**Family Constellations in Contemporary Ibero-American and Slavic Literatures** Anna Artwińska,Ángela Calderón,Jobst Welge,2024-10-07 This volume examines Ibero American as well as Slavic literatures of the 21st century and studies how historical imaginaries in family narratives are functionalized for both individual and collective and post national

identities The analysis proceeds along three conceptual axes What these narratives have in common is that they construct specific constellations of the historical imagination and of family whereby family is here conceived not so much as an organic micro unity but rather as changing multiple relations between individual members godparents first and second degree relatives non blood related family members present and absent members adopted children etc Furthermore these novels are often grounded in trans generational memories They are written by members of a generation that as a rule did not directly experience these historical events It is also significant that these narratives are no longer conceived as representing national identities but paradigmatically speak for a collective that defines itself in regional ethnic religious or ideological terms It seems therefore that these narratives of family constellations are in need of more flexible typological rubrics and interpretive frameworks Intended as a sustained comparative study of these family narratives this volume is a contribution in understanding how historical caesura experiences and their literary representation work on the self understanding of the present
