Educating All Students In The Mainstream Of Regular Education:

Educating All Students in the Mainstream of Regular Education Susan Bray Stainback, William C.

Stainback, Marsha Forest, 1989 This book builds from a historical overview of educational integration and explores the rationale behind the movement toward a merger of regular and special education. Noted authorities advance this argument in well structured chapters organized around key themes including educational equality in practice strategies to promote merger educational practices to meet diverse student needs and family and community support. Case histories and boxed statements highlighting pertinent points are among the effective instructional aides in this textbook. A thought provoking question and answer format also confronts 22 of the most commonly addressed concerns about merging regular and special education.

Embarking on a New Century Robert L. Schalock, Pamela C. Baker, M. Doreen Croser, 2002 Captures the challenging and controversial era between 1975-2000 that led the field of intellectual disability into an age of community acceptance and inclusion. This title includes chapters that focus themes such as public policy and health care.

Educating All Students Together Leonard C. Burrello, Carl Lashley, Edith E. Beatty, 2001 A convincing conceptualization of schools as complex adaptive systems. The authors' recommendations that leaders must tinker at the margins and lead in the zone of complexity provide sound and practical advice for school leaders faced with creating unified educational systems that will be able to effectively support students with increasingly diverse learning needs. David W. Peterson, Superintendent, Northern Suburban Special Education District, Highland Park, IL. Far too long we have failed to acknowledge the large number of students relegated to parallel educational systems. This thought provoking book provides an important first step in helping us surface the mental models we hold of the teaching and learning of diverse student populations. Nelda Cambron-McCabe, Department of Educational Leadership, Miami University, Oxford, OH. An insightful, informative, and thought provoking book that deals with a topic that concerns every educator. Kate Kinley, Director of Administrative Training and Staff Development, Clark County School District, NV. Learn to create unified learner centered schools where all students learn. By focusing on student learning as the central goal of school administrators, Burrello, Lashley, and Beatty establish a plan for creating a truly integrated educational system, one that unifies the separate and parallel systems of special and general education. The authors call for an end to the piecemeal strategy of including students one classroom, one grade level, or one school at a time. Instead, they demonstrate how administrators, school leaders, and the community must work together on decisions to implement personalized education plans, accountable curricular outcomes, and appropriate instructional adaptations. Some of the key concepts include: Schools embracing special services personnel; The roles of the community and other stakeholders; Reconceptualizing schools based on learner centered principles; Program evaluation and incentives; Brain and holographic design as a framework for complex adaptive systems; Collaboration between school administrators and teachers; Adapting curriculum and instruction. In this groundbreaking work of practical application, Burrello, Lashley, and Beatty demonstrate

effective leadership strategies that will enable administrators to better manage the cultural imperative of equity and excellence for all students They further support the plan for unified schools through case studies and a program evaluation of self study guide An essential resource for general and special educators parents and communities Special Educational Needs and Inclusive Education: Inclusive education David R. Mitchell,2004 Demonstrates how the fields of special education and inclusive education have evolved philosophically and technically over the past 30 years *Inclusive Education* Lissa A. Power-deFur,Fred P. Orelove,1997 A comprehensive look at inclusion this book provides success stories by administrators and teachers who have found that inclusion is the best way to meet the least restrictive environment needs of their students Complete with checklists in service materials and pre and post evaluation methods this detailed guide will help you meet student needs in a way that complements the educational fiscal and legal outlooks as well as the attitudes of your school division Educational Administration in a Pluralistic Society Colleen A. Capper,1993-07-01 In this bold provocative supplemental text for the field of educational administration Colleen Capper and contributors challenge administrators policymakers practitioners and communities to confront the realities of schools and students in a pluralistic society The book examines recent educational initiatives aimed at addressing the needs of students and staff from traditionally underrepresented groups marginalized on the basis of race language gender sexual orientation social class or disability Each chapter critically reviews the literature and research to probe the current characteristics of a nondominant group including such information as its demographic characteristics its role in school reform its representation in organizational theory and behavior its presence within curriculum and instruction and its relationship with the school as community Capper argues for the adoption of a multiparadigmatic framework from which to approach educational leadership for today's schools Book jacket School Without Walls in Twenty-first Century Bishnupada Nanda,2008 With reference to West Bengal India

Speece, Barbara K. Keogh, 2013-04-03 Written during a period of reexamination and change in the field of special education this book was developed in order to provide a better understanding of the contexts in which children receive their formal education The movement toward the least restrictive environment for the education of children with disabilities is weathering a wave of reinterpretations including mainstreaming the regular education initiative and inclusion While each interpretation has its proponents and critics limited theory and few data are available to guide these important policy decisions Focusing specifically on classrooms the settings where educators can have the most immediate impact and where research is most needed this volume's goals are to establish what is known about classroom ecologies from both general and special education perspectives to integrate the perspectives of researchers and practitioners and to chart directions for further research specifically related to children with learning disabilities The construct of classroom ecology is defined as three interrelated domains instruction teacher and peer interaction and organization and management This scheme provides the structure for the book Taken as a whole the content of the volume underscores the limits of current knowledge and at the same time provides directions for needed changes in both research and practice Learning, Education, and Support of Deafblind Children and Adults Timothy S. Hartshorne, Marleen J. Janssen, Walter Wittich, 2025-09-11 Learning Education and Support of Deafblind Children and Adults presents the latest research on topics relevant for learners with deafblindness based on the most important studies of the last two decades The diversity of deafblind people is explored with the authors bringing together relevant information from the fields of congenital acquired and age related deafblindness and those who are deafblind from different syndromes and etiologies Opening with a case study of a deafblind adult who shares his perspectives on barriers and facilitators in deafblind education the volume then presents chapters by leading researchers from around the world on deafblindness Bridging the gap between research and practice by the researchers themselves along with deafblind individuals the authors describe their essential research findings and interpret them in terms of valuable implications for educational and rehabilitation practice Divided into seven sections the themes covered include the identification of deafblind persons specific learning areas and interdisciplinary support learning self determination and education participation work and recreation family perspective professionalization and interdisciplinary approaches and research technology and innovations With over fifty contributors this volume brings together the current international scholarship on deafblindness and aims to stimulate new research on this rare but significant disability *Is There A Desk With My Name On It?* Roger Slee, 2003-12-16 The satisfactory inclusion of children with disabilities in regular schools and classrooms provides a basis for debate from all corners of the world This international

collection looks at and analyzes the implications of policy for teachers parents and students The views and experiences of exclusion and frustration are voiced by parents and students this detail giving immediacy with theory developed in earlier chapters Additionally the experience of the integration of teachers is highlighted to provide examples of programmes pedagogy and school organization conducive to the inclusion of all students in the regular classroom This book is intended for use by post graduate and undergraduate students of education teachers researchers in special and regular education counselling courses at student and teacher level
