Family Houses In The Country:

Family Houses in the Country Alexandra d' Arnoux, Gilles de Chabaneix, 2000 In this charming and evocative book Alexandra d' Arnoux provides portraits of country houses where decorative details combine with family traditions to create a memorable and timeless atmosphere *Family Houses in the Country* takes us to gracious retreats in the woods and hillsides real homes imbued with the spirit of the families who delight in living with them Author Alexandra d' Arnoux and photographer Gilles de Chabaneix travel through the United States England Scotland Italy and France to find remarkable houses with beautiful comfortable interiors We visit a family homestead in California s Napa Valley a place of eternal summer We experience the isolated strangely welcoming manor of Kerdaoualas on a hill in Brittany And we find that an architecturally intriguing home in Shropshire once housed a medieval abbey **Contemporary Architects** Muriel Emanuel, 2016-01-23 **Housing in America** Marijoan Bull, Alina Gross, 2022-12-30 Housing is a fundamental need and universal part of human living that shapes our lives in profound ways that go far beyond basic sheltering Where we live can determine our self image social status health and safety quality of public services access to jobs and transportation options But the reality for many in America is that housing choices are constrained costs are unaffordable discriminatory practices remain and physical features do not align with needs We have made a national commitment to decent housing for all yet this promise remains unrealized *Housing in America* provides a broad overview of the field of housing The evolution of housing norms and policy is explored in a historical context while underscoring the human and cultural dimensions of housing program choices Specific topics covered include why housing matters housing and culture housing frameworks and political ideologies housing and opportunities housing and the economy housing discrimination housing affordability rental housing and housing and climate change Readers will gain an understanding of the basic debates within the field of housing consider the motivations and performance of various interventions and critically examine persistent patterns of racial and class inequality With short case studies primary source materials reflective exercises strong visuals and interviews with practitioners this introductory text explores improving housing choices in America Tremaine Houses Volker M. Welter, 2019-11-19 This volume analyzes the extraordinary patronage of modern architecture that the Tremaine family sustained for nearly four decades in the mid twentieth century From the late 1930s to the early 1970s two brothers Burton G Tremaine and Warren D Tremaine and their respective wives Emily Hall Tremaine and Katharine Williams Tremaine commissioned approximately thirty architecture and design projects Richard Neutra and Oscar Niemeyer designed the best known Tremaine houses Philip Johnson and Frank Lloyd Wright also created designs and buildings for the family that achieved iconic status in the modern movement Focusing on the Tremaines houses and other projects such as a visitor center at the meteor crater in Arizona this volume explores the Tremaines architectural patronage in terms of the family s motivations and values exposing patterns in what may appear as an eclectic collection of modern architecture Architectural

historian Volker M Welter argues that the Tremaines patronage was not driven by any single factor rather it stemmed from a network of motives comprising the clients practical requirements their private and public lives and their ideas about architecture and art

One Hundred Years of Zoning and the Future of Cities Amnon Lehavi,2017-10-04 This book reconsiders the fundamental principles of zoning and city planning over the course of the past one hundred years and the lessons that can be learned for the future of cities Bringing together the contributions of leading scholars representing diverse methodologies and academic disciplines this book studies core questions about the functionality of cities and the goals that should be promoted via zoning and planning It considers the increasing pace of urbanization and growth of mega cities in both developed and developing countries changing concepts on the role of mixed use and density zoning new policies on inclusionary zoning as a way to facilitate urban justice and social mobility and the effects of current macrophenomena such as mass immigration and globalization on the changing landscape of cities The book s twelve chapters are divided into four parts each addressing different aspects of zoning and planning by combining theoretical analysis with a close observation of diverse case studies from North America and Europe to the Middle East and developing economies Part I offers a critical analysis of the conventional account of zoning as a top down form of land use regulation starting with the 1916 NYC code Part II studies

how contemporary concepts of zoning both substantive and procedural impact the built environment across today's cities
Part III revisits the economic foundations of zoning and urban policy in the context of domestic markets as compared with the regulatory and market effects of interstate agreements on cross border real estate investments Part IV analyzes the dominant yet often implicit social and political motives that are driving zoning policies across different countries This volume's focus on the ties between zoning policy and economics politics socioeconomic conditions and the local to global scope of governance will appeal to scholars and students of political science economics law planning sustainability geography sociology and architecture as well as policy makers and practitioners especially those in developing countries and transitional and emerging economies
