Educational Technology in the Classroom Patricia Ann Brock, 1994 **The International Handbook of**

Educational Research in the Asia-Pacific Region J.P. Keeves, Ryo Watanabe, 2013-11-11 The aim of the Handbook is to present readily accessible but scholarly sources of information about educational research in the Asia Pacific region. The scale and scope of the Handbook is such that the articles included in it provide substantive contributions to knowledge and understanding of education in the Asia region. In so doing, the articles present the problems and issues facing education in the region and the findings of research conducted within the region that contribute to the resolution of these problems and issues. Moreover, since new problems and issues are constantly arising, the articles in the Handbook also indicate the likely directions of future developments. The different articles within the Handbook seek to conceptualize the problems in each specific content area under review, provide an integration of the research conducted within that area, the theoretical basis of the research, the practical implications of the research, and the contribution of the research towards the resolution of the problems identified. Thus, the articles do not involve the reporting of newly conducted research but rather require a synthesis of the research undertaken in a particular area with reference to the research methods employed and the theoretical frameworks on which the research is based. In general, the articles do not advocate a single point of view but rather present alternative points of view and comment on the debate and disagreements associated with the conduct and findings of the research. Furthermore, it should be noted that the Handbook is not concerned with research methodology and only considers the methods employed in inquiry in so far as the particular methods of research contribute to the effective investigation of problems and issues that have arisen in the conduct and provision of education at different levels within the region. The Routledge International Handbook of European Social Transformations Peeter Vihalemm, Anu Masso, Signe Opermann, 2017-11-22 This book focuses on social transformations as one of the central topics in the social sciences. The study of European social transformations is very valuable in the context of universal discussions within social sciences, explaining invariable universal attributes of societies and examining changing attributes. The book consists of 20 chapters on European social transformations, written from the perspectives of distinguished scholars from such disciplines as economics, political science, educational science, geography, media and communication studies, public management and administration, social psychology, and sociology. The temporal and spatial range of the book is wide, including such global changes as time-space compression, focusing particularly on change processes in Europe during the last two decades. The book consists of four main parts, beginning with an overview of the theoretical and methodological approaches and then focusing separately on post-communist transformations, institutional drivers of social transformations in the European Union, and European transformations in the context of global processes. The book presents current theoretical, empirical, and methodological approaches that complement the scientific literature on social transformations. This book is both an invaluable resource for scholars and an indispensable teaching tool for use in the classroom and will be of interest to students, academics, and policy makers studying how this diverse region has changed over recent years. **Annual Meeting Program** American

Educational Research Association,1999 **Disciplinary and Interdisciplinary Education in STEM** Yeping Li,Zheng Zeng,Naiqing Song,2024-03-19 This book provides an international platform for educators from different STEM disciplines to present discuss connect and develop collaborations in two inter related ways 1 sharing and discussing changes and innovations in individual discipline based education in STEM STEAM and 2 sharing and discussing the development of interdisciplinary STEM STEAM education Possible relationships and connections between individual disciplines like mathematics or physics and STEM education remain under explored and the integration of traditionally individual discipline based education in STEM education is far from balanced Efforts to pursue possible connections among traditionally separated individual disciplines in STEM are not only necessary for the importance of deepening and expanding interdisciplinary research and education in STEM but also for the ever increasing need of reflecting on and changing how traditional school subjects like mathematics or physics can and should be viewed taught and learned Scholars from eight countries regions provide diverse perspectives and approaches on changes and innovations in STEM disciplinary and interdisciplinary education Disciplinary and Interdisciplinary Education in STEM will be a great resource to students and researchers in STEM education as well as STEM curriculum developers and teacher educators internationally *Annual Meeting Program - American Educational Research Association* American Educational Research Association,1997 *Global Perspectives on Adult Education and Learning Policy* Marcella Milana,Tom Nesbit,2015-07-21 The worldwide appearance and expression of adult education and lifelong learning have changed significantly during the past 20 years This book explores recent changes in their related national and international policies how they intersect with developments in higher education and how they may contribute to debates on citizenship and democracy **Online Distance Education** Margaret Gorts Morabito,1999 Many educators and the public are interested in online distance education in particular Internet based schooling The underlying assumption is that this is a new and untested fad in education This is due in part to a lack of documentation within academia of the early development of online distance education and in part to a shortage of experienced practicing online schools On the Internet one may become confused by the flurry of activity and by the various claims from organizations that they are providing a revolutionary method of instruction online teaching Furthermore many people are unaware of the long and distinguished history of distance education itself that is the root of current day Internet based schooling Despite the uncertainty the public is clearly demanding online distance education This dissertation helps to resolve these problems This study fills various needs for the purpose of showing the effective application of online distance education Educational administrators teachers and the public must be assured that online distance teaching is a valid and proven instructional method Furthermore administrators and teachers need to know what to expect when planning operating and teaching in an online school Through historical analysis and the presentation of a practicing Internet based school this study fills these needs This dissertation results from fifteen years of independent study and research by the author combined

with professional experience in the field of online distance education including Internet based school design and operation

Conclusions result from published studies in distance education from research conducted in the 1980s concerning publicly available online distance education and from experience in developing administrating and teaching in an international Internet based school that has been in continual operation online since 1986 The author concludes that 1 online distance education has a proven track record 2 there is continual demand from the global community for Internet based instruction as well as a public demand for traditional institutions to accept this nontraditional method of study and 3 administrators and teachers can economically create and operate an effective Internet based school that is accessible to and affordable for individual learners using low cost personal computers
