Description :

A forward looking casebook, Family Property Law focuses on new themes in family property law in the areas of wills, trusts, estates, and probates. The book recognizes the reform minded nature of the current era of family property law, including its changing notions of family and society, the acceptance of a partnership theory for assessing the financial aspects of marriage, and the need to reshape the law of donative transfers into a unity. The third edition presents the following new features: integrated coverage of the new Uniform Trust Code and of the American Law Institute approved parts of the new Restatements, important new case and statutory law, including Vermont's civil union statute and a sample certificate of civil union, the two Kuralt decisions of the Montana Supreme Court holding that Charles Kuralt's letter to his mistress constituted a holographic will, and fully integrated treatment of the Economic Growth and Tax Relief Reconciliation Act of 2001, which ultimately repealed the estate tax and the generation-skipping transfer tax.

Sex, Law, and Sovereignty in French Algeria, 1830–1930 Judith Surkis, 2019-12-15 This is a masterful study of the ways in which sex and law were inextricably intertwined in the elaboration of French rule in Algeria Its great virtue is to demonstrate in careful detail with an impressive range of material from court records to novels exactly how the conquest of Algeria repeatedly challenged the very ideals of the secular universalism in whose name colonization was carried out Joan Wallach Scott author of *Sex and Secularism* During more than a century of colonial rule over Algeria the French state shaped and reshaped the meaning and practice of Muslim law by regulating it and circumscribing it to the domain of family law while applying the French Civil Code to appropriate the property of Algerians In *Sex Law and Sovereignty in French Algeria 1830 1930* Judith Surkis traces how colonial authorities constructed Muslim legal difference and used it to deny Algerian Muslims full citizenship In disconnecting Muslim law from property rights French officials increasingly attached it to the bodies beliefs and personhood Surkis argues that powerful affective attachments to the intimate life of the family and fantasies about Algerian women and the sexual prerogatives of Muslim men supposedly codified in the practices of polygamy and child marriage shaped French theories and regulatory practices of Muslim law in fundamental and lasting ways Women s legal status in particular came to represent the dense relationship between sex and sovereignty in the colony This book also highlights the ways in which Algerians interacted with and responded to colonial law Ultimately this sweeping legal genealogy of French Algeria elucidates how the Muslim question in France became and remains a question of sex

The Smart Woman's Guide to Property Law Carla Spivack, 2020-04-08 The income gap between women and men has gotten lots of attention in the last few decades today women earn seventy nine cents for every dollar men earn But fewer people are aware of the much more serious wealth gap for every dollar in wealth men own women own thirty two cents Thirty two cents Wealth matters Wealth is what gives us a financial safety net when we lose our jobs break up a relationship or divorce we or our dependents become sick or when we are hit by some other financial crisis It enables us to build security to give our children a future and to retire It is passed from generation to generation allowing wealthy families to stay wealthy over time Wealth can generate income whether through investments in the financial markets or real estate or through funding a startup business and more Significant wealth even allows us to influence our world by allowing us to contribute to political campaigns and policy initiatives For these reasons wealth is a better indicator of financial status than income it reveals who is secure and influential and who is not By treating women and men equally

without recognizing the gross social and economic advantages that differentiate us the law perpetuates the wealth gap Here Carla Spivack takes readers through a tour of a woman s life stages and the property laws that may apply and hinder their financial independence From living together to marriage from divorce to inheritance the circumstances invite unfair treatment that leaves women out in the cold Understanding how to protect your assets fight for what is fair and increase financial security is increasingly important as the wage gap continues to flourish Readers will learn about the laws that work against them and how to protect themselves regardless of their relationship status For all women of all ages here is your guide to keeping your wealth not matter how your relationship fares The Psychology of Family Law Eve M.

Brank,2019-04-09 Winner 2021 Lawrence S Wrightsman Book Award given by the American Psychology Law Society Bridges family law and current psychological research to shape understanding of legal doctrine and policy Family law encompasses legislation related to domestic relationships marriages parenthood civil unions guardianship and more No other area of law touches so closely to home or is changing at such a rapid pace in fact family law is so dynamic precisely because it is inextricably intertwined with psychological issues such as human behavior attitudes and social norms However although psychology and family law may seem a natural partnership both fields have much to learn from each other Our laws often fail to take into account our empirical knowledge of psychology falling back instead on faulty assumptions about human behavior This book encourages our use of psychological research and methods to inform understandings of family law It considers issues including child custody intimate partner violence marriage and divorce and child and elder maltreatment For each topic discussed Eve Brank presents a case statute or legal principle that highlights the psychological issues involved illuminating how psychological research either supports or opposes the legal principles in question and placing particular emphasis on the areas that are still in need of further research The volume identifies areas where psychology practice and research already have been or could be useful in molding legal doctrine and policy and by providing psychology researchers with new ideas for legally relevant research **Family Law** Joanna Miles,Rob George,Sonia Harris-Short,2019 Placing key

judgments and expert commentary at your fingertips Family Law Text Cases and Materials presents everything the undergraduate student needs in one volume Drawing on their extensive experience the authors offer a detailed and authoritative exposition of family law illustrated by materials carefully selected from a wide range of sources The book has two principal aims to provide readers with a thorough understanding of the law relating to the family and to stimulate critical reflection on that law Readers are encouraged to consider how and why the law has developed as it has what policies it is seeking to pursue whether it achieves the right balance between the rights and interests of individual family members and the wider public interest and how it operates in practice Online Resources The text is supported by substantial online resources which features regular updates on the law further reading suggestions and revision questions to accompany each chapter **The History of the European Family: Family life in early modern times (1500-1789)** David I.
