focusing on children and childhood as a basis for ECEC policy to replace discourses of economic investment and child vulnerability that are dominant within policy goals in many countries A commitment to democracy and equity is a good place to start Aotearoa New Zealand is of special interest because of its world renowned ECE curriculum Te Wh riki which is based on principles of social justice respect for rights and an aim to support children growing up in a democracy The curriculum upholds M ori rights to tino rangatiratanga absolute authority over their lives and resources Yet Aotearoa New Zealand s extreme market policies and harsh labour laws during recent periods run contrary to ideals of democracy and are puzzlingly inconsistent with curriculum principles The book starts with an analysis and critique of global trends in ECEC in countries that share capitalist mixed economies of welfare and where competition and marketisation have become dominant principles It then analyses ideas about children childhood and ECEC within a framework of democracy going back to the Athenian origins of democracy and including recent literature on meanings and traditions of democracy in education The book uses vivid examples from researching curriculum pedagogy and assessment practices within Aotearoa New Zealand ECEC settings and collective action to influence policy change in order to illustrate opportunities for democratic education It concludes by examining what conditions might be needed for integrated and democratic ECEC provision in Aotearoa New Zealand and what changes are necessary for the future It offers a compass not a map it points to promising directions and provides insights into issues in ECEC policy and practice that are of current global concern

*Early Childhood in the Anglosphere* Peter Moss, Linda Mitchell, 2024-05-09 Written by two leading international experts Early Childhood in the Anglosphere offers a unique comparison of early childhood education and care services and parenting leave across seven high income Anglophone countries Peter Moss and Linda Mitchell explore what

these systems have in common including the dominance of childcare services widespread privatisation and marketisation and weak parenting leave They highlight the substantial failings of these systems and the causes and consequences of these failings But this book is ultimately about hope about how these failings might be made good through major changes In other words it is about transformation why transformation is both necessary and possible at this particular time what transformation might look like and how it might happen Part of that transformation concerns the need for new policies and structures but even more it is about how the Anglosphere thinks about early childhood The authors call for turning away from conceptualising early childhood services as childcare and marketised businesses selling commodities to parent consumers and for reconceptualising them as education imbued with an ethics of care a public good available as a right to all children and families and complemented by well paid individual entitlements to parenting leave Using examples from the Anglosphere and beyond and in a context of converging crises the book argues that transformation of thinking policies and structures is desirable and doable International Handbook of Virtual Learning Environments Joel Weiss,Jason

Nolan,Jeremy Hunsinger,Peter Trifonas,2007-11-24 Three issues are explored and used as organizers for The International Handbook of Virtual Learning Environments First a distinction is made between virtual learning and learning virtually Second since the focus is on learning an educational framework is developed as a means of bringing coherence to the available literature Third learning is defined broadly as a process of knowledge creation for transforming experience to reflect different facets of the curriculum of life The Handbook is divided into four sections Foundations of Virtual Learning Environments Schooling Professional Learning and Knowledge Management Out of School Learning Environments and Challenges for Virtual Learning Environments A variety of chapters representing different academic and professional fields are included These chapters cover topics ranging from philosophical perspectives historical sociological political and educational analyses case studies from practical and research settings as well as several provocative classics originally published in other settings **World Yearbook of Education 2006** Jenny Ozga,Terri Seddon,Thomas S.

Popkewitz,2013-01-11 This volume considers the ways in which educational research is being shaped by policy across the globe Policy effects on research are increasingly influential as policies in and beyond education drive the formation of a knowledge based economy by supporting increased international competitiveness through more effective evidence based interventions in schooling education and training systems What consequences does this increased steering have for research in education How do transnational agencies make their influence felt on educational research How do national systems and traditions of educational research and relations with policy respond to these new pressures What effects does it have on the quality of research and on the freedom of researchers to pursue their own agendas The 2006 volume of the World Yearbook of Education explores these issues focusing on three key themes globalising policy and research in education steering education research in national contexts global local politics of education research The 2006 volume has a truly global reach

incorporating transnational policy perspectives from the OECD and the European Commission alongside national cases from across the world in contrasting contexts that include North and South America Canada France Singapore China Russia and New Zealand The range of contributions reflect how pervasive these developments are how much is new in this situation and to what extent evidence based policy pressures on research in education build on past relationships between education and policy This book considers the impact of the steering processes on the work and identities of individual researchers and considers how research can be organised to play a more active role in the politics of the knowledge economy and learning society

*Student Engagement in Neoliberal Times* Nick Zepke, 2016-12-14 This book investigates origins meanings uses and effects of student engagement in higher education and addresses three core questions 1 Why is student engagement so visible in higher education today 2 What are its dominant characteristics 3 What is missing in the popular view of student engagement These questions pave the way for a fresh approach to student engagement The book argues that an elective affinity between student engagement and policies embedded in neoliberalism the dominant ideology of the early 21st century enables student engagement to transcend diverse intellectual and practice contexts This affinity encourages quality learning and teaching that enables student to succeed in their studies and future careers The book shows that focusing on neoliberal objectives for learning and teaching limits the potential of student engagement in higher education This conclusion leads to a critical and practical social ecological perspective that approaches engagement more as a pathway to social justice than as a list of techniques This book is a work of critical scholarship backed by empirical research It questions accepted theories and practices and offers fresh insights into

student engagement in higher education including how engagement could promote social justice The Routledge International Handbook of Philosophies and Theories of Early Childhood Education and Care Tricia David, Kathy Gooch, Sacha Powell, 2015-10-05 The Routledge Handbook of Philosophies and Theories of Early Childhood Education and Care brings together leading writers in the field to provide a much needed authoritative guide to the major philosophies and theories which have shaped approaches to Early Childhood Education and Care Providing a detailed overview of key concepts debates and practical challenges the handbook combines theoretical acumen with specific examples to show how philosophies and theories have evolved over the centuries and their impact on policy and society It examines the ways in which societies define and make sense of childhood and the factors that influence the development of philosophies about young children and their learning The collection offers an insight into the key theorists and considers how the economics and politics of their time and personal ideology influenced their ideas about childhood It looks at curricula and provision which have proved inspirational and how these have impacted on policy and practice in different parts of the world The handbook also explores alternative and perhaps less familiar philosophies and ideas about babies and young children their place in society and the ways in which it might be appropriate to educate them Bringing together specially commissioned pieces by a range of international authors this handbook will enable academics research students practitioners and policy makers to reflect on their own understandings and approaches as well as the assumptions made in their own and other societies
