Heyneman,2004 At a time when more nuanced understandings of Muslim countries and their legal and social practices are urgently needed in the West the appearance of this collection is especially welcome In these illuminating and accessible essays the contributors explain how Islam sees itself in terms of social policy how it treats women and how it encourages charity education and general social welfare The essays encompass many regional cultures and draw on court records and legal debates field work on government ministries and an extensive reading of Islamic law In his overview of waqf similar to the Western idea of a foundation in which an endowment is set aside in perpetuity for specified purposes Ahmad Dallal explains how charity a central organizing principle in Islam is itself organized and how waqf traditionally a source of revenue for charitable purposes can also become a source of tension and conflict Donna Lee Bowen in her essay on the position of women in Islamic law points out the crucial differences between the Islamic principles of family equity and the Western notion of individual equality In a subsequent essay Bowen addresses the problems surrounding family planning and the dilemmas that have arisen within the Muslim world over differing ideas about birth control The two final essays look at specific instances of how the modern state has treated Islamic social policy Gail Richardson examines zakat an Islamic tax used to assist the poor and its administration in Pakistan Carol Underwood meanwhile explores public health policy in Iran both before and after the Islamic revolution that deposed the Shah Addressing some of the most profound misunderstandings between Islamic and Western societies Islam and Social Policy will be of vital interest not only to scholars and policymakers but to anyone concerned with Islam s critical place in the modern world *The Great Social Laboratory* Omnia El

There has been much scholarly debate on the politically disruptive capabilities of Islam and the threats to global security posed by or to Muslim states and societies but within this dialogue there has been little recognition of the role of population

policies in security issues Katrina Riddell's study focuses specifically on Islam and the securitization of population policies and sustainability Opening with a discussion of contemporary population discourses and their historical foundations the book examines how population growth has become an international security issue The author takes the examples of Pakistan and Iran to provide a nuanced understanding of Muslim states interaction with global debates on sustainability She also explores how Muslim and non Muslim states societies and agents perceive issues of population growth and control Providing an innovative approach to the pursuit of global sustainability and security this book presents useful material to scholars whose research focuses on Islam and the future

**Reproduction and Biopolitics** Silvia De Zordo, Milena Marchesi, 2016-02-05

The central theme of this volume is the notion of irrational reproduction the ways in which women's and couples reproductive choices and practices are deemed irrational or irresponsible because they result in the wrong number of children In a global context of declining fertility population policies have shifted to a neoliberal register which despite local differences includes both the deepening of economic and social inequalities and the intensification of rights discourses applied to the unborn Inspired by Foucault's theories on biopolitics and biopower and by a long tradition of feminist anthropological studies on reproduction the ethnographically based papers collected in this volume address the following crucial questions How does the notion of irrational reproduction emerge and play out in diverse socio political contexts and what forms of subjectivities and resistance does it generate How does the threat of too few or too many children itself constructed through expert knowledge of statistics and political concerns over the size of different ethnic populations or classes justify and support different biopolitical projects And how do the increasing privatization of healthcare and the dismantling of welfare states affect reproductive practices and decisions on the ground in the global North and South This book was originally published as a special issue of Anthropology and Medicine

**Islamic Biomedical Ethics** Abdulaziz

Sachedina, 2009-04-06 Biomedical ethics is a burgeoning academic field with complex and far reaching consequences Whereas in Western secular bioethics this subject falls within larger ethical theories and applications utilitarianism deontology teleology and the like Islamic biomedical ethics has yet to find its natural academic home in Islamic studies In this pioneering work Abdulaziz Sachedina a scholar with life long academic training in Islamic law relates classic Muslim religious values to the new ethical challenges that arise from medical research and practice He depends on Muslim legal theory but then looks deeper than juridical practice to search for the underlying reasons that determine the rightness or

wrongness of a particular action Drawing on the work of diverse Muslim theologians he outlines a form of moral reasoning that can derive and produce decisions that underscore the spirit of the Shari'a These decisions he argues still leave room to revisit earlier decisions and formulate new ones which in turn need not be understood as absolute or final After laying out this methodology he applies it to a series of ethical questions surrounding the human life cycle from birth to death including such issues as abortion euthanasia and organ donation The implications of Sachedina's work are broad His writing is unique in that it aims at conversing with Jewish and Christian ethics moving beyond the Islamic fatwa literature to search for a common language of moral justification and legitimization among the followers of the Abrahamic traditions He argues that Islamic theological ethics be organically connected with the legal tradition of Islam to enable it to sit in dialogue with secular and scripture based bioethics in other faith communities A breakthrough in Islamic bioethical studies this volume is welcome and long overdue reading for anyone interested in facing the difficult questions posed by modern medicine not only to the Muslim faithful but to the ethically minded at large

**Countless Blessings** Barbara M. Cooper, 2019-07-01 A study of pregnancy and childbirth customs in Niger and how it has both a high fertility rate and high rates of maternal and infant mortality How do women in Niger experience pregnancy and childbirth differently from women in the United States or Europe Barbara M Cooper sets out to understand childbirth in a country with the world's highest fertility rate and an alarmingly high rate of maternal and infant mortality Cooper shows how the environment slavery and abolition French military rule and the rapid expansion of Islam have all influenced childbirth and fertility in Niger from the nineteenth century to the present day She sketches a landscape where fear of infertility generates intense competition between communities ethnicities and co-wives and creates a culture where concerns about infertility dominate concerns about overpopulation where illegitimate children are rejected and where the education of girls is sacrificed in the name of avoiding shame Given a medical system poorly adapted to women's needs a precarious economy and a political context where it is impossible to address sexuality openly Cooper discovers that it is little wonder that pregnancy and birth are a woman's greatest pride as well as a source of grave danger Beautifully written insightful and full of empathy A must read for anyone seeking to understand the damaging consequences of neglecting women's and infants' health Johanna Schoen author of *Abortion after Roe* Few experiences are more potent than reproduction *Countless Blessings* brilliantly unwinds the full import of this potency tracing a history of demography bodily peril parental joy and social religious and political meaning Cooper's tremendous skill and creativity as a scholar enable us to see the political stakes of reproduction even as they are grounded in the intimacies of embodied experience Julie Livingston author of *Self-Devouring Growth A Planetary Parable as Told from Southern Africa* *Countless Blessings* shows how women in Niger and in West Africa have long navigated the various states of social value personhood spirituality and childbirth and it paints a remarkable picture of how contested and embodied the social and material concerns of childbirth remain for women today Ampson Hagan University of North Carolina Chapel Hill

**Soft Force** Ellen Anne McLarney, 2015-05-26 The unheralded contribution of women to Egypt's Islamist movement and how they talk about women's rights in Islamic terms In the decades leading up to the Arab Spring in 2011 when Hosni Mubarak's authoritarian regime was swept from power in Egypt Muslim women took a leading role in developing a robust Islamist presence in the country's public sphere Soft Force examines the writings and activism of these women including scholars preachers journalists critics actors and public intellectuals who envisioned an Islamic awakening in which women's rights and the family equality and emancipation were at the center Challenging Western conceptions of Muslim women as being oppressed by Islam Ellen McLarney shows how women used soft force a women's jihad characterized by nonviolent protest to oppose secular dictatorship and articulate a public sphere that was both Islamic and democratic McLarney draws on memoirs political essays sermons newspaper articles and other writings to explore how these women imagined the home and the family as sites of the free practice of religion in a climate where Islamists were under siege by the secular state While they seem to reinforce women's traditional roles in a male dominated society these Islamist writers also reoriented Islamist politics in domains coded as feminine putting women at the very forefront in imagining an Islamic polity Bold and insightful Soft Force transforms our understanding of women's rights women's liberation and women's equality in Egypt's Islamic revival

**The Methods and Uses of Anthropological Demography** Alaka Malwade Basu, Peter Aaby, 1998-09-24 This volume takes stock of the current status of the comparatively new discipline of Anthropological Demography and discusses its major methods its main strengths and its chief limitations It includes contributions from both mainstream demographers and foremost anthropologists all stressing the necessity of a shared agenda for each discipline to progress successfully and avoid marginalization While the unique research and personal satisfaction afforded by participant observation is described the book also highlights the potential contribution to the understanding of demographic events of much more than the field methods of traditional anthropology In particular it stresses the insights possible from qualitative focus group interviews from longitudinal studies and from a greater interest in armchair anthropology in which demographers complement their quantitative findings with qualitative information and understanding gleaned from a careful reading of the anthropological literature in the form of both ethnographies and anthropological theories In addition it stresses the larger world of the ideal anthropological demographer a world that includes the cultural context of course but

also takes into account the historical and political forces that condition so much individual behaviour But the book is also a critical venture It includes therefore considerable discussion of the common limits of the purely anthropological approach for understanding demographic events and processes especially from a larger policy perspective at the same time as it emphasizes the crucial role of the anthropological approach to designing policy that is potentially effective as well as socially and culturally sensitive It reiterates the often complementary role of anthropological demography and also discusses some specific questions in demographic research which it does not as yet seem to have the capacity to illuminate The book is aimed primarily at demographers wishing to broaden their research agenda and deepen their understanding of demographic behaviour but it also hopes to convert mainstream anthropologists to take a more active interest in demographic issues Both disciplines after all have a common intense interest in the kind of life and death issues that they can fruitfully explore together or by using one another's research methods
