Siegelbaum, 1992-08-20 The evolution of the ruling Communist Party and its New Economic Policy is explored in the first book to analyze the relationship between the Soviet state and society from 1917 through the early 1930s through the changing fortunes of its peoples *Educational Reform in Post-Soviet Russia* Ben Eklof, Larry Eugene Holmes, Vera Kaplan, 2005 A collection of essays which examine the reform of the educational system in post Soviet Russia in historical and comparative perspective Education, Culture, and Identity in Twentieth-century China Glen Peterson, Ruth Hayhoe, Yongling Lu, 2001 A comprehensive collection on twentieth century educational practices in China **Problems of Communism**, 1982 **Stalinism** Sheila Fitzpatrick, 2000 First Published in 1999 Routledge is an imprint of Taylor Francis an informa company *China's Opening Society* Zheng Yongnian, Joseph Fewsmith, 2008-02-19 Despite its recent rapid economic growth China's political system has remained resolutely authoritarian However an increasingly open economy is creating the infrastructure for an open society with the rise of a non state sector in which a private economy non governmental organizations NGOs and different forms of social forces are playing an increasingly powerful role in facilitating political change and promoting good governance This book examines the development of the non state sector and NGOs in China since the onset of reform in the late 1970s It explores the major issues facing the non state sector in China today assesses the institutional barriers that are faced by its developing civil society and compares China's example with wider international experience It shows how the get rich quick ethos of the Deng Xiaoping and Jiang Zemin years that prioritised rapid GDP growth above all else has given way under the Jiantao Hu regime to a renewed concern with social reforms in areas such as welfare medical care education and public transportation It demonstrates how this change has led to encouragement by the Hu government of the development of the non state sector as a means to perform regulatory functions and to achieve effective provision of public and social services It explores the tension between the government's desire to keep the NGOs as helping hands rather than as autonomous independent organizations and their ability to perform these roles successfully **Russia** Mauricio Borrero, 2009 A reference guide to the world's largest country Covering influential individuals significant places and important policies it provides readers with a greater understanding of Russian history A narrative history chronology and A Z entries are included **A Century of Genocide** Eric D. Weitz, 2015-04-27 Why did the twentieth century witness unprecedented organized genocide Can we learn why genocide is perpetrated by comparing different cases of genocide Is the Holocaust unique or does it share causes and features with other cases of state sponsored mass murder Can genocide be prevented Blending gripping narrative with trenchant analysis Eric Weitz investigates four of

the twentieth century's major eruptions of genocide the Soviet Union under Stalin Nazi Germany Cambodia under the Khmer Rouge and the former Yugoslavia Drawing on historical sources as well as trial records memoirs novels and poems Weitz explains the prevalence of genocide in the twentieth century and shows how and why it became so systematic and deadly Weitz depicts the searing brutality of each genocide and traces its origins back to those most powerful categories of the modern world race and nation He demonstrates how in each of the cases a strong state pursuing utopia promoted a particular mix of extreme national and racial ideologies In moments of intense crisis these states targeted certain national and racial groups believing that only the annihilation of these enemies would enable the dominant group to flourish And in each instance large segments of the population were enticed to join in the often ritualistic actions that destroyed their neighbors This book offers some of the most absorbing accounts ever written of the population purges forever associated with the names Stalin Hitler Pol Pot and Milosevic A controversial and richly textured comparison of these four modern cases it identifies the social and political forces that produce genocide The Origins of the Stalinist Political System Graeme Gill, Graeme J. Gill, 2002-07-18 New and challenging perspectives on Soviet political development from 1917 to 1941

J. Angulo, 2016-04 By investigating how laws myths national aspirations and global relations have recast and at times distorted the key purposes of education this pathbreaking book sheds light on the role of ignorance in shaping ideas public opinion and policy Robert N Proctor author of *Golden Holocaust Origins of the Cigarette Catastrophe and the Case for Abolition* Historical Studies in Education *Revue d'histoire de l'éducation* **Stalinist Reconstruction and the Confirmation of a New Elite, 1945-1953** E. Duskin, 2001-03-08 Stalinist Reconstruction and the Confrontation of a New Elite 1945-53 looks at the postwar Stalin era through the eyes of industrial supervisors and offers a picture of the technical intelligentsia's transformation into the Soviet Union's social and political elite Drawing from archives newspapers memoirs and an array of secondary sources the book reveals new aspects of the Stalin phenomenon and concludes that contrary to prior assumptions the late Stalin years marked the Soviet Union's passage from the convulsion and disorder of revolution to the routinized professionalization common to most industrial societies *A History of Education in Modern Russia* Wayne Dowler, 2021-08-12 A History of Education in

Modern Russia is the first book to trace the significance of education in Russia from Peter the Great's reign all the way through to Vladimir Putin and the present day. Individual chapters open with an overview of the political, social, diplomatic and cultural environment of the period in order to orient the reader. Dowler then goes on to analyse the aims of education initiatives in each era before considering the ways in which Russians experienced education both as students and as teachers. Each chapter concludes with an assessment of the outcomes and consequences of education policies in the period, both the successes and failures as well as the impact of education on the cultural, social, economic and ultimately political environments. The chronologically arranged book also traces and then summarises underlying key themes like the tension between an open system of education and an estate-based system, the push and pull between utility and the broader goal of human development and the effects of centralized authoritarian control that for much of the period limited local initiative and starved the regions of adequate resources.

The Great Fear James Harris, 2016-02-25 Between the winter of 1936 and the autumn of 1938, approximately three quarters of a million Soviet citizens were subject to summary execution. More than a million others were sentenced to lengthy terms in labour camps. Commonly known as Stalin's Great Terror, it is also among the most misunderstood moments in the history of the twentieth century. The Terror gutted the ranks of factory directors and engineers; after three years in which all major plan targets were met, it raged through the armed forces on the eve of the Nazi invasion. The wholesale slaughter of party and state officials was in danger of making the Soviet state ungovernable. The majority of these victims of state repression in this period were accused of participating in counter-revolutionary conspiracies. Almost without exception, there was no substance to the claims and no material evidence to support them. By the time the terror was brought to a close, most of its victims were ordinary Soviet citizens for whom counter-revolution was an unfathomable abstraction. In short, the Terror was wholly destructive, not merely in terms of the incalculable human cost but also in terms of the interests of the Soviet leaders, principally Joseph Stalin, who directed and managed it. **The Great Fear** presents a new and original explanation of Stalin's Terror based on intelligence materials in Russian archives. It shows how Soviet leaders developed a grossly exaggerated fear of conspiracy and foreign invasion and lashed out at enemies largely of their own making.

Chinese Urban Life Under Reform Wenfang Tang, William L. Parish, 2000-01-28 This book examines how urban China is experiencing the shift from a planned to a market economy.

China's Education and the Industrialised World Ruth Hayhoe, Marianne Bastid, 2017-12-12 This book, first published in 1987, studies the practical and intellectual import of China's educational relations with the industrialised West, the Soviet Union and Japan. On the practical level, it provides a broad historical and philosophical context within which the possibilities and dangers inherent in China's educational involvement with developed countries may be considered. The book tests the theory that education transfers from the developed to the developing world have been used to consolidate political domination and economic exploitation by providing a detailed and provocative historical analysis of China's relations with the major developed nations.
