classless society especially as it becomes clear that most governmental reforms are class based and affect poor families disproportionately In this book Dimitra Hartas explores parenting and its influence on children s learning and wellbeing while examining the impact of social class amidst policy initiatives to eradicate child poverty in 21st Century Britain **God's Grace for Every Family** Anna Meade
