**Sierra Hotel : flying Air Force fighters in the decade after Vietnam**, 2001 In February 1999 only a few weeks before the U S Air Force spearheaded NATO s Allied Force air campaign against Serbia Col C R Anderegg USAF Ret visited the commander of the U S Air Forces in Europe Colonel Anderegg had known Gen John Jumper since they had served together as jet forward air controllers in Southeast Asia nearly thirty years earlier From the vantage point of 1999 they looked back to the day in February 1970 when they first controlled a laser guided bomb strike In this book Anderegg takes us from glimmers of hope like that one through other major improvements in the Air Force that came between the Vietnam War and the Gulf War Always central in Anderegg s account of those changes are the people who made them This is a very personal book by an officer who participated in the transformation he describes so vividly Much of his story revolves around the Fighter Weapons School at Nellis Air Force Base AFB Nevada where he served two tours as an instructor pilot specializing in guided munitions

**Air Force Magazine**, 2014-07 [The Air Force Way of War](#) Brian D. Laslie, 2015-06-23 Laslie chronicles how the Air Force worked its way from the catastrophe of Vietnam through the triumph of the Gulf War and beyond Robert M Farley author of *Grounded* The U S Air Force s poor performance in Operation Linebacker II and other missions during Vietnam was partly due to the fact that they had trained their pilots according to methods devised during World War II and the Korean War when strategic bombers attacking targets were expected to take heavy losses Warfare had changed by the 1960s but the USAF had not adapted Between 1972 and 1991 however the Air Force dramatically changed its doctrines and began to overhaul the way it trained pilots through the introduction of a groundbreaking new training program called Red Flag In *The Air Force Way of War* Brian D Laslie examines the revolution in pilot instruction that Red Flag brought about after Vietnam The program s new instruction methods were dubbed realistic because they prepared pilots for real life situations better than the simple cockpit simulations of the past and students gained proficiency on primary and secondary missions instead of superficially training for numerous possible scenarios In addition to discussing the program s methods Laslie analyzes the way its graduates actually functioned in combat during the 1980s and 90s in places such as Grenada Panama Libya and Iraq Military historians have traditionally emphasized the primacy of technological developments during this period and have overlooked the vital importance of

advances in training but Laslie's unprecedented study of Red Flag addresses this oversight through its examination of the seminal program A refreshing look at the people and operational practices whose import far exceeds technological advances
