Education For Living:

Education and Schmid's Art of Living Christoph Teschers, 2017-07-14 Instead of simply following the current neoliberal mantra of proclaiming economic growth as the single most important factor for maintaining well being Education and Schmid's Art of Living revisits the idea of an education focused on personal development and the well being of human beings Drawing on philosophical ideas concerning the good life and recent research in positive psychology Teschers argues in favour of shifting the focus in education and schooling towards a beautiful life and an art of living for today's students Containing a thorough discussion of the ideas of contemporary German philosopher Wilhelm Schmid this book considers the possible implications of developing a more humanistic and life centred approach to educational policy research and practice showing that Schmid's concept of *Lebenskunst* provides a firm philosophical basis for this endeavour Among others this book draws on analytical and continental traditions to challenge current views and assumptions in regard to education and the role of schooling for contemporary societies As a result Teschers work is sure to spark a debate about the direction of educational policy and practice in the 21st century Education and Schmid's Art of Living is essential reading for academics and students with an interest in education Given the importance of such topics as the relationship between education and society teacher education and how best to structure schools and learning environments Teschers work will appeal to academics and students in a diverse range of fields including education philosophy sociology and psychology

Education for Life J. Donald Walters, 1997-06-15 Here is a constructive alternative to modern education The author stresses spiritual values and helping children grow toward full maturity learning not only facts but also innovative principles for better living This book is the basis for the Living Wisdom schools and the Education for Life Foundation which trains teachers parents and educators Encouraging parents and educators to see children through their soul qualities this unique system promises to be a much needed breath of fresh air

The Living Church, 1919 *Life and Moral Education in Greater China* John Chi-Kin Lee, Stephen Yam-wing Yip, Raymond Ho-Man Kong, 2021-03-30 Arguing for life moral and values education as a bedrock for the original goals of school education this monograph explores how life and values education is conceptualised and imparted in Greater China Under a globalized transnational and technological world where there has been an increase in people's mobility in information and cultural exchanges there is also a growing emphasis on personal and professional ethics Against this context life moral and values education has gained attention for its impact on shaping students characters as future citizens However the cultivation of these values is made deeply diversified and complex by varying interpretations of life education and values education across societies given that different societies are influenced by different socio cultural traditions educational ideologies and religious beliefs The means and approaches towards life education also vary vastly from formal school subjects school based programmes as well as teachers and peers role modelling community services extra curricular activities school discipline charity work pastoral care and school ethos Recognising this inherent diversity and

complexity in the approach to and the dissemination of life education the contributors to this volume survey the practice of life education in Greater China so far suggesting that life education is most effective when it is diversified dynamic and developmental across contexts This book will provide the opportunity for engaging in important and serious debates about the future and the values that will underpin it and will prove of special interest to scholars and practitioners working on education policies curriculum development and teacher education in Greater China **Michigan Journal of Physical Education** ,1927 *Pakistan, a Country Study* ,1975 **Music Lessons for a Living Planet** Daniel J. Shevock,Vincent C. Bates,2024-08-16 This volume shows music educators how music teaching and learning can help address humanity s greatest challenge the ecological crisis It provides the essential background knowledge in ecomusicology from compositions about nature soundscape experiences activist songs to practical lesson ideas Motivated by the urgent need for increased ecological awareness and sustainable practices and the ecological aspects of music and musical aspects of ecosystems the book explores the powerful role that music educators can play in protecting and preserving the natural environment Each chapter includes a narrative and potential lesson ideas that include listening singing playing instruments moving and contextualizing with the goal of translating research in ecomusicological theory into a sustainable creative and critical music teaching practice Bridging the gap between recent scholarship and pedagogical work this book will be a valuable resource for educators P 12 classroom teachers and music specialists as well as in undergraduate music education methods courses

Re-Enchanting Education and Spiritual Wellbeing Marian de Souza,Anna Halafoff,2017-09-14 Education is in a constant state of renewal internationally where it responds to a number of pressing social political and cultural issues Processes of globalization a number of conflicts and acts of terror economic and environmental crises have led to large waves of migration and asylum seekers arriving in countries with the hope of finding safer and more stable places to settle This in turn has led to cultural and religious pluralism being a key characteristic of many societies with corresponding issues of belonging and identity As well for many people there has been a shifting influence of and allegiance away from traditional religious frameworks with the emergence of new religious movements both peaceful and violent and a rise in popularity of spirituality and non religious worldviews which provide alternate frameworks for living healthy and ethical lives In order to prepare today s student for tomorrow s world one which is confronted by a range of risks and crises and which is being shaped by rapidly changing technologies educators and researchers are investigating new ways of equipping students to deal with these challenges and opportunities including the nurturing of spiritual wellbeing This book brings together the voices of many experienced educators to discuss ways to re enchant education and re enliven learning programs in response to these 21st century issues in an increasingly global and interconnected world It examines a range of international contexts including secular and religious educational settings and provides an avenue for visionary voices that identify problems and offer solutions to help shape a more promising education system that will prepare children more constructively and beneficially to
