Electric City Energy And The Growth Of The Chicago Area 1880 193:

The Electric City Harold L. Platt, 1991-04-09 Describes consumers shifting habits of fuel consumption tracing how use of wood led to burning coal and coal gas to the arrival of the arc lamp and then the coming of electricity Shows that the city government and utility brokers faced two problems how to generate a cheap supply of electricity and how to sell electrical energy to people who were already enjoying gas services The solutions were found by Samuel Insull president of Commonwealth Edison Company who put electrical technology on a sound economic footing *The History of Wisconsin, Volume IV* John D. Buenker, 2013-03-05 Published in Wisconsin s Sesquicentennial year this fourth volume in The History of Wisconsin series covers the twenty tumultuous years between the World s Columbian Exposition and the First World War when Wisconsin essentially reinvented itself becoming the nation s laboratory of democracy The period known as the Progressive Era began to emerge in the mid 1890s A sense of crisis and a widespread clamor for reform arose in reaction to rapid changes in population technology work and society Wisconsinites responded with action their advocacy of women s suffrage labor rights and protections educational reform increased social services and more responsive government led to a veritable flood of reform legislation that established Wisconsin as the most progressive state in the union As governor and U S Senator from Wisconsin Robert M La Follette Sr was the most celebrated of the Progressives but he was surrounded by a host of pragmatic idealists from politics government and the state university Although the Progressives frequently disagreed over priorities and tactics their values and core beliefs coalesced around broad based participatory democracy the application of scientific expertise to governance and an active concern for the welfare of all members of society what came to be known as the Wisconsin Idea **The New Geographies of Energy** Karl Zimmerer, 2013-09-13 The New Geographies of Energy Assessment and Analysis of Critical Landscapes is a pioneering collection of new geographic scholarship It examines such vitally important research topics as energy dilemmas of the United States large trends and patterns of energy consumption including China s role peak oil energy poverty and ethanol and other renewable energy sourcing The book offers advances in key emerging areas of energy research each distinguished in the following sections i geographic approaches to energy modeling and assessment ii fossil fuel landscapes iii the landscapes of renewable energy iv landscapes of energy consumption and v an overview of the new geographies of energy Karl Zimmerer Annals Nature Society and Energy issue editor and an essay on America s oil dependency Vaclav Smil renowned energy geographer In addition there is a specially commissioned book review This book was published as a special issue of the Annals of the Association of American Geographers **Urban History 19:2** Kajal Lahiri, Geoffrey H. Lahiri, 1992-12-10 **Illinois Historical Journal** , 1998 *A Rabble of Dead Money* Charles R. Morris, 2017-03-07 The Great Crash of 1929 profoundly disrupted the United States confident march toward becoming the world s superpower The breakneck growth of 1920s America with its boom in automobiles electricity credit lines radio and movies certainly presaged a serious recession by the decade s end but not a

depression The totality of the collapse shocked the nation and its duration scarred generations to come In this lucid and fast paced account of the cataclysm award winning writer Charles R Morris pulls together the intricate threads of policy ideology international hatreds and sheer individual cantankerousness that finally pushed the world economy over the brink and into a depression While Morris anchors his narrative in the United States he also fully investigates the poisonous political atmosphere of postwar Europe to reveal how treacherous the environment of the global economy was It took heroic financial mismanagement a glut induced global collapse in agricultural prices and a self inflicted crash in world trade to cause the Great Depression Deeply researched and vividly told A Rabble of Dead Money anatomizes history s greatest economic catastrophe while noting the uncanny echoes for the present

Urban Public Policy Martin V. Melosi, 1993 The 1992 Los Angeles riots catapulted the problems of the city back onto the policy agenda The cauldron of social problems of the city as the riots showed offers no simple solutions Indeed urban policy includes a range of policy issues involving welfare housing job training education drug control and the environment The myriad of local state and federal agencies only further complicates formulating and implementing coherent policies for the city This volume while not offering specific proposals to remedy the problems of the city provides a broad historical context for discussing contemporary urban policy and for arriving at new prescriptions for relieving the ills of the American city The essays address issues related to public housing poverty transportation and the environment In doing so the authors discuss larger themes in urban policy as well as provide case studies of how policies have been implemented over time in specific cities Of particular interest are two essays that discuss the role of the historian in shaping urban policy and the importance of historical preservation in urban planning
