Lipka, 1992-07-01 What are the characteristics and dimensions of the self Is there a best way to measure the self How does the researcher s definition of the self affect the choice of research measure and methods These are the questions addressed by this book Unlike previous books on the self this one provides a systematic analysis of the theoretical and methodological issues involved It offers a description of several alternative methods for studying the self and discussions of the advantages and disadvantages of these different approaches Emphasized here are the phenomenological and experiential nature of the self its multidimensionality and hierarchical structure and the relationship between defining and measuring the self Among the methodological issues addressed are the impact of significant others on the self the factors that affect the process of reporting about the self between group comparison of self structure the structure of the self in relationship to others and the effects of differing cultural contexts **A Social Psychology of Schooling** Colin Rogers, 2017-09-14 If a theory of education is to be helpful to the practising teacher it must take the social context of learning into account Originally published in 1982 Colin Rogers does just this exploring the implications of two decades detailed research in to the social psychology of teaching and learning The central theme that emerges from this study is the importance of the still controversial teacher expectancy effect the effect of teachers expectations on the performance of pupils By examining in detail the claims made by those who believe that the expectations of teachers can influence levels of pupils academic attainment the book shows the complexity of interpersonal interaction and perception within the classroom and the nature of problems involved in studying these It also focuses on the way that the mutual perceptions of teachers and pupils themselves affect and are affected by other aspects of life in a school and extensive use is made of research conducted in British schools to illustrate major points The conclusion of the study was that it is the classroom the very environment in which teachers and pupils interact rather than teacher training that may need reform *Introduction to Values Education* E.
