desde la Universidad del Valle de México Región Estado de México y Morelos abordaron el difícil camino de hacer investigación y despertar la curiosidad científica en sus alumnos **Higher Education and the COVID-19 Pandemic**, 2022-06-13

COVID 19 caused massive disruptions in the higher education sector across the world The transition to online learning exposed the deep rooted inequalities between countries systems institutions and student groups in terms of the availability of information technology infrastructure internet access and digital literacy as well as prior training and experiences of faculty in online education This volume explores various aspects of the impact of the pandemic on higher education management including how university administration responded to the crisis and the role of local and national government agencies in academic support and higher education delivery The key findings highlight the importance of better organisation and preparedness of higher education systems for future crises and the need for a better dialogue between governments higher education institutions and other stakeholders The book calls for a collective response to address the digital divide among various groups and financial inequalities within and between the private and public universities and to plan for the serious challenges that international students face during crisis situations *La formación en investigación en la universidad* Gladys Rosa Calvo, 2021-11-23

Como se forma un investigador Qué instancias se prevén en las carreras de grado para preparar en los quehaceres investigativos Qué características didácticas tiene la formación en investigación en la universidad Qué particularidad asume en las carreras de grado de las ciencias sociales y humanas Estas y otras preguntas orientan el desarrollo de esta obra que abre a respuestas y a nuevos interrogantes para los docentes y estudiantes preocupados por la formación en la universidad dado que investigación docencia y extensión se constituyen en los pilares de nuestra institución El rol de investigador se integra en las competencias a desarrollar en esa formación y a la vez se constituye en un rasgo que distingue y caracteriza al profesional que desarrolla actividades académicas La mayor parte de los planes de estudios universitarios explicitan la intención de formar profesionales capacitados para realizar investigaciones científicas sin embargo este interés no deriva necesariamente en el desarrollo de contenidos y estrategias tendientes al logro de esta finalidad El presente trabajo parte de un estudio didáctico general para posteriormente profundizar en las modalidades de relación teórica y práctica que adquieren las distintas instancias curriculares dedicadas a formar en investigación especialmente aquellas que se encuentran en el ciclo de formación general El estudio tiene su anclaje empírico en las nueve carreras de la Facultad de Filosofía y Letras de la Universidad de Buenos Aires Preguntarnos en torno a la formación de los investigadores en la universidad resulta de interés ya que problematiza y busca aportar conocimiento sobre un tema de relevancia académica y social ya que no solo implica a la institución productora de ese conocimiento sino también a la sociedad que aparece como destinataria de ese conocimiento producido **Evaluación de las competencias docentes en las ciencias de la salud**

[America](#) Fernanda Beigel, 2016-03-03 Academic autonomy has been a dominant issue among Latin American social studies given that the production of knowledge in the region has been mostly suspected for its lack of originality and the replication of Euro American models Politicization within the higher education system and recurrent military interventions in universities have been considered the main structural causes for this heteronomy and thus the main obstacles for scientific achievements This groundbreaking book analyses the struggle for academic autonomy taking into account the relevant differences between the itinerary of social and natural sciences the connection of institutionalization and prestige building professionalization and engagement From the perspective of the periphery academic dependence is not merely a vertical bond that ties active producers and passive reproducers Even though knowledge produced in peripheral communities has low rates of circulation within the international academic system this doesn't imply that their production is or always has been the result of a massive import of foreign concepts and resources This book intends to show that the main differences between mainstream academies and peripheral circuits are not precisely in the lack of indigenous thinking but in the historical structure of academic autonomy which changes according to a set of factors mainly the role of the state in the higher education system This historical structure explains the particular features of the process of professionalization in Latin American scientific fields **Gobernanza universitaria: Experiencias e investigaciones en Latinoamérica**
