Electoral Change In Britain Since 1945:

Britain Since 1945 Jonathan Hollowell, 2008-04-15 This book offers a comprehensive overview of Britain's development since the end of the Second World War. It comprises 23 contributions from leading authorities and newer scholars set in context with a foreword by Raymond Seitz. A comprehensive and fascinating introduction to Britain from the end of the Second World War. Draws together the themes that have dominated discussion amongst scholars and media commentators. The chapters are set in context with a foreword by Raymond Seitz. Covers topics such as foreign policy, political parties, the media, race relations, women and social change, science and IT, culture, industrial relations, the welfare state and political and economic issues in Scotland, Wales and Northern Ireland.

The Changing Electoral Map of England and Wales Jamie Furlong, Will Jennings, 2024-10-23 The 2019 British general election saw a dramatic redrawing of the electoral map with the Labour Party losing seats to the Conservatives in former heartlands in the North of England and Midlands. Yet this had been a long term shift with the opposite trend occurring in major cities and university towns where Labour's support has been increasing. What has driven these changes in electoral geography? Why do they matter? This book offers a definitive account of the changing electoral geography of England and Wales over the past half century. Jamie Furlong and Will Jennings argue that long term trends in social and economic structure have significantly altered the spatial distribution of voters and combined with changes in the parties' appeal to those voters have led to a gradual though recently accelerating realignment of the geographical basis of electoral competition. Constituency level analysis of voting at general elections between 1979 and 2019 reveals a swing from Labour to the Conservatives in demographically left behind areas: areas with largely white working class populations and lower levels of educational attainment while Labour's support has remained stable in areas characterized by high levels of economic deprivation and insecure employment. Areas that have experienced improvements in their socioeconomic condition typically cities where Labour have inefficiently stacked up votes have swung towards Labour whereas areas characterized by economic and population decline have swung towards the Conservatives. Spatial analysis reveals clusters of seats where each party has more support than expected based on sociodemographic composition: places where in short place matters. In Merseyside Labour's vote is much higher than would be predicted by demographics while this is similarly the case for the Conservatives in Lincolnshire and parts of the West Midlands. But what makes these areas distinctive? We present qualitative case studies for Merseyside and Lincolnshire to identify the place based contextual factors that help explain their unusual political characteristics. The book argues for the need to recognize the importance of people, places and parties in shaping the geography of electoral outcomes.

British General Elections Since 1964 David Denver, Mark Garnett, 2014-02-27 Despite a recent decline in voter turnout British general elections are still the centrepiece of Britain's liberal democracy and their results make a real difference to every British citizen. They command strong media interest long before their dates are announced and even uneventful campaigns dominate the headlines. The 2010 general

election saw the first direct televised debates between the main party leaders adding further interest to a battle which was always likely to be close The result was a hung parliament and the first British coalition government since 1945 However as this book shows these were only the latest manifestations of a transformation in British elections which began in the early 1960s While some election rituals remain intact the counting of votes by hand the solemn declaration of individual constituency results and most importantly the peaceful handover of power if the incumbent party loses almost everything of significance has changed Voters have very different attitudes fewer of them have party loyalties which are more than skin deep and they tend to base their choices on short term factors such as the perceived competence of the parties and the image of the leader The parties themselves are barely recognisable from the institutions of 1964 not least because their membership figures have dwindled dramatically Election campaigns are now heavily centralised and focus obsessively on a handful of target seats This book reviews the history of British general elections since 1964 charting the changes in voters and parties at every step In parallel it shows how electoral analysts have responded to these developments The first book of its kind it will be invaluable to readers with a general interest in British politics as well as to undergraduate and postgraduate students of the subject

Change In British Politics Hugh Berrington, 2005-06-21 First Published in 2004 The most striking change in British politics during the seventies and early eighties was the undermining and then the end of the post war British consensus That consensus had been long in decline before the final seals were set by Mrs Thatcher's victories in 1979 and 1983 The consensus and the end itself had profound effects on the British polity they unsettled the distribution of power within the political parties and hence the working of the institutions of the government the direction of economic policy the character of local government and relations between government and interest groups were transformed What accounts for the ending in the mid 1970s of the policy consensus which characterised British politics

for most of the post war period The essays in this collection seek to explore the causes and some of the consequences of this breakdown

Elections and Voters in Britain David Denver, Christopher Carman, Robert Johns, 2017-07-04 How do voters in Britain decide which party to vote for in elections Why do smaller parties get more support than they used to How do the mass media influence political opinions The authors examine these and other questions in the third edition of this popular text They trace the evolution of the British electorate over the post war period and focus in particular on recent elections from Labour's victories in the 2000s through to the hung parliament of 2010 As well as examining and explaining theories of party choice including the view that voters' evaluations of government performance and party leaders are now the key determinants of election outcomes the authors also devote separate chapters to turnout trends and patterns electoral systems and the geography of party support Campaigning opinion polls and the mass media are also considered Fully revised the text incorporates the latest research on elections and voting behaviour and includes analysis of recent trends and developments including how new media are affecting election campaigning

Critical Elections Geoffrey Evans, Pippa Norris, 1999-04-28 Did Labour's landslide victory in 1997 mark a critical watershed in British party politics Did the radical break with 18 years of Conservative rule reflect a fundamental change in the social and ideological basis of British voting behaviour Critical Elections brings together leading scholars of parties elections and voting behaviour to provide the first systematic overview of long term change in British electoral politics

Electoral Systems and Voting in the United Kingdom Chris Robinson, 2010-07-13 A key feature of the New Labour government's constitutional reform agenda has been the introduction of a number of alternative methods of voting for both existing elections and for those to new political institutions This book examines the workings of these various systems of elections looking specifically at how they operate within the United Kingdom and their direct impact on representation and governance It also considers voting behaviour in the UK with reference to the context of the electoral system being used In conclusion there is an attempt to discover the extent to which the introduction and operation of different electoral systems has affected voter behaviour

Parliamentary Voting System and Constituencies Bill

Great Britain: Parliament: House of Commons: Political and Constitutional Reform Committee, 2010-10-20 A cross party committee of MPs warns that the rushed timetable of one of the government's flagship bills could risk restoring the public's faith in Parliament while significantly limiting scrutiny of the bill's impact The 3rd report from the Political and Constitutional Reform Committee HCP 437 ISBN 9780215554895 of the 2010-11 session says that for primarily political reasons the Parliamentary Voting System and Constituencies Bill links two provisions which could have been considered separately Of particular concern to the committee is that if either House substantially amends the rules for holding the referendum on the alternative vote the government may have to reconsider the date of the vote or run the risk of serious administrative difficulties which could undermine the outcome The committee stresses that voters must understand what they are voting for and that recommendations by the Electoral Commission on the intelligibility of the referendum question should be implemented The Committee also states that the government's failure to attempt to reach cross party consensus on its boundary reform proposals adds fuel to the fire for those claiming the bill is being brought forward for partisan motives and may embolden future governments to do the same The committee also questions why the public is not being offered a referendum on constituency boundary reform which significantly affects how voters are represented in Parliament Also while the committee agrees that there may be a case for reducing the number of MPs it says the Government has singularly failed to make it The impact of boundary reforms on local politics appears to have been given little or no consideration and the committee expresses concern about the potential impact of the current proposals on the ability of MPs to fulfil their responsibilities to their constituents
