Handbook of Marriage and the Family Suzanne K. Steinmetz,Marvin B. Sussman,2013-11-11 The lucid straightforward Preface of this Handbook by the two editors and the comprehensive perspec

tives offered in the Introduction by one of them leave little for a Foreword to add. It is therefore limited to two relevant but not intrinsically related points: vis à vis research on marriage and the family in the interval since the first Handbook. Christensen 1964 appeared, namely the impact on this research of the politicization of the New Right and of the Feminist Enlightenment beginning in the mid sixties about the time of the first Handbook. In the late 1930s Willard Waller noted: Fifty years or more ago about 1890 most people had the greatest respect for the institution called the family and wished to learn nothing whatever about it. Everything that concerned the life of men and women and their children was shrouded from the light. Today much of that has been changed. Gone is the concealment of the way in which life begins, gone the irrational sanctity of the home. The aura of sentiment which once protected the family from discussion clings to it no more. We want to learn as much about it as we can and to understand it as thoroughly as possible, for there is a rising recognition in America that vast numbers of its families are sick from internal frustrations and from external buffeting. We are engaged in the process of reconstructing our family institutions through criticism and discussion. 1938 pp 3-4

Handbook of Marriage and the Family Marvin B. Sussman, Suzanne K. Steinmetz, Gary W. Peterson, 2013-06-29

To know where we are going as scholars, educators and practitioners in the field of marriage and family life, we first need to know where we have been. A perusal of early texts on marriage and family life provides some thought-provoking insights into the accuracy of the saying: what goes around comes around. It is interesting to note who has been considered to be in a position to provide information on marriage and family life. Included in the eclectic collection of texts we reviewed were ministers whose focus was on spirituality, doctors who emphasized medical aspects of child and adult health and public health professionals and home economists concerned with fighting disease, who emphasized cleanliness, order, fighting germs and eliminating rodents and insects. There are also philosophers who drew from ancient texts when discussing family life and a count who assembled a group of German intellectual elites to address various topics. An insightful essay of this type is by Marta Karlweis 1926 in which she notes: There is no other fetish that society holds to so firmly as the conception of woman with all its usual associations of infantilism and dependence. The child requires protection, is a minor and consequently a serf, but above all it possesses no spiritual existence. Neither doctorates or other distinctions nor the right to vote have as yet been able to dispel this sweet idea of the childishness of woman which man cherishes.
