Timothy J. Hoff, 2022-03-01 With family doctors increasingly overburdened bureaucratized and burned out how can the field change before it's too late Over the past few decades as American medical practice has become increasingly specialized the number of generalists doctors who care for the whole person has plummeted On paper family medicine sounds noble in practice though the field is so demanding in scope and substance and the health system so favorable to specialists that it cannot be fulfilled by most doctors In *Searching for the Family Doctor* Timothy J Hoff weaves together the early history of the family practice specialty in the United States with the personal narratives of modern day family doctors By formalizing this

area of practice and instituting specialist level training requirements the originators of family practice hoped to increase respect for generalists improve the pipeline of young medical graduates choosing primary care and in so doing have a major positive impact on the way patients receive care Drawing on in depth interviews with fifty five family doctors Hoff shows us how these medical professionals have had their calling transformed not only by the indifferent acts of an unsupportive health care system but by the hand of their own medical specialty a specialty that has chosen to pursue short over long term viability conformity over uniqueness and protectionism over collaboration A specialty unable to innovate to keep its membership cohesive and focused on fulfilling the generalist ideal The family doctor Hoff explains was conceived of as a powered up version of the country doctor idea At a time when doctor patient relationships are evaporating in the face of highly transactional fast food style medical practice this ideal seems both nostalgic and revolutionary However the realities of highly bureaucratic reimbursement and quality of care requirements educational debt and ongoing consolidation of the old fashioned independent doctor s office into corporate health systems have stacked the deck against the altruists and true believers who are drawn to the profession of family practice As more family doctors wind up working for big health care corporations their career paths grow more parochial balkanizing the specialty Their work roles and professional identities are increasingly niche oriented Exploring how to save primary care by giving family doctors a fighting chance to become the generalists we need in our lives Searching for the Family Doctor is required reading for anyone interested in the troubled state of modern medicine *CURRENT Diagnosis & Treatment in Family Medicine, Third Edition* Jeannette E.
